Dear Member

KENT FLOOD RISK MANAGEMENT COMMITTEE - FRIDAY, 16 MARCH 2012

I am now able to enclose, for consideration at next Friday, 16 March 2012 meeting of the Kent Flood Risk Management Committee, the following report(s) that were unavailable when the agenda was printed.

Agenda No	Item
4	<u>Kent Flood Defence Grant in Aid Medium Term Plan (Pages 1 - 6)</u>

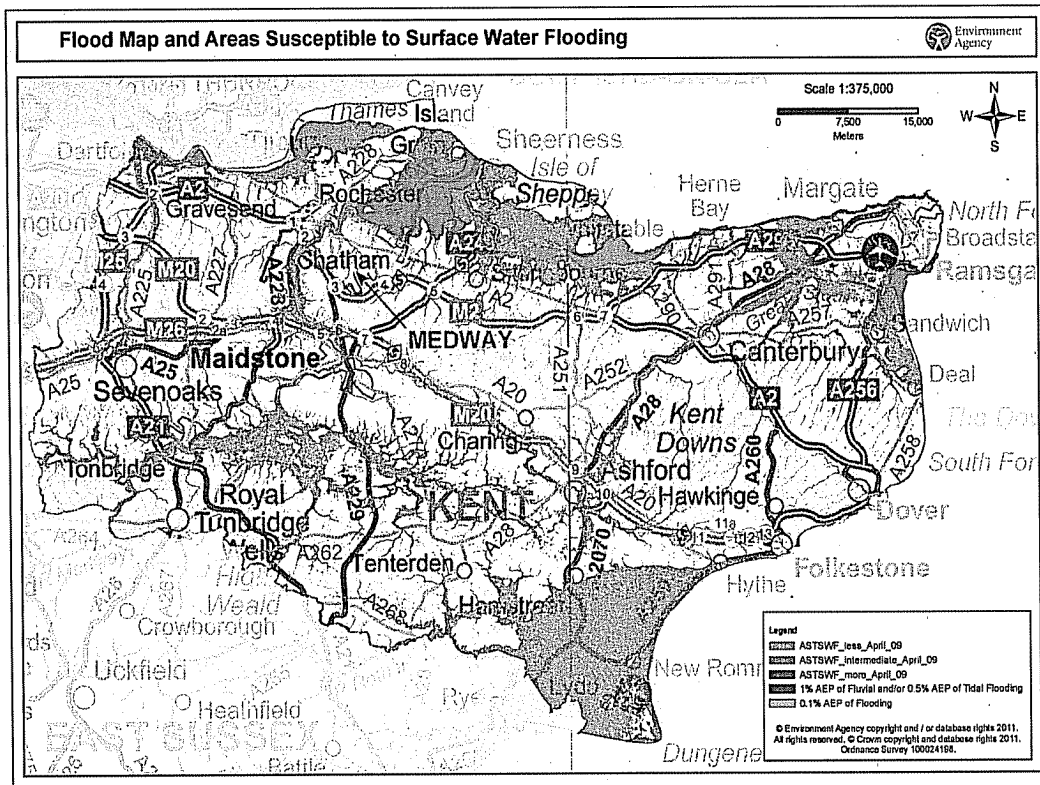

Yours sincerely

Peter Sass
Head of Democratic Services

Flood & Coastal Erosion Risk Management in Kent

Properties at risk from surface water flooding:

75,800

Properties in Kent at risk from rivers or the sea:

250, 000

Current capital funding 12/13:

£17 million

Number of properties protected next year:

3120

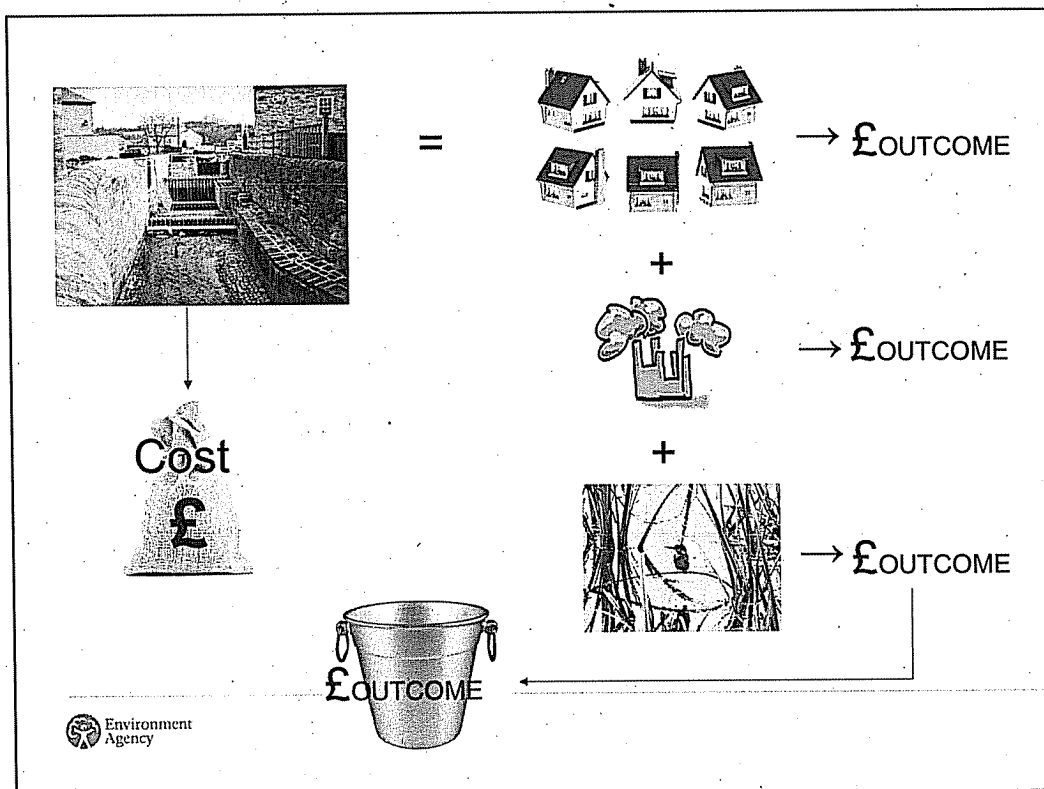

Identifying Potential Flood Risk Schemes

**Shoreline Management
Plans**

Local Authority / EA

Post Flood event identification

**Catchment Flood Management
Plans**

Each project will receive a (suggested) FDGiA contribution according to the future outcomes

OM1 – benefits against the ‘do nothing’

OM2s – protecting households from flood risk (£0.7k to £14k per household)

OM3s – protecting households from coastal erosion (£5k to £33k per household)

above are the maximum value over 50 years

OM4s – households protected by resistance / resilience (£10k to £15k per household)

to meet WFD objectives

OM5 – km of protected river (£80k/km)

OM6 – ha of inter-tidal habitat created (£50k/ha)

OM7 – ha of water dependant habitat improved (£15k/ha)

Project funding scenarios

Where a project with Whole Life Cost of £2m

moves 312 properties from (very) significant to a lower risk category it should received 100% FDGiA contribution ($£2m = 312 * £6,415$)

moves 156 properties from (very) significant to a lower risk category it would only received £1m FDGiA contribution ($156 * £6,415$), therefore at least £1m contribution (or reduction in WLC)

Flood Defences
