

Maternity Review – Patient Distribution Analysis Current Provision

This report graphically presents the current flow of patients into the four birth centres in East Kent.

The report covers:

- Current patient flows,
- Proportion of affected patients,

Primary data source: Euroking Maternity Database,

Reporting period: **August 2009 to July 2010**

This period of time was chosen due to the changes in service during 2010/11. The time period accounts for the most recent 12 month period when all four of our birthing locations were open. Due to the reporting period, the data detailed within the report will not match exactly to those detailed within the maternity review documentation.

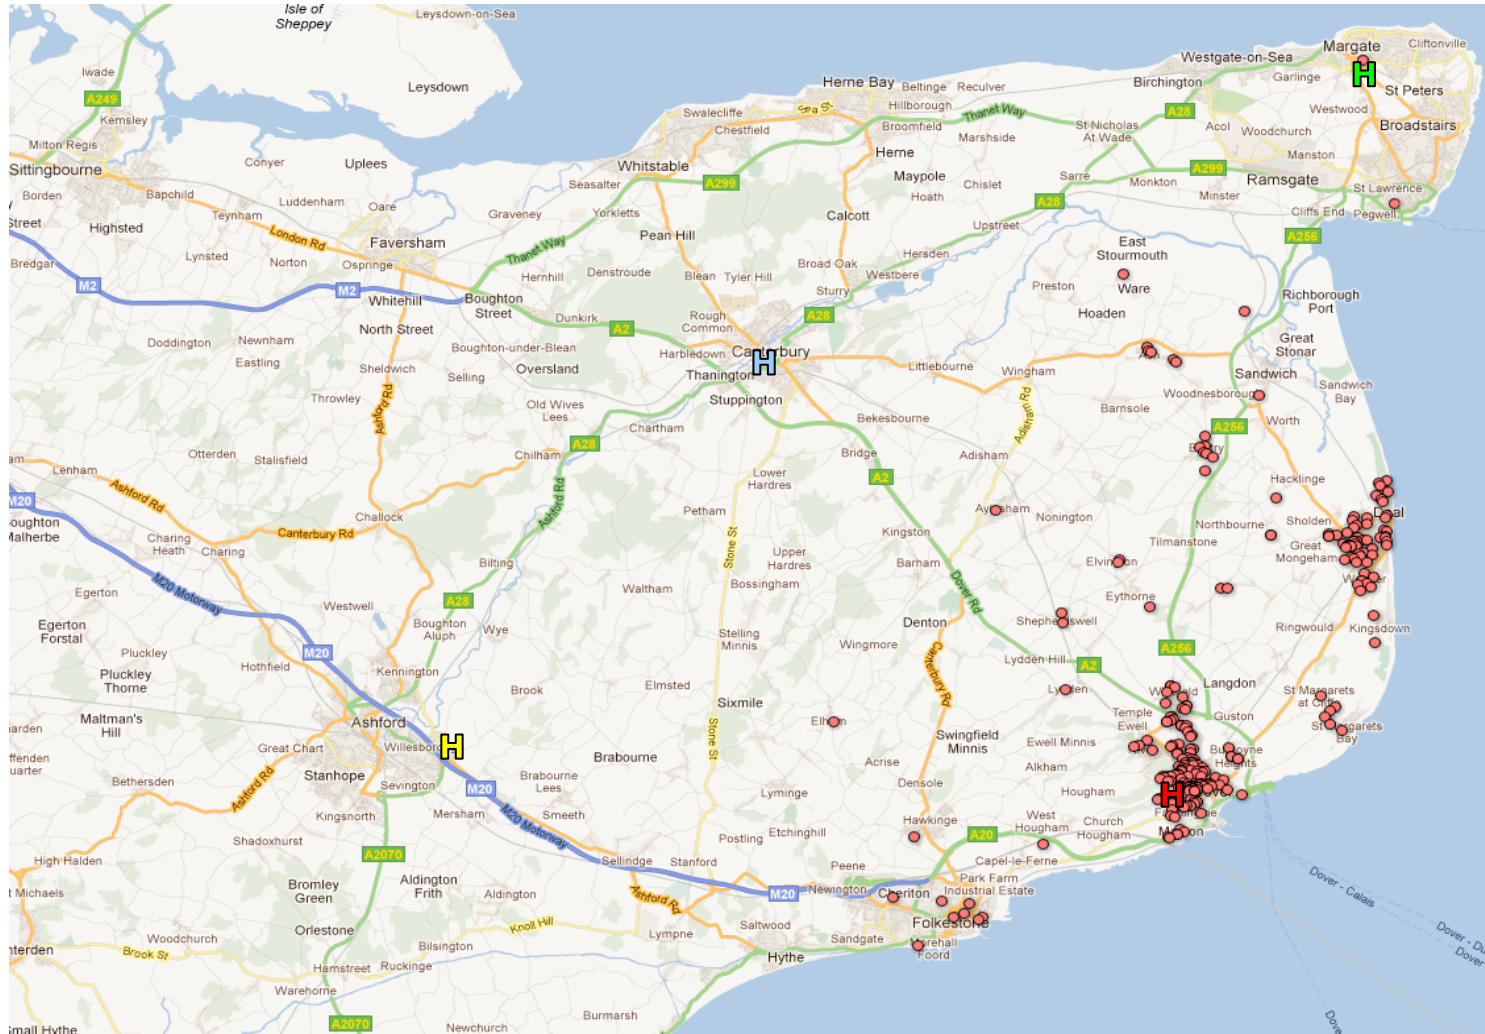

We have kept the same colour scheme throughout the report.

● Dover Family Birth Centre – Red

● Canterbury Birth Centre – Blue

● William Harvey Hospital – Yellow

● Queen Elizabeth the Queen Mother Hospital – Green

Dover Family Birth Centre

Midwife Led Births	248
Consultant Led Births	0
