Commentary

Performance for the percentage of Returner Interviews carried out within 3 working days of a child/young person being located following a missing incident has remained between 68% and 76% for the last 12 months.

Although there is an expectation that Returner Interviews will be conducted wthin 72 hours there is no national or regional benchmarking data available. The absence of benchmarking data makes it difficult to assess Kent's performance but a local target of 85% has been set to drive up the timliness of these Returner Interviews.

At 72.7%, performance for this measure is 2.3% away from moving within the Amber banding.

The overall rate of completion of Returner Interviews is 89.7%.
