# EDUCATION CABINET COMMITTEE 

## Wednesday, 9th May, 2012

10.00 am

Council Chamber, Sessions House, County Hall, Maidstone

## AGENDA

## EDUCATION CABINET COMMITTEE

## UNRESTRICTED ITEMS

(During these items the meeting is likely to be open to the public)

## Item

No Timings*

## A. COMMITTEE BUSINESS

A1 Introduction/Webcasting 10.00 am
A2 Substitutes
A3 Election of Vice Chairman
A4 Declarations of Members' Interest relating to items on today's Agenda

A5 Future Meeting Dates 2012/13
Members are asked to note the future meeting dates as follows:
Wednesday, 9 May
Tuesday, 10 July
Wednesday, 12 Sept
Thursday, 21 Nov
Friday, 18 Jan
Tuesday, 30 April
(All Meetings will commence at 10.00 am)

A6 Minutes of the meeting held on 29 March 2012 (Pages 1-2)
B. Key or Significant Cabinet/Cabinet Member Decision(s) for Recommendation or Endorsement

## C. Monitoring of Performance

D. Other Items for Comment/Recommendation to the Leader/Cabinet Member/Cabinet or Officers
D1 Verbal Update - Cabinet Member and Corporate Director (Pages 10.50-11.10 am 9-10)

D2 Bold Steps for Education (Pages 11-22) 11.10-11.30 am
D3 Education, Learning and Skills Directorate Restructure - 11.30-11.45 am Presentation

D4 Commissioning Plan for Education Provision 2012-17 (Pages 23 - 11.45-12.15 pm 190)

D5 Scoping a Review and the Development of a Strategy for Special 12.15-12.30 pm Education Needs and Disabilities (Pages 191-234)

D6 Review of AC/PRU Provision (Pages 235-242)
$12.30-12.45 \mathrm{pm}$

## EXEMPT ITEMS

(At the time of preparing the agenda there were no exempt items. During any such items which may arise the meeting is likely NOT to be open to the public)
*All timings are approximate
Peter Sass
Head of Democratic Services
(01622) 694002

Monday, 30 April 2012
Please note that any background documents referred to in the accompanying papers maybe inspected by arrangement with the officer responsible for preparing the relevant report.

## KENT COUNTY COUNCIL

## EDUCATION CABINET COMMITTEE

MINUTES of a meeting of the Education Cabinet Committee held in the Council Chamber, Sessions House, County Hall, Maidstone on Thursday, 29 March 2012.

PRESENT: Mr R B Burgess, Mr A R Chell, Mr L Christie, Mrs P T Cole, Mr G Cooke, Mr H J Craske, Mr D S Daley (Substitute for Mr M J Vye), Mr L B Ridings, MBE, Mr K Smith, Mrs P A V Stockell and Mr R Tolputt

IN ATTENDANCE: Mr P Sass (Head of Democratic Services)

## UNRESTRICTED ITEMS

## 1. Membership

(Item 1)
The Committee noted its Membership as set out on the agenda.

## 2. Election of Chairman

(Item 3)
Mr L B Ridings proposed and Mr K Smith seconded that Mr G Cooke be elected Chairman.

| By: | Mike Whiting, Cabinet Member for Education, Learning and Skill |
| :---: | :---: |
|  | Patrick Leeson, Corporate Director for Education, Learning \& Sk |
| To: | Education Cabinet Committee - 9 May 2012 |
| Subject: | Post 16 Transport Policy |
| Classification: | Unrestricted |
| Summary: | The purpose of this paper is to seek agreement to KCC's proposed Post-16 Transport Policy for 2012. <br> KCC has a statutory duty to consult on its Post 16 Transport Policy before determining and publishing arrangements. A six week consultation is underway which ends on 5 May the outcomes of the consultation will be tabled at the Education Cabinet Committee on 9 May. <br> There is no statutory duty to provide support for Post 16 Transport other than for those pupils with a statement of special educational need that names a specific requirement for transport. <br> At its discretion the Local Authority has historically chosen to support Post 16 learners directly where they attend their nearest appropriate provision and meet certain criteria. Changes in the way students will be funded in 2012 will result in learning providers being resourced directly by government, and they will be able to offer additional support to learners where needed. This change means that the existing approach to transport support by the LA is no longer fit for purpose. Students will no longer receive an Education Maintenance Allowance, as a result of a change in government policy, and they will not be in a position to contribute directly in the way they have in the past. Funding is now directed to schools and colleges to allocate to learners on the basis of need, for transport and other costs. |
| Recommendations | Members are asked to: <br> (1) note the consultation summary feedback, and <br> (2) consider and either endorse or make recommendations on the Cabinet Member decision on the proposed 16+ Transport Policy and Eligibility Criteria as set out in this report. |

## Existing Provision

1. (1) Currently a yearly transport pass is available to students attending their nearest appropriate school or college where they live more than 3 miles from the
provision, at a cost of $£ 490$. This fee is waived if the family get Income Support, Income Based Job Seekers Allowance, Guaranteed Element of State Pension Credit, Income-Related Employment and Support Allowance or Child Tax Credit. Provided that the family do not get Working Tax Credit and have a yearly Income according to HM Revenue \& Customs of not more than $£ 16,190$.
(2) The transport pass entitles learners to a single journey at the beginning and end of the school day to and from school or college only. The most appropriate form of transport is determined by KCC and can include bus travel, rail travel and in some circumstances a mixture of both.

## Context for change

2. (1) Kent County Council introduced the Kent Freedom Pass in 2009. It has proven to be an extremely popular and important form of support for young people in Kent, in enabling them to access a range of activities including learning, work and leisure.
(2) The pass is however only available to learners attending school in Years 7 to 11, and KCC have been lobbied to develop some sort of Post 16 Travel Card that can provide similar flexibility to Kent's 16-19 year old learners. KCC is keen to introduce similar benefits to those enjoyed by pre 16 learners in an affordable way. To achieve this will require a different approach to the way discretionary travel support to post 16 learners is provided.
(3) The existing level of support offered by KCC to Post 16 learners is not sustainable. Post 16 learners no longer receive funding they can use to subsidise their transport directly, following the government's cessation of the Education Maintenance Allowance (EMA). KCC have therefore proposed a policy that allows for transport to be funded in a different way, whilst recognising the importance of supporting those families most in need.
(4) The KCC Post-16 Transport Policy for 2012 is written against the backdrop of the need to fulfil the Authority's responsibility to ensure full participation in learning and work based training for all 18 year olds by 2015, the removal of the Education Maintenance Allowance (EMA) and introduction of the government's new 1619 Bursary scheme.
(5) With more post 16 learning institutions funded directly by government through the Bursary scheme, they are now able to provide support for transport through their various grants. KCC cannot sustain a growing demand for support with post 16 transport when there is no legal duty to do so, or any funding direct from government for such provision. KCC will however continue to offer financial subsidy for Post 16 transport in the event this policy is agreed. In future it will do so by working closely with post 16 education and training providers to develop improved access to all schools and colleges capitalising on the revised funding streams to ensure the sustainability of such support.
(6) All indications are that learning providers are keen to progress this approach to Post 16 Transport Support in a collaborative way. A formal response by providers will form part of the consultation feedback. This policy is recommended as
the best way forward in supporting the most needy young people to access education and training by having some transport subsidy.

## Proposed 16+ Transport Policy

(1) The recommended KCC Post 16 Transport Policy is to allow schools and colleges to secure a travel pass which will provide extended access to all students in a fair and sustainable way. KCC will provide the opportunity for all education and training providers to secure a Post16 Transport Pass available for use on all registered public service bus routes in Kent.
(2) The subsidised pass will be available to schools and colleges for an annual fee of $£ 520$, or $£ 10$ a week, and can be further subsidised by them for their registered students.
(3)The changes in government funding arrangements will mean that these will be procured directly from the education providers by students. It is expected that such providers who will have benefited from the government's new 16-19 Bursary scheme can use elements of this funding to support the cost of their students' travel.
(4) If bus travel is not the most appropriate form of transport for a learner, it will be up to the learning provider to facilitate an alternative. KCC will, where required, continue to act as a broker to procure other transport at attractive rates, as a paid-for service to learning providers.
(5) Any learner in education or training who is not eligible for a contribution from their provider or employer would pay the full cost of the Post 16 Freedom Pass at £520.

## Eligibility Criteria

From the start of the academic year 2012/13 all year 12, 13 and 14 learners will be able to apply for a pass through their employer (if in an apprenticeship), or their college or school sixth form.
4. (1) It will be for learning providers to determine the level of subsidy they wish to introduce, however KCC recommends that providers model their support structures along the criteria set out below:
a) A learner whose family income is not more than $£ 16,190$, who is on Income Support, Income Based Job Seekers Allowance, Guaranteed Element of State Pension Credit, Income Related Employment and Support Allowance or Child Credit, but not Working Tax Credit; it is recommended that they pay no more than $50 \%$ for the Pass. This would result in providers reducing the cost to the learner of their Pass to between $£ 0$ and $£ 260$.
b) A learner whose family income is between $£ 16,190$ and $£ 20,817$. It is recommended that they may receive a learning-provider contribution to the cost of the Pass, at a level set by the learning provider, reducing the cost of their pass to the learner to between $£ 260$ and $£ 520$. This is to be in addition to the KCC subsidy. For example learners may benefit from a further subsidy payable by, and at the discretion
of, their learning provider, reducing the cost to the learner of their Pass to between £260 and £520.
c) A learner whose family income is above $£ 20,817$. It is recommended that they pay the maximum amount of $£ 520$.
d) Where a 16-19 year old apprentice falls outside these criteria, but can demonstrate hardship caused by travel-to-learn and travel-to-work pressures, then they can be treated as category (b) above. Employers should be approached for additional funding support.
e) All eligible learners must demonstrate to their institutions that they have a genuine travel-to-learn need.
f) While the learning-provider funding or employer funding that could be used to further subsidise each Pass is entirely discretionary, the guidance in (a) to (e) above is designed to assist in ensuring a standard level of subsidy for all learners in Kent.

## Summary Feedback to the Consultation

5. (1) A six week consultation designed to target schools, colleges, training providers and most importantly Post 16 learners took place between 26 March and 4 May 2012. Details of the proposals were available on the KCC website, and included an online survey and comments form, in addition changes were promoted through Twitter and Facebook entries. Links to appropriate webpages were distributed to schools and colleges who were asked to encourage the greatest possible feedback from young people. Hard copies of all online information was also made available.
(2) To increase the level of feedback from young people KCC's Youth Service made use of all its registered contacts to direct them towards the consultation. A paper survey and comment form was also available to young people to complete.
(3) Posters and other material were sent to schools and colleges for display which directed students to the consultation pages on KCC's website.
(4) The consultation used a variety of activities to gather feedback on the proposals, which has been summarised for consideration by the Education Committee.

Feedback on the results and outcomes of the consultation will be released publicly by $1^{\text {st }}$ June 2012 and will tabled for the Education Committee on 9 May.

## Equalities Impact Assessment

6. (1) An equalities screening has been undertaken in order to identify any adverse impacts that may exist in relation to the implementation of the policy. The impact assessment has formed part of the consultation and further analysis will be tabled for the Education Committee on 9 May 2012.

## Transitional arrangements

7. (1) Students currently in Year 12 will have started their courses with a reasonable expectation that their KCC-facilitated transport arrangements will continue
into Year 13. Some of these students may be disadvantaged by new Post-16 transport arrangements and some may prefer the new arrangements. To meet the expectations of the first group, it is proposed that the existing non-SEN KCC discretionary Post-16 transport arrangements should remain in place for a transitional year. It will be important to keep the new arrangements under review during the transitional year and determine the costs for future years on the basis of our monitoring of the scheme. We will ensure continuity for current 16-19 learners but may adapt the scheme in future to reflect changing needs.

## Recommendations

Members are asked to:
(1) note the consultation summary feedback, and
(2) consider and either endorse or make recommendations on the Cabinet Member decision on the proposed 16+ Transport Policy and Eligibility Criteria as set out in this report.

| Subject: | Bold Steps for Education |
| Classification: | Unrestricted |
| Summary: | This report sets out Kent County Council's, Education, Learning and Skills vision, priorities and improvement targets to 2015. |
| Recommendations | Members are asked to: <br> (i) endorse the Education, Learning and Skills' Vision and Priorities for Improvement, in order to create the conditions in which pupils experience the best teaching and learning, so that: <br> - excellence is promoted across the system; <br> - every child in Kent meets their full potential; and <br> - every young person benefits from a broad range of pathways in further learning employment, both for their own sense of achievement and for the success of the economy |

## 1. Introduction

1. (1) The Vision and Priorities for Improvement document (attached) details why education and training in Kent needs to be transformed in order to keep pace with the most successful nations in the world in terms of educational performance. The ambitions set out in the vision document promote and champion educational excellence and support the drive towards ensuring that Kent becomes one of the best places in the country to be educated.

## 2. Background

2. (1) The world is changing fast, learning is being transformed in a digital age, expectations are rising and the importance of learning for future personal, social and economic wellbeing has never been greater. Those countries that are developing fastest are achieving their growth through education and by equipping young people with the skills for life long learning and employability. In order to keep pace, we need to transform the way we do our education business in Kent.

## 3. Bold Steps for Kent

3. (1) Some of our strategic priorities for Education Learning and Skills were set out in an initial Bold Steps for Education scoping document that was
shared with Headteachers and key stakeholders just over a year ago. We have built on this initial engagement to develop a transformational set of ambitions.
(2) During the course of the Autumn Term 2011, discussions were held with Headteachers and other partners at a range of meetings to identify where we are and where we need to be, in terms of local, national and international performance. From this series of conversations we have been able to establish a good level of shared ambition and agreed a range of rapid priority improvements to achieve by 2015. These are detailed in the attached vision document, as are the headline steps that will need to be taken to get there.
4. Recommendations
4.1 Members are asked to:
(ii) endorse the Education, Learning and Skills' Vision and Priorities for Improvement, in order to create the conditions in which pupils experience the best teaching and learning, so that:

- excellence is promoted across the system;
- every child in Kent meets their full potential; and
- every young person benefits from a broad range of pathways to further learning and employment, both for their own sense of achievement and for the success of the Kent economy.

Background Documents
Bold Steps for Kent

## Delivering Bold Steps for Kent

## Education, Learning and Skills Vision and Priorities for Improvement

Vision:

Our vision is for Kent to be the most forward looking area in England for education and learning so that we are the best place for children and young people to grow up, learn, develop and achieve.

Kent should be a place where families thrive and all children learn and develop well from the earliest years so that they are ready to succeed at school, have excellent foundations for learning and are equipped well for achievement in life, no matter what their background.

In Kent we should have the same expectations for every child and young person to make good progress in their learning, to achieve well and to have the best opportunities for an independent economic and social life as they become young adults.

Every child and young person should go to a good or outstanding school, have access to the best teaching, and benefit from schools and other providers working in partnership with each other to share the best practice as they continue to improve.

Our strategic priorities in Kent Bold Steps are to ensure all pupils meet their full potential, to shape education and skills provision around the needs of the Kent economy and improve services for the most vulnerable young people in Kent.

## Our Ambition

Central to our ambition is the desire to create the conditions in which pupils experience the best learning and teaching, and where pupils' moral and intellectual development and confidence can flourish. We want every child in Kent to achieve well above expectations and not to be held back by their social background. We want every young person to benefit from a broad range of pathways to further learning and employment, for their own achievement and for the success of the Kent economy.

We will do this by focusing relentlessly on improving standards and the quality of education and learning so that excellence is promoted across the system. We will ensure children continue to get a good start in life, by working alongside all the agencies who work with very young children and their families, particularly health practitioners and those providing services through our Children's Centres, so that we promote the highest quality early learning and childcare in the Foundation Stage. We will work tirelessly to ensure every child can go to a good school where they make good progress and can have fair access to school places. And we will ensure every young person to age 18 is engaged in purposeful education and training, and they are well prepared for skilled employment and higher learning.

We will achieve this by learning from and spreading the influence of the best, whether locally, nationally or internationally and through working in partnership across all types of school and phases of education and learning and with partners across the business sectors, local government, health, social care, the voluntary and community sectors, and especially with parents, carers, local communities and the children and young people themselves.

We will support the best schools and school leaders to lead the system and drive improvement across all schools, settings and education and training providers, supporting and challenging each other in how we achieve our goals, so that we are able to transform outcomes for all of our children and young people. We will promote innovation and creativity in teaching and learning and the curriculum, so that Kent achieves a world class education system, greater social mobility and reverses the national trends of under performance for vulnerable and disadvantaged groups which hold back progress in our economy and our society.

We see learning as a lifelong process in which learners should always be able to progress to the next stage of their lives, with the necessary foundations for success, to develop their skills, training and qualifications both in and out of work and in informal and formal learning situations. We will give particular priority to improving the skills and employability of 14-24 year olds, so that they make a good start to adult life and their potential is not lost to the Kent economy.

## The Challenge for the Future:

The world is changing fast, expectations are rising rapidly and a more diverse education system is developing quickly. The UK has to achieve a more educated and skilled workforce and cannot afford to lose the potential of so many young people who, if they are not educated well enough, will lead less productive and satisfying lives. The economic and social cost of educational failure is immense. In this mix the role of the Local Authority is changing to be more ambitious, focused and strategic in bringing about educational transformation for Kent by being a strong and influential partner with schools and other providers.

In particular our priorities are to:

- Develop a new partnership relationship with all schools and other providers, based on collaboration and shared effort, to build greater capacity in the system
- Focus relentlessly on raising educational standards and support and challenge lower performing schools and other providers to improve quickly
- Support greater choice for parents and families by commissioning a sufficient and diverse supply of places in strong schools and quality early years settings
- Make the most effective and efficient use of the available resources to support improved outcomes
- Move to a more strategic commissioning and oversight role which builds capacity for improvement and brokers the best arrangements for longer term sustainable success
- Support vulnerable pupils, including looked after children and pupils with special educational needs and disabilities, so that they achieve well and make good progress
- Ensure every child has fair access to all schools
- Deliver an effective school improvement strategy and procure effective support and advice services for schools
- Promote and champion an education, training and skills system that delivers a range of options and pathways for all young people into higher levels of learning or employment to age 24
- Promote and champion educational excellence and provide vision and drive for a world class system

New ways of working are key to success in a more diverse educational landscape, with many different providers across the early years, schools and post 16 skills and employment sectors. This landscape requires us to drive change through strategic influence, highly effective partnership arrangements and networks in which there can be pooled effort and shared priorities, to achieve better outcomes, to increase capacity in the system and to create more innovative solutions at a time of reducing levels of resource. More successful delivery in Kent will see the emergence of new vehicles for joint working and partnership. Our priority will therefore be to ensure success for:

- School leaders to lead the system through the Kent Association of Headteachers, working at a local level through District school forums that have strong and purposeful working relationships with the Local Children's Trust Boards and Locality Boards in order to deliver the best opportunities and outcomes for their children and young people
- Schools to procure support services well, have real choice and be able to procure high quality services through EduKent
- Kent Challenge to deliver a school improvement model based on strong school collaborations and the development of a school to school support system
- Locality based working and commissioning to pool and target resources to local needs
- Our key strategic partnerships to maximise effort and increase our capacity to transform early learning, education in schools, and post 16 learning and training so that it is truly excellent.

## Where are we now?

We need to be very ambitious because there is much to do to bring about the necessary improvement. Kent has a mixed economy of early years and school provision serving diverse communities. This ranges from outstanding and good provision to a significant amount of underperforming provision which is letting down children and communities, some of whom are the most disadvantaged in Kent.

There is mostly good or better provision in early years settings and outcomes for children at the end of the Foundation Stage are above average, with the achievement gap narrowing for the $20 \%$ most disadvantaged children at age 5 . As a result most children in Kent are ready to make a good start at school as they approach their fifth birthday. The challenge is to improve the satisfactory provision and narrow the achievement gap even further by the end of the Foundation Stage so that more children make a good start at Primary school. Our Children's Centres, working closely with early years settings and their local Primary Schools, are vital in
ensuring that the most disadvantaged children and their families receive the targeted early support they require in order to prevent escalation of potential problems and children are eager and able to learn well when they start school.

In Primary education we have significant challenges. Only 55\% of our schools are good or better, fewer than in similar areas and much less than the national average. There are 62 outstanding primary schools that can and do help to lead the system. Key Stage 2 standards are in line with similar areas, and just below the national average ( $74 \%$ ) and, while there was some improvement in 2011 with 72\% achieving level 4 in English and mathematics, our expectation should be for a far higher percentage of pupils to be able to start secondary education with level 4 attainment. At present Kent is 120th out of 152 local education authorities for performance at Key Stage 2, which is far from being the world class education system we aim to be. We are in the bottom quartile and we should be in the top quartile for local authority performance in Primary education.

We have seen limited improvement in the overall effectiveness of primary schools, there is too much satisfactory provision and wide variation across schools, ranging from $23 \%$ to $100 \%$ of pupils attaining level 4 outcomes at the end of Key Stage 2. There is significant underperformance and over 90 schools have been performing below the floor standard of 60\% of pupils attaining level 4 in English and mathematics by age 11, for several years. Many of these schools have remained no better than satisfactory for two or more Ofsted inspections. This means that the gaps in pupil attainment and progress at Key Stage 2, and the wide variation in the quality of schools, result in poorer outcomes for many children including the most vulnerable children. The challenge is to improve this situation quickly and achieve greater capacity for sustained improvement.

At Secondary level the overall effectiveness of schools has steadily improved and Secondary education is mostly good or better (69\%), which is in line with the national average. 26 Secondary schools are outstanding and Key Stage 4 standards have improved year on year and are just above similar areas and in line with the national average for five good GCSE grades including English and mathematics (58\%).

However the gaps in Secondary school performance at Key Stage 4 are wide, and again are worse amongst those young people who face the greatest disadvantage. Only 28\% of pupils on free school meals attained five good GCSEs in 2011, which is well below average. In 2012 there are potentially 29 secondary schools that may perform below the floor standard of $40 \%$ of pupils attaining five good GCSEs including English and mathematics. The challenge is to improve standards in these schools quickly and ensure more Secondary schools are at least good schools.

It has been a priority for Kent County Council to develop a system of learning that recognises the different aspirations of young people. We have delivered a good 14-16 vocational programme, and the work of schools, colleges and the Vocational Skills Centres across Kent have enabled 8,500 14-16 year olds to undertake vocational courses, helping many young people to move into an apprenticeship. However the challenge now is to re-design that offer quickly in response to the recent government changes to vocational qualifications, so that
young people continue to have an improving vocational offer with good pathways to meaningful learning and qualifications post 16.

Special education is a strength. Special schools are almost all good or better, (four are satisfactory) and whilst almost all the sixth forms are also good or better not all schools have post 16 provision. There is insufficient quality provision, therefore. for nearly half of the Year 11 pupils who need appropriate post 16 education, work based learning and training. And many young people with learning difficulties and disabilities at age 19 have poor opportunities for employment and independent living. This will be addressed as a priority in our 14-24 strategy.

Only just over half of the Pupil Referral Units in Kent are good or better, fewer than in similar areas and below the national average. There is too much satisfactory provision in place which cannot secure good progress for the very vulnerable pupils who attend. The challenge is to review and re-organise this provision to secure better outcomes and expand the range of alternative provision at Key Stage 4. Our aim needs to be to have more flexible provision, fewer exclusions, better support for reintegration into mainstream schools and improved outcomes for the pupils aged 14-16 who follow alternative curriculum pathways by attending college or work based learning providers.

School sixth form provision is mostly good or better (69\%), but only 2 of 5 FE colleges are good or better. A-Level results have steadily improved and the number of young people achieving level 2 qualifications by the age of 19 is in line with similar areas. However the percentage of young people progressing to higher education (55\%) has not increased in recent years.

As with every other area of education in the County the standards and skills achieved by young people aged 19 from low income backgrounds, while improved post 16, are below the national average for this group and the gaps for the most vulnerable young people are not closing quickly enough. This significantly reduces their employability and access to apprenticeships and other vocational qualifications.

We have been successful in engaging young people (16-18) in education and training, and have kept the figure for those not in employment, education or training (NEET) at a relatively low level compared to levels nationally. However the NEET figures are increasing and earlier success does not appear to be carrying through to the 18 to 24 year olds. Youth unemployment figures for Kent reinforce the need for further action with 18 to 24 year olds accounting for $28.6 \%$ of all unemployment in Kent. There needs to be closer alignment between young people's ambitions and learning pathways and the opportunities that exist in the local economy. We need to develop new models of school and employer partnerships, step up the number of apprenticeships and guide young people to participate in learning and training that will lead to better employment.

At present in Kent there is no part time employment with training for post 16 students, there are no pre-apprenticeship programmes, no vocational and technical qualifications with meaningful work experience and no academic courses with meaningful work experience.

These are significant gaps in our provision. It is essential therefore to increase work based learning to secure better routes to employment and the challenge overall is to improve outcomes for this age group by improving learning pathways 16-19 and the quality and range of vocational education, including enabling more young people to take up apprenticeships. If these opportunities do not become more available and lead to better outcomes, we will not succeed in ensuring that all young people participate in learning and work based training to age 18 by 2015 .

We are also working to develop programmes that will create employment opportunities for 18 to 24 year olds who are currently in receipt of Job Seeker Allowance, building on our successful experience in delivering 890 additional jobs for this group of young people through the Future Jobs Fund. We will continue to work with training providers to align our programmes with the National Youth Programme funding and other funding opportunities in order to direct as much resource available within the system to create employment opportunities for our young people.

## Our Future Targets and Priorities:

As there is much to do we are aiming for outcomes that are outrageously good, are worth pursuing and we believe we have the ways to achieve them. Following discussion with Headteachers and other partners at a range of meetings we have a good level of shared ambition to achieve the following improvements by 2015

## To ensure all pupils meet their full potential, we will achieve the following by 2015 :

- Foundation Stage outcomes for 5 year olds will continue to improve so that the percentage of children achieving the expected level $6+$ in all aspects of learning will improve by 5\%, especially in language and literacy and in emotional and social development.
- In the Foundation Stage the number of children achieving at least 78 points will improve to $70 \%$ of children in Kent working at the expected level, which is above the current national average.
- Key stage 2 attainment will be amongst the best for our statistical neighbours and improve to at least 80\% of pupils attaining level 4 in English and mathematics
- Key stage 4 attainment will be amongst the best for our statistical neighbours and improve to at least 70\% of pupils attaining 5 good GCSEs including English and mathematics
- The achievement gaps at key stages 2 and 4 will be less than the national gap figures and pupils from low income backgrounds, looked after children and pupils with special educational needs and disabilities in Kent will be achieving better progress and outcomes than similar groups nationally.
- No KCC schools will be in an Ofsted category of concern
- There will be more good schools, with at least $85 \%$ of primary and secondary schools judged as good or outstanding. All special schools will be good or outstanding.
- At least $90 \%$ of secondary schools and $95 \%$ of primary schools will be performing above the floor standards
- All schools will either be succeeding, by achieving good outcomes for all groups of pupils, or where there has been a history of underperformance the schools will be improving and performing above the floor standards as part of a sponsored academy arrangement or federation with good leadership capacity.
- In nearly all schools (90\%) teaching will be consistently good.
- We will reduce the number of pupils requiring a statement of special educational needs by developing more effective early intervention, $95 \%$ of SEN statutory assessments will be completed within timescales and pupils with statements will be making good progress and achieve above average outcomes when compared with national benchmarks.
- We will reduce the number of independent and non maintained special school placements by $10 \%$ to ensure the needs of more Kent children are met in their locality, by developing our SEN strategy to provide more local and cost effective provision.
- No looked after children will be excluded from school, fewer than $10 \%$ will be persistently absent and their attainment will be in line with the targets in the Kent Pledge to Looked After Children and Care Leavers.
- Following our review and improvement programme for the PRUs, and the further development of alternative provision for pupils aged 14 and above, there will be fewer than 50 pupils permanently excluded from school.
- We will help parents to access a preferred school place for their child by increasing online admission applications to $95 \%$ and increase the number of parents who get their first preference of school to above $85 \%$. First and second preferences combined will improve to $95 \%$.
- We will maintain at least $5 \%$ to $7 \%$ surplus capacity in school places and ensure we keep pace with demand for school places in each District by providing places of good quality that parents want for their children.

## To shape education and skills around the needs of the Kent economy we will achieve the following by 2015:

- There will be full participation in education and work based training for all 16-18 year olds following year on year reductions in the NEET figures
- The employability skills of 19 year olds will have improved, especially in English and mathematics, so that level 2 attainment at age 19 is above the national average
- There will be fewer young people who achieve no improvement in qualifications between the ages of 16 and 19 , so that this number reduces to less than $5 \%$.
- The outcomes for 19 year olds from disadvantaged backgrounds will be above the national average and the achievement gap between this group and other students will have reduced by $10 \%$
- We will have an established and successful pre-apprenticeship and level 1 programme for our 17 year olds who are unable to achieve a level 2 apprenticeship
- The number of level 2, 3 and 4 apprenticeships offered in Kent key sectors will increase by $10 \%$
- The uptake of apprenticeships and level 2 and 3 vocational training in skills shortage areas will increase by $10 \%$
- The Kent Success apprenticeship scheme will continue with at least 88 apprentices taken on each year, totalling 350 successful apprenticeships delivered by KCC by 2015
- At least $50 \%$ of schools will have provided one or more apprenticeships which have been taken up successfully by the young people
- There will be a significant impact on unemployment among 18-24 year olds so that current levels reduce by 4000 to below 2008 levels
- The number of assisted employment opportunities for learners with learning difficulties and disabilities will increase by 10\%
- All learners with learning difficulties and disabilities aged 16-19 will be able to participate in education and training, with year on year increases in the number of vulnerable learners supported into work based learning
- All looked after children and care leavers will be in education and training, with assisted employment opportunities for those that need them.
- Through Skills Plus the number of adults with basic employability skills will have improved year on year and participation in basic skills training will have increased by 20\%
- Participation in higher education and higher level apprenticeships will mean that the percentage of 19+ year olds engaged in continuing education and training will increase to above 60\%.

## Getting There

In order to bring about these rapid improvements we will put most of our effort into doing the following:

- Build improvement and increase capacity in the Kent education system by ensuring the Early Years Foundation Stage and Key Stage 1 are strengths and perform above average, with year on year reductions in achievement gaps
- Support all schools to achieve well in the basics of literacy and mathematics, especially in reading and writing by age 6
- Bring all schools up to minimum quality standards
- Use high quality performance data to identify and learn from rapidly improving trends
- Focus on improvement and innovation in teaching and learning so that satisfactory teaching improves to good very quickly
- Recognise the best schools, teachers and leaders and use them effectively across the system
- Encourage peer led creativity and innovation in schools
- Promote peer based learning and school to school collaboration which is designed to bring about rapid learning, professional development and improvement
- Support system wide innovation and experimentation, especially in the design of the curriculum, the development of new provision and better models of support for vulnerable learners
- Develop and support system leaders to lead and support change beyond their own schools including the development of the Teaching School model, the school partnership model, the federation model and the multi-academy trust model

System leaders build partnerships of support that focus effort and energy in the same direction to ensure improvement is sustained and the pace of change increases. In world class systems 'poor to fair' schools become good schools quickly and performance gains are significant in a short time because the influence of the best performing schools is effectively spread around the system.

A more effective and longer term sustainable strategy for school improvement and developments in teaching quality and leadership capacity requires these kinds of collaboration within and between schools, and it is a key role for the local authority to support and facilitate this way of working.

These ambitious improvements in children and young people's educational outcomes and employability, and in the quality of Kent schools, early years providers and post 16 learning and skills providers, are supported by detailed service plans with year on year milestones and performance measures.

Delivery plans will be set out in the 14-24 Strategy, the Early Years and Kent Challenge School Improvement plans, the Education Commissioning Plan, the development plan for the Kent Association of Headteachers, the business plan for Edukent, the SEN strategy and the improvement plan for the PRUs.

| Classification: | Unrestricted |
| Summary: | This report informs the Education Cabinet Committee of the <br> consultation on the draft Commissioning Plan for Education <br> Provision. |
| Recommendations | Members of the Committee are asked to note the results of the <br> planned consultation will be brought back to this Committee for its <br> further consideration in July 2012 |

## 1. Introduction

1. (1) One of the key strategic roles of the Local Authority is to ensure there are sufficient education places of high quality available to the children and young people of Kent. This responsibility is intertwined with our other strategic duties; to promote high standards in schools, and to be the champion of children, families and their communities.
(2) The Local Authority has recently published its draft Commissioning Plan for Education Provision. This sets out how Kent will discharge its responsibility as the Strategic Commissioner of education provision. It reflects the fact that our role has changed to being the commissioner, as well as continuing to be a provider, of school places. It sets out the principles by which we will have regard when determining proposals, the forecast need for provision, and the commissioning needs which arise as a consequence.

## 2. Consultation

2. (1) The consultation period runs for eight weeks - from 24 April 2012 to 19 June 2012. During this period there will be a series of meetings across the County to which the Headteacher and a governor from each school have been invited. County Councillors will be invited to these meetings, or they may request that a Member Briefing be set up in their area. There will also be consultation with Districy Locality Boards and with District Council Chief Executives and their staff about school planning needs for the future as set out in the draft Plan.
(2) A list of Consultees is attached at Appendix 1 and a timetable is set out below.
(3) Feedback from this consultation will help to inform the final version of the Commissioning Plan. We hope that the final plan will inform all education providers and sponsors of the commissioning needs and timescales for new provision, to enable them to come forward with proposals.

## 3. Next Steps

3. (1) Delivery of the plan will support Kent's ambition to ensure there is a modest supply of surplus primary and secondary school places (at least 5\%), to increase the percentage of parents securing their preferred school(s) ( $85 \%$ to secure their first preference, $95 \%$ securing their first or second preference), to improve the quality of schools (our aim by 2015 is that at least $85 \%$ of primary and secondary schools, and all special schools, will be judged as good or better), and to further develop in-County special education provision so as to reduce (by at least 10\%) the number of out-County independent and non-state maintained special school places commissioned for Kent pupils.
(2) Further work will be undertaken in relation to the school organisation and commissioning of specialist provision for children who have Statements of Special Educational Needs. This work is part of the SEN Strategy which the Authority is currently undertaking.
(3) To view the draft Plan and submit comments by 19 June 2012, please follow the link: www.kent.gov.uk/EducationProvision.

## 4. Timeline

| Public Consultation Period | 24 Apr 2012 to 19 Jun 2012 |
| :--- | :--- |
| Headteacher Meetings | 1 May 2012 to 23 May 2012 |
| Report to Education Committee | 9 May 2012 |
| Report to Education Committee on outcome of <br> Consultation | 10 Jul 2012 |
| Report to Cabinet for approval of Plan | 17 Sep 2012 |

* The plan will be reviewed every 6 months

## 5. Recommendations

Members of the Committee are asked to comment on the draft plan and note that the results of the consultation on the plan will be brought back to this Committee for its further consideration in July 2012

\section*{Foreword}

The role of local authorities within the education sector has been redefined by a combination of legislation and reduced financial resources. Local authorities retain significant core responsibilities as strategic commissioners of education provision, agents for school improvement and champions of children and their communities.

These three responsibilities are intertwined. A strategic commissioner's role is not simply to ensure there is always sufficient, suitable education provision, in the right place for all of its children and young people; we must also support and raise educational standards and never lose sight of the goal to improve outcomes for children and young people, by ensuring they can attend a good or outstanding school.

New provision opens opportunities to make schools better environments in which to learn. Expansion of popular and successful schools makes these accessible to more pupils. Places should be removed where it is necessary to protect standards and the quality of education. An element of surplus capacity ensures parents are able to exercise choice, whilst balancing this with the need to achieve an efficient and effective education system.

The County Council's goals by 2015 are to ensure:
- There will be more good schools, with at least \(85 \%\) of primary and secondary schools judged as good or outstanding. All special schools will be good or outstanding
- At least \(85 \%\) of families secure school places at their first preference school, and \(95 \%\) secure either their first or second preference
- We maintain at least \(5 \%\) surplus capacity in the primary school sector in each District of Kent
- We maintain at least \(5 \%\) surplus capacity in the secondary school sector in each travel to learn area of Kent
- We make appropriate provision for children with special educational needs so as to reduce by \(10 \%\) the number who need to attend independent and out of county provision away from their local community

The context within which the Local Authority fulfils its roles is changing. The Local Authority is increasingly operating in a more pluralistic and diverse educational environment where decisions about school size and capacity are taken following dialogue and negotiation with a number of providers in the light of local demand. Many schools now have the power to make their own decisions about expansion and there are new providers coming into the market. Nevertheless the Local Authority remains the strategic commissioner of education provision. It has a statutory responsibility to monitor the supply and demand for places and for ensuring that there is sufficient capacity to meet demand.

This Commissioning Plan for Education Provision sets out how we will continue to fulfil our role as strategic commissioner of education provision across all types and phases of education.

\author{
County Councillor Mike Whiting \\ Cabinet Member for Education
}

\section*{1. Introduction}
1.1 This Commissioning Plan for new educational provision in Kent is key to achieving our aim to be the most forward looking area in England for education and learning and one of the best places for children and young people to grow up, learn, develop and achieve.
1.2 Good and outstanding schools are the basis of strong communities and a strong local economy. All parents want their children to go to a good school and they want a choice of schools. And all children and young people should be able to achieve well at school, from the earliest years through primary and secondary education, no matter what their background. The goal of the education system is for all young people to have had the best opportunities and to have gained the right qualifications for rewarding employment and independence as they become young adults. Securing good quality school places in every community is essential for every young person to have the best start in life.
1.3 In Kent we are seeing a significant increase in pupil numbers and consequently a need for new provision. The number of primary-aged pupils is expected to rise significantly from 116,600 in 2011 , to 127,300 in 2016 . Beyond this point numbers remain comparatively level, although increases in some Districts are off-set by reductions in others. This indicates there will be a need to continue to make new provision available in some Districts on a permanent basis.
1.4 The secondary-aged population, while reducing between now and 2015 will rise through the latter part of this decade, and fall again in the first half of the 2020s. The number of Year 7- Year 11 pupils in Kent secondary schools is 80,372 in 2011-12, which will fall to 77,600 in 2015 and is forecast to rise to a peak of around 83,200 in 2021. The falling numbers to 2015 mask significant growth in some districts that run counter to the overall trend, so that additional forms of entry in Year 7 in some areas will still be needed.
1.5 This Commissioning Plan, therefore, identifies the need for permanent new school provision as follows: 14.5 forms of entry in primary provision and 1 form of entry in secondary provision across Kent by 2013. By 2016 we will need 22 additional forms of entry in primary schools and 14 forms of entry in Year 7 in secondary schools because of growth in some areas, for example in Ashford, Sittingbourne, Tonbridge and Malling and Gravesham. This is roughly equivalent to 18 new primary schools and 2 new secondary schools, although much of it will be achieved by expanding existing schools. Beyond this period we are forecasting a need for 48 new forms of entry in primary schools and 26 new forms of entry in secondary schools. While in many cases these needs are dependent upon housing development, the increase in demand for education places is significant.
1.6 By clearly setting out the Local Authority's future commissioning plans we hope parents and providers will be in a better position to make proposals and suggestions regarding how these needs can be met. We recognise that new providers will be entering the market, and that parents and communities are able to make free school applications. The Local Authority also recognises that popular schools may wish to expand, or be under pressure from the local community to do so. We support this greater diversity in the range of education provision available to our children and young people. As the Strategic Commissioner of Education Provision, we welcome proposals from existing schools and new providers that address the needs identified
in this Plan, for new provision to meet increased demand and to improve the quality of education.
1.7 In the coming weeks there will be wide consultation on the Plan and many opportunities to meet with schools and other stakeholders to agree the ways forward. I look forward to receiving your views.

Patrick Leeson
Corporate Director
Education, Learning and Skills

\section*{2. Executive Summary}
2.1 Purpose - Kent County Council (The Local Authority) is the Strategic Commissioner of Education Provision in the County. This Commissioning Plan sets out how we will carry out our responsibility for ensuring there are sufficient places of high quality for all learners, while at the same time fulfilling our other responsibilities to raise education standards, and be the champion of children and their families in securing good quality education. The Plan also supports the delivery of the Local Authority's Medium Term Plan, "Bold Steps for Kent", and its "Vision for Kent 2011-21". The purpose of the Commissioning Plan is to be transparent about the future need for education provision in Kent, in order to enable parents and education providers to put forward proposals as to how these needs might best be met.
2.2 Statutory Duties - This Plan seeks to provide the framework within which we discharge the commissioning of future education provision. The Local Authority has duties to ensure:
- there are sufficient places for 3 and 4 year old children to be able to access their free early years entitlement ( 15 hours per week for 38 weeks a year); from September 2013, this duty will extend to providing free places to disadvantaged 2 year olds;
- all Kent residents of statutory school age (5 to 16 years old) have school places, if their families wish to take these up;
- it provides full-time education to children who are not in school for reasons of illness, exclusion or otherwise;
- that from September 2013 all 16/17 year olds are in full time education or employment with training; and from September 2015 all young people are in such provision up to their \(18^{\text {th }}\) birthday;
- that children and young people are assessed, and statements of Special Educational Need (SEN) issued, where appropriate; this may require placement in special education provision in order to meet the child's needs. These responsibilities may extend to young people up to the age of 24 ;
- that it considers parental representations about the exercise of its functions in relation to the provision of primary and secondary school education.

\subsection*{2.3 Delivering Bold Steps - Vision for Education, Learning and Skills}
"Our aim is to be the most forward looking area in England for education and learning so that we are the best place for children and young people to grow up, learn, develop and achieve. We want Kent to be a place where families thrive and all children are learning and developing well from the earliest years so that they are ready for school, have excellent foundations for learning and are equipped for success in life, no matter what their background. We want every child to go to a good or outstanding school. We have the same expectations for every child and young person to make good progress in their learning, to achieve well at school and to have the best opportunities for an independent economic and social life as they become young adults."
2.4 In support of achieving this vision, by 2015 the Local Authority is planning to maintain a modest surplus of primary and secondary school places (at least \(5 \%\) ); to increase the percentage of parents securing their preferred school(s) ( \(85 \%\) secure their first preference, \(95 \%\) secure either their first or second preference); to improve the quality of schools (at least \(85 \%\) of primary and secondary schools, and all special schools, will be judged as good or better); and to further develop in-County special education provision so as to reduce (by 10\%) the number of out-County independent and nonstate maintained special school places commissioned for Kent pupils.
2.5 Principles and Guidelines - It is important that the Local Authority is open about the principles and planning guidelines it will adhere to when making commissioning decisions or assessing the relative merits of any proposals it might receive. This Commissioning Plan sets these out.
2.6 Forecasting Future Education Provision Needs - The Local Authority uses data on births and pre-school population figures from the Health Authority to inform the forecasting of pre-school and primary school pupil rolls. Secondary school and post16 education needs are calculated from primary school rolls. Migration and housing factors are taken into account. The methodology for forecasting the future needs for special education provision is being developed, alongside the Local Authority's SEN review, and will be incorporated into the next edition of this plan. Over the last five years, forecasting for primary and secondary pupils at County level has generally been accurate to within plus or minus \(1 \%\). As would be expected, local forecasting has a greater variance.
2.7 The increasing birth rate in Kent mirrors that of England and Wales. Since 2002, the birth rate has risen from 56 births per 1000 women aged 15-44 years, to a little over 65 in 2010. The birth rates and trends in individual Districts in Kent vary. Long term primary-aged population forecasts indicate primary school rolls will peak around the year 2016. Beyond this date, the growth in some Districts, such as Ashford and Dartford, offset the reducing population in other Districts. This data is used to ensure short and medium term planning decisions make sense in the long term context, with temporary and permanent accommodation solutions being used to meet changing demand.
2.8 The increasing Reception Year rolls are expected to plateau in 2012/13, although a spike is expected in 2015/16. The total roll of primary schools will increase throughout the forecast period up to 2016/17. Secondary school rolls will continue to fall, until 2016/17 when the Year 7 intake numbers begin to exceed the outgoing Year 11 cohorts. Year 7 rolls will begin to reduce again from 2020 , and thus secondary school rolls will fall shortly after this time.
2.9 Kent's Forward Plan - Detailed analysis, at District level, of the future need for primary and secondary school places is contained in this Plan. This clearly sets out what provision needs to be commissioned, where, and when. We need permanent accommodation as follows: 14.5 forms of entry (FE) primary provision and 1FE of secondary across Kent by 2013; 22FE primary, 14FE secondary by 2016; and 48FE primary and 26FE secondary beyond this period. Temporary enlargements (bulge year groups) will also be required. It is recognised that in many cases these needs are dependent upon housing development, and thus the timing may need to be adjusted. However, by clearly setting out the Local Authority's future commissioning plans, it is hoped parents and providers will be in a better position to make proposals and suggestions regarding how these needs are met. The identified needs have been costed to enable the Local Authority's future capital programmes to be established.
2.10 Funding for School Places - The Local Authority has a key role in securing funding to provide sufficient numbers of pupil places. The cost of additional school places is currently met from basic need grant from the government, supported borrowing and S106 developer contributions. Other funding options include the Academies and Free Schools programmes. There is a current government funding review for school building which will impact on education provision planning and may result in changes to the existing developer contribution mechanism.
2.11 Special Educational Needs - The Local Authority is currently developing a new strategy for SEN. Future decisions on SEN provision as well as capacity issues will be considered within the context of the need to consider cost effectiveness and value for money. This Plan provides details of the Special Schools and Units within mainstream schools in Kent, but at this stage does not forecast future needs. This will form part of the next edition of the Plan.
2.12 Early Years Education - In Kent, there is currently sufficient childcare provision for children aged 3-4 years. However, the position changes on a regular basis, as providers join and leave the market. The need for new provision relating to the extension of the entitlement to free provision for some 2 year olds has been calculated at a District level. The Government has set Kent a target of establishing 3300 places by September 2013 and 6600 places by September 2014. The Local Authority will work with providers to ensure this demand is met.
2.13 Post-16 Education in Kent - The Plan recognises the need to ensure that education or employment with training pathways are available to young people in line with the legislative changes for raising the participation age for young people to age 18.

\section*{3. The Kent Context}

\subsection*{3.1 Bold Steps for Kent \({ }^{1}\)}

Our plans for improvement are set out in Bold Steps for Kent, the local authority's medium-term plan for the next four years, which was approved by the County Council on 16 December 2010.
3.2 There are three clear aims that run throughout Bold Steps for Kent:
- To help the Kent economy grow.
- To put the citizen in control.
- To tackle disadvantage.
3.3 In discharging our role as strategic commissioner of education provision we will seek to positively support delivery of these aims.
3.4 Vision for Kent 2011-2021:

\section*{A county of differences}
- Kent is a collection of diverse small towns - there is no big city.
- Kent's diversity is clear to see when we look at the difference between the richest and poorest areas in the county. For example, in Tunbridge Wells, only 4\% of the population is amongst the poorest \(20 \%\), while in Thanet it is \(42 \%\). Pockets of deprivation are found across Kent.
- Numbers of children achieving the expected level in English and Maths when they leave primary school varies by 20\% between the best and worst performing areas, and children from low-income families, those with special educational needs and looked after children do less well than children who are not in these circumstances \({ }^{2}\).

\subsection*{3.5 A Place of Change}

Over 100,000 new dwellings are currently planned in Kent by 2026, with the particular focus on the County's two major growth areas in The Thames Gateway and Ashford, where there are pressing demographic challenges in the future. This demand for housing (53,000 in The Thames Gateway and 25,000 in Ashford) places pressure on all services and public infrastructure - and shapes the school organisation challenges that we face in the future.

\({ }^{2}\) For more information on children and young people in Kent, see Kent's Children and Young People's Strategic Planning Framework 2011-2014.
}

\subsection*{3.6 A Place of Diversity and Choice}

Over 240,000 students are educated in Kent schools. There are 765 private and voluntary early years providers and accredited childminders, 33 infant schools, 33 junior schools, 450 primary schools, 99 secondary schools \({ }^{3}\), 24 special schools and 18 pupil referral units.
3.7 The County has a diversity of provision with 247 community schools, 67 academies, 37 foundation schools including a number of trusts and 198 Voluntary-Aided / Voluntary-Controlled schools belonging to Canterbury and Rochester Church of England dioceses and the Roman Catholic Archdiocese of Southwark, plus Methodist provision. There are 31 single-sex secondary schools, 66 non-selective (high and comprehensive) secondary schools and 33 grammar schools in Kent. Appendix 2 gives a short description of the different types of schools in Kent and Appendix 3 gives a detailed breakdown of school types and category.
3.8 Kent has a long history of working with private and voluntary education providers in the pre-school and school sector. The growth in government funded academies is adding to this, and there are academy chains, such as The Kemnal Trust, Woodards Academies Trust, and the Academies Enterprise Trust sponsoring a small number of schools in the County.
3.9 There is a wide variety of providers of schools each bringing their own ethos and ideas to the system. This provides parents with choice and helps all schools continue to improve as each learn from the successes of others.
3.10 We aim to support and work with the family of schools in Kent, to ensure all children and young people in Kent get the very best education opportunities and achieve well.

\footnotetext{
3 The Primary and Secondary sections of the Folkestone Academy are included within these figures.
}

\section*{4. The Role of the Local Authority in Commissioning Education Provision}
4.1 In the national policy context the local authority is the commissioner of provision. The role of the local authority is set within a legal framework of statutory duties which are identified below.

\section*{Statutory Duties}
4.2 Education in Kent can be divided into three age-determined phases (although there is some overlap between these). The three main phases are:
- Early Years, primarily delivered by private, voluntary and independent pre-school providers and accredited childminders, 68 schools with a maintained nursery provision and one maintained nursery school;
- 4-16, "compulsory school age" during which schools are the main providers;
- Post 16, colleges and schools both offer substantial provision, with colleges as the sole provider for young people aged 19-25.
4.3 The local authority also has specific duties in relation to pupils who have special educational needs.

\section*{Duties to provide for Under 5s}
4.4 Section 6 of the 2006 Childcare Act gives local authorities a duty to secure the provision of early education and childcare to meet the requirements of parents in their area who require childcare in order to enable them to:
(a) take up, or remain in, work, or
(b) undertake education or training which could reasonably be expected to assist them to obtain work.
4.5 Section 7 of the 2006 Childcare Act places a duty on local authorities to ensure that all parents of three and four year olds are able to access the minimum free entitlement ( 15 hours per week for 38 weeks a year) for up to two years before their child reaches compulsory school age. Local authorities must ensure that sufficient early education and childcare is available which offers the early years free entitlement, including sufficient 'stand-alone' places for parents who want to take up only the free entitlement as well as sufficient accessible places for low income families.
4.6 Section 11 of the 2006 Childcare Act places a duty on local authorities to undertake a childcare sufficiency assessment \({ }^{4}\) including an annual action plan.
4.7 Kent has participated in a successful pilot project since 2009 delivering 430 places of 12 hours per week funded Early Education provision to eligible 2 year olds. The focus is on low income families and Kent will increase this offer to 500 places in 2012-13.

\footnotetext{
\({ }^{4}\) The 2011 full report, can be found on the KCC website at: http://www.kent.gov.uk/education-and-learning/childcare-and-nursery-education/cmnaconsultation.htm
}
4.8 The Government's consultation on 'Proposed changes to the Entitlement to Free Early Education and Childcare Sufficiency' concluded in February 2012 with guidelines on statutory duties for local authorities expected in April 2012. The Government intends to introduce the duty of 570 hours of free early education, equivalent to 15 hours a week over 38 weeks, for the most disadvantaged two year olds from September 2013.

\section*{Duties to provide for ages 4-16}
4.9 The law requires local authorities to make provision for the education of children from the first term they begin statutory education as a five year old to the end of the academic year in which their sixteenth birthday falls either at school or otherwise. Kent has a rising 5's policy, which means it admits 4 year old children to Reception classes in primary schools. Most Kent parents choose to send their children to Kent schools. Some parents will choose to educate their children independently, either at independent schools or otherwise than at school (ie at home); others will send their children to maintained schools outside Kent (as Kent maintained schools admit some children from other areas). Kent will offer a school place to any resident between 4 and 16 years old.
4.10 From age 14 to 16 a minority of young people are offered college placements or alternative curriculum provision, usually through school links. Some children are educated in special schools or non-school forms of special education because of their special educational needs.
4.11 The local authority has a statutory duty to provide full time education for pupils "not in education by reason of illness, exclusion or otherwise" (section 19 of the 1996 Education Act) and which is appropriate to individual pupil needs. This duty is discharged through Pupil Referral Units.

\section*{Duties to provide for Post 16 Students}
4.12 As a result of the Apprenticeships, Skills, Children and Learning Act 2009, local authorities are lead strategic commissioners of 16-19 education and training. This means we have a new duty to ensure that sufficient suitable education and training opportunities are accessible to all young people in the county aged 16-19 and those aged 19-24 who have a learning difficulty. \({ }^{5}\)
4.13 The Education and Skills Act 2008 places a duty on all young people to participate in education or training until their \(18^{\text {th }}\) birthday.
- From 1 September 2013, young people will be required to continue in education or training until the end of the academic year in which they turn 17. From 1 September 2015, they will be required to continue until their 18th birthday.
- This does not necessarily mean staying in school. Young people will be able to choose how they participate post-16, which could be through full-time education, such as school, college or otherwise; an Apprenticeship; part-time education or training if they are employed, self employed; or volunteering for 20 hours or more a week.
4.14 As a result of the duty on all young people to participate in education or training until their \(18^{\text {th }}\) birthday there are new duties for the local authority to:

\footnotetext{
\({ }^{5}\) Details of Kent's 14-19 policy are contained in the 14-19 Plan 2010-2015 and a needs analysis outlining our commissioning priorities can be found on the public website.
}
- Promote the effective participation in education or training of all 16 and 17 year olds resident in their area; and
- Make arrangements to identify young people resident in their area who are not participating and ensure they are supported to access appropriate provision.
4.15 These new duties complement the existing duties to:
- Secure sufficient suitable education and training provision for all 16-19 year olds
- Encourage, enable and assist young people to participate,
- Have processes in place to deliver the 'September Guarantee' of a place for all 16 and 17 year olds.
- Track young people's participation. Local authorities will be supported by duties on learning providers to notify them when a young person leaves learning.

\section*{Duties to provide for Special Educational Needs and Disabilities}
4.16 The Education Act 1996 and the Special Educational Needs (SEN) and Disability Act 2001 place duties on the local authority to ensure that, where necessary, the special educational needs of children and young people in schools (including academies) and pre-school settings are assessed and Statements of SEN issued where appropriate. There is a further duty on the local authority to arrange the provision for children with Statements and to keep their Statements annually under review, up to 19 years of age. The SEN Code of Practice 2001 provides recommended guidance on how the legal duties should be discharged. The SEN and Disability Act 2001 places a duty on both schools and the local authority to take measures to ensure that children and young people with disabilities are not unfairly discriminated against. There are also two key Acts relating to disability discrimination, namely the Disability Discrimination Acts of 1995 and 2005, which apply to both the local authority and all schools/settings. These pieces of legislation provide a definition of disability and of discriminatory behaviour, setting out clear expectations of all responsible bodies. All these pieces of legislation have clear implications for how the authority commissions its provision for children and young people with SEN and disabilities.
4.17 At the time of writing this Plan, there has a Green Paper on SEN and disabilities out for consultation and we await the Government's response to the consultation.

\section*{Duty to Respond to Parental Representations}
4.18 Section 14A of the Education Act 1996 placed a duty on local authorities to consider parental representations about the exercise of their functions in relation to the provision of primary and secondary education. The Education and Inspections Act 2006 placed a duty on local authorities to promote diversity and increase parental choice in planning and securing the provision of school places. Representation may include concerns about the quality and quantity of provision available, or about a broader choice of provision, for example, access to a Church School education.

\section*{The National Context}
4.19 The Academies Act 2010 enabled more schools to become academies, and the Education Act 2011 has increased the powers of the Secretary of State to intervene in poorly performing schools, and require these to become academies. The 2011 Act creates a presumption that all new schools will be academies or free schools.

\section*{Expansion of Successful and Popular Schools}
4.20 We are committed to ensuring that every parent can choose a good or outstanding school for their child. Therefore, there is a strong presumption in this Plan that successful and popular schools will be supported to expand. No single definition of a successful and popular school exists, but the school's results, its added value, its rate of improvement and its popularity with parents are factors to be considered. The existence of surplus capacity in neighbouring less popular schools should not in itself be sufficient to prevent this expansion, but compelling objective evidence that expansion would have a damaging effect on standards overall in an area may be a reason to limit such expansion in some exceptional cases.

\section*{Federations and Statutory Collaborations}
4.21 The Education Act 2002 (sections 24 and 25) provide for schools to join together in a (hard) federation under the governance of a single governing body. Regulations enable two or more governing bodies to enter in to a statutory collaboration (known as a soft federation) through which they may jointly discharge their responsibilities. Both models can be used to help raise standards in schools and to improve value for money. Where these arrangements are demonstrably improving standards and providing value for money, we would want to support expansion where it is needed in the local area.

\section*{5. What are we Seeking to Achieve?}

\subsection*{5.1 Delivering Bold Steps - Vision for Education, Learning and Skills}
"Our aim is to be the most forward looking area in England for education and learning so that we are the best place for children and young people to grow up, learn, develop and achieve. We want Kent to be a place where families thrive and all children are learning and developing well from the earliest years so that they are ready for school, have excellent foundations for learning and are equipped for success in life, no matter what their background. We want every child to go to a good or outstanding school. We have the same expectations for every child and young person to make good progress in their learning, to achieve well and to have the best opportunities for an independent economic and social life as they become young adults."
5.2 School organisation and decisions about school organisation can have a significant impact on securing this vision. Our decisions and planning will seek to support delivery of the following related objectives: By 2015 -
- "There will be more good schools, with at least \(85 \%\) of primary and secondary schools judged as good or outstanding. All special schools will be good or outstanding." (Delivering Bold Steps)
- "We will help parents to access a preferred school place for their child by increasing...the number of parents who get their first preference of school to \(85 \%\). First and second preferences combined will improve to \(95 \%\)." (Delivering Bold Steps)
- "We will maintain at least \(5 \%\) surplus capacity in school places and ensure we keep pace with demand for school places in each District by providing places of good quality that parents want for their children" (Delivering Bold Steps)
- "We will reduce the number of independent and out of County special school placements by \(10 \%\) to ensure the needs of Kent Children are met in their locality by developing our SEN strategy to provide more local and cost effective provision." (Delivering Bold Steps)
5.3 It is important to balance the need for school places and meeting parental preference with the efficient delivery of high quality education services. This requires a modest surplus of school places in any given locality. Too much surplus capacity is financially wasteful, and can impact negatively on school standards. The current guidance provided by the Audit Commission suggests that local authorities should aim to have no more than \(10 \%\) surplus capacity overall, and recommends that local authorities develop their own notional 'target' figure. Audit Commission guidance suggests that local authorities should consider removing excessive surplus capacity in order to secure Value for Money.
5.4 The local authority will seek to maintain least \(5 \%\) surplus capacity in school places and ensure we keep pace with demand for school places in each District by providing places of good quality that parents want for their children. We will take action to reduce surplus capacity where this exceeds \(10 \%\), and will seek to exert a downward pressure on levels of surplus capacity where these are forecast to remain significantly above 5\% throughout the forecast period.
5.5 It should be noted that overall figures of surplus capacity aggregated at District level can mask localised pressures or a deficit of places in individual year groups. For example it is possible to have surplus capacity but not enough Reception Year places. The level of surplus capacity across any given locality can therefore only be a guide to the actual availability of spaces, and it may be necessary to increase capacity in one area of a District, while simultaneously reducing capacity elsewhere in the District.
5.6 It is also important to recognise that the local authority cannot achieve these ambitions without working in partnership with schools and other partners. The increasingly pluralistic environment in which decisions about school sizes and locations are now taken means that the local authority has to commission school places in an open and transparent fashion, and work closely with all education providers, to secure the best for Kent's children and young people.
5.7 The local authority holds similar ambitions for the Early Years and post-16 age groups. We will continue to work with Early Years providers to respond positively to the ever changing needs of families to ensure high quality provision is available to give children the best start in life and support families' working commitments. We are committed to delivering the Government's drive to extend free entitlement to two year olds from disadvantaged backgrounds, and we will work closely with providers to make this happen. Similarly we will work with schools, colleges, employers and training organisations to ensure appropriate pathways and provision are in place for the young people aged 16-19 in Kent.

\section*{6. Principles and Guidelines}
6.1 It is important that the local authority is open and transparent in its role as the Strategic Commissioner of Education Provision in Kent. To help guide us in this role we will abide by a series of principles, and consider school organisation against our planning guidelines.

\subsection*{6.2 These are our over-arching principles:}
- Commissioning decisions will be guided by the aspiration that any education provision in Kent should be rated "good" or better.
- All maintained schools will be able to function as high-quality, viable and financially efficient provisions.
- Every child has access to a local high quality school place appropriate to their needs
- The needs of Looked After Children and those with SEN will be given priority in any commissioning decision.
- Any educational provision facing challenges in difficult times will be supported and challenged to recover in an efficient and timely manner, but where sufficient progress is not so achieved we will seek to commission alternative provision / provider.
- If a provision is considered or found to be inadequate we will seek to commission alternative provision where we and the community believe this to be the quickest route to provide high quality provision.
- We will aim to meet the needs and aspirations of the local community.
- We will always put the needs of the learners first.
- We will promote parental preference.
- We will give priority to organisational changes within schools that create environments better able to meet the needs of vulnerable children, including those who have SEN and disabilities, come from minority communities and / or are from low income families.
- In areas of high housing growth we will actively seek developer contributions to fund or part fund new / additional provision.
- We will aim to ensure school organisation changes promote greater diversity of provision in a locality.
- We will ensure we make the most efficient use of resources.

\subsection*{6.3 Planning Guidelines - Primary:}
- The curriculum is generally delivered in key stage specific classes. Therefore, for curriculum viability schools should be able to operate at least 4 classes.
- Where possible, planned Published Admission Numbers (PANs) will be multiples of 30 (where this is not possible, multiples of 15 will be preferred).
- We believe all through primary schools deliver better continuity of learning as the model for primary phase education in Kent. When the opportunity arises we will consider the possibility of either amalgamation of separate infant and junior schools into a single primary school or federation of the schools. However, we will have regard to existing local arrangements and seek to avoid leaving existing schools without links on which they have previously depended.
- All present primary school provision is co-educational, and we anticipate that future arrangements will conform to this pattern.
- 2 fe provision (420 places) is preferred in terms of efficient deployment of resources.

\subsection*{6.4 Planning Guidelines - Secondary:}
- All schools must be able to offer a broad and balanced curriculum and progression pathways for 14-19 year olds either alone or via robust partnership arrangements.
- PANs for secondary schools will not normally be less than 120 or greater than 360. PANs for secondary schools will normally be multiples of 30 .
- The optimum size for the efficient deployment of resources is 8fe.
- All but one of our maintained secondary schools admit pupils at age 11. Any new secondary provision would be expected to follow this model, except where it is proposed to be all-aged (primary and secondary).
- Proposals for additional secondary places will need to demonstrate a proper balance between selective and non selective school places.

\subsection*{6.5 Planning Guidelines - Special Educational Needs:}
- We will aim, over time, to build capacity in mainstream settings, by broadening the skills and special arrangements that can be made within this sector to ensure compliance with the relevant duties under SEN and disability legislation.
- For children and young people where mainstream provision is not appropriate, we will seek to make appropriate provision through Kent special schools. For young people aged 16 - 19 provision may be at school or college and for young people aged \(19-25\) provision is likely to be college based.
- We recognise the need for children and young people to live within their local community where possible and will seek, therefore, to place them in day places unless residential provision is needed for care or health reasons. In such cases agreement to joint placement and support will be sought from the relevant teams within KCC or the Health Service.

\subsection*{6.6 Planning Guidelines - Expansion of Popular Schools and New Provision}
- The local authority supports diversity in the range of education provision available to our children and young people. We recognise that new providers will be entering the market, and that parents and communities are able to make free school applications.
- The local authority also recognises that popular schools may wish to expand, or be under pressure from the local community to do so.
- As the Strategic Commissioner of Education Provision, the local authority welcomes proposals from existing schools and new providers that address the needs identified in this Plan which include new provision to meet increased demand, and new provision to address concerns about quality.
- In order for the local authority to support any such proposal, they must adhere to the planning principles and guidelines set out above, and meet an identified need.

\section*{7. Capital Funding}
7.1 The Local Authority as Strategic Commissioner of Education Provision has a key role in securing funding to provide sufficient education provision in the County, particularly in schools.
7.2 Appendix 4 provides details of additional school place provision provided since September 2006. It also sets out school organisation changes which have been implemented to remove surplus capacity in areas of over supply, to replace underperforming schools with new provision and to amalgamate separate provision, for example infant and junior schools.
7.3 The cost of providing additional school places is met from government basic need grant and/or supported borrowing and S106 developer contribution monies. Kent has benefitted from significant Government grant under the Building Schools for the Future programme (to invest in improving its secondary school estate) and the academies programme.
7.4 At the time of writing the Government is currently reviewing the arrangements for the allocation of Government funding for school building. Pending any changes resulting from the review the Government is confirming funding support on a year by year basis. The 2012-13 allocations were confirmed in December 2011. This creates difficulty in planning investment programmes extending beyond the financial year.
7.5 Whilst the review is still in progress it is clear that priority, as was previously the case, will continue to be given to the need for new pupil place provision. Government funding will be allocated on a formulaic basis assessed from information provided by local authorities about forecast numbers of pupils and school capacity. Such funding will only provide for predicted growth in numbers arising from changes in the birth rate and from inward net migration.
7.6 For new pupil places required because of new housing development it is necessary to look to other funding, specifically developer contribution monies.
7.7 In the past developer contribution funding has been secured through the negotiation of S106 agreements. Whilst S106 remains for meeting specific requirements of individual developments the arrangement is to be supplemented by the Community Infrastructure Levy (CIL). CIL is a local tariff on all development to provide new service capacity to support development.
7.8 Account will be taken of existing capacity prior to seeking contributions from either S106 or CIL.
7.9 The draft Medium Term Plan (MTP) \({ }^{6} 2012 / 13\) to \(2014 / 15\) provides for a future basic need programme totalling \(£ 31.987 \mathrm{~m}\). The Government has only confirmed the 201213 grant allocation and the MTP figure includes estimates for expected allocations for \(2013 / 14\) and \(2014 / 15\). The total figure includes a one off allocation of \(£ 4.443 m\) allocated to the County Council from an additional \(£ 500 \mathrm{~m}\) made available nationally in November 2011 and targeted at those authorities identified as having the greatest need in managing shortfalls in pupil place provision. Projects to be included within the future basic need programme are yet to be indentified. The MTP also identifies

\footnotetext{
\({ }^{6}\) The draft Education, Learning \& Skills Capital Investment Plans 2012/13 to 2014/15 are attached at Appendix 5.
}
projects in areas of development to be undertaken within both the life term of the Plan as well as later years.
7.10 Availability of capital and planning permission: Statutory proposals to alter school provision cannot be published without the necessary capital funding being identified and secured. Planning permission is required where there are proposals to increase the footprint of a building and in certain other circumstances. Where planning permission is required, school organisation proposals may be approved subject to planning consent being obtained.
7.11 Existing Premises and Sites: In drawing up options and proposals around reshaping provision and/or providing additional places, the local authority will conduct an option appraisal on existing premises and sites to inform feasibility. The issues to be considered will include:
- the condition and suitability of existing premises
- the ability to expand or alter the premises, including arrangements whilst works are in process
- the works required to expand or alter the premises and the estimated associated capital costs
- the size and topography of the site
- road access to the site, including safety issues
7.12 Value for Money: New school build decisions will be based on the long term sustainability of school rolls. Modular accommodation will be used to meet short term pressure on school places. Modular classrooms are also now used to meet urgent need for additional pupil places rather than mobile classrooms. Given the quality, longevity and flexibility of such provision consideration will also be given to its use for longer term solutions.
7.13 The challenge in providing additional primary places: The planning window for additional primary places is short and births information and planning applications are constantly monitored in order to plan ahead effectively. This will often mean that schools that are commissioned to provide additional places will have a temporary expansion followed by a permanent expansion once statutory consultation has been completed.
7.14 Early Years - The local authority does not have access to capital funding to support the creation of Early Years places, or the modernisation of buildings. However, it does seek S106 contributions towards early education provision whenever possible. Generally this is linked to the provision of new schools.
7.15 Post-16 - The Young People's Learning Agency (YPLA) is responsible for managing the government's 16-19 Demographic Growth (Basic Needs) fund (DGCF). This fund is intended to support the creation of accommodation for new learners aged 16-19. This demand may arise from either population growth or the increase in participation by young people who are not in education, employment or training (NEET). In particular the YPLA wants to identify new learners with learning difficulties and/or disabilities who require provision. At the time of writing, guidance on accessing this funding in 2012/13 was not available.

\section*{8. School Pupil Forecasting Methodology}
8.1 To inform the process of forecasting primary school pupil numbers, KCC receives information from local health authorities to track the number of births and location of pre-school age children. The pre-school age population is forecast into primary school rolls through trend-based analysis of preference patterns in each planning area. Secondary school forecasts are calculated by projecting forward the Year 6 cohort of feeder primary schools, at the trend based intake ratio. If the size of the Year 6 cohort is forecast to rise, the projected Year 7 cohort size at secondary school will be forecast to rise.
8.2 It is recognised that past trends are not always an indication of the future. However, for the secondary phase, where parental preference is arguably more constant than in the primary phase and large numbers of pupils are drawn from a wide area, with migration patterns more firmly established, forecasts have been found to be fairly accurate.
8.3 Pupil forecasts are compared with current Published Admissions Number capacity levels, to give the projected surplus or deficit of places in each area. It is important to note that where a deficit is identified within the next few years, and where that deficit is 'real', work will already be underway to address the situation.
8.4 An adjustment is made for pupil product from new housing developments. Projected new housing is based on information received from Districts, including through the annual Housing Information Audit (HIA) assessments. The HIA gives local level detail of housing allocations, and planning permissions that have yet to be started, or are in progress. The HIA, together with housing information from Districts' Local Development Framework (LDF) Core Strategies is the most accurate reflection of short, medium and long term building projects at the local level.
8.5 Pupil product ratios used per new dwelling are informed by the 2005 MORI survey (for 'new housing' pupil product) and Census 2001 data (for 'stock housing' pupil product). KCC has developed a system that models the expected number of pupils once a new dwelling becomes occupied, and then how this changes over time as the dwelling 'matures'. Different pupil product ratios are now used for different dwelling types, when these are known. Flats and houses, for example, will be expected to generate different numbers of secondary aged pupils. In reality, depending on the type of dwelling, the specific locality and local population structure, projected pupil product could be a high or low estimate of anticipated 'new' pupils but over a District area as a whole this is expected to be fairly accurate. In calculating the pupil product adjustment for a District as a whole, it is necessary to look at the projected rate of new house building, compared with the historic rate of house building. This is because pupil forecasts are based on historic trends, which inherently include a rate for additional pupils generated from new housing developments in the past.
8.6 The forecasting the future demand for places can never be completely precise given the broad assumptions which have to be made about migration in and out of any given locality, the pace of individual developments, patterns of occupation (family size etc) and not least the demand for places at individual schools. This will be a function of geography, school reputation, past and present achievement levels and the availability of alternative provision.

\section*{Historic Accuracy of Forecasts \({ }^{7}\)}
8.7 Historic accuracy has been considered by comparing the number of children on school rolls against the forecast numbers. Thus the forecasts produced in 2007, which cover the five years up to 2011/12, have been compared to the rolls for those five years; the 2008 forecasts compared to the roll for the four years to 2011/12, etc. In total this provides 15 points of comparison.

Table 1 - Historic accuracy of primary forecasts at County Level
\begin{tabular}{|l|r|r|r|r|r|r|r|l|}
\hline \% accuracy & 2007-08 & 2008-09 & \(\mathbf{2 0 0 9 - 1 0}\) & \(\mathbf{2 0 1 0 - 1 1}\) & \(\mathbf{2 0 1 1} \mathbf{- 1 2}\) & \begin{tabular}{l}
\(\mathbf{2 0 1 2 -}\) \\
\(\mathbf{1 3}\)
\end{tabular} & \begin{tabular}{l}
\(\mathbf{2 0 1 3 -}\) \\
\(\mathbf{1 4}\)
\end{tabular} & \begin{tabular}{l}
\(\mathbf{2 0 1 4 -}\) \\
\(\mathbf{1 5}\)
\end{tabular} \\
\hline Actuals & 100 & 100 & 100 & 100 & 100 & & & \\
\hline \begin{tabular}{l} 
Forecast \\
(2007)
\end{tabular} & 100.0 & 100.3 & 100.2 & 99.9 & 99.7 & & & \\
\hline \begin{tabular}{l} 
Forecast \\
\((2008)\)
\end{tabular} & & 100.8 & 101.3 & 101.8 & 102.5 & & & \\
\hline \begin{tabular}{l} 
Forecast \\
\((2009)\)
\end{tabular} & & & 100.1 & 100.2 & 100.9 & & & \\
\hline \begin{tabular}{l}

\((2010)\)
\end{tabular} & & & & 100.2 & 100.6 & & & \\
\hline \begin{tabular}{l} 
Forecast \\
\((2011)\)
\end{tabular} & & & & & 100.5 & & & \\
\hline
\end{tabular}

Note: In these tables 100 represents the total. 101 represents a \(1 \%\) overestimate; 99 represents a \(1 \%\) underestimate of pupil numbers.
8.8 Over the last five years the forecasts for the primary school roll in Kent have been accurate to within one percent on 12 of these 15 points of comparison (Table 1). The forecasts produced in 2008 proved to have over-forecast in three of the four years (2009/10 to 2011/12), being 2.5\% out by the year 2011/12.
8.9 At District level the forecasts have been more variable. The accuracy ranges from Maidstone, with 14 out of 15 comparison points being within \(1 \%\), to Ashford which has been persistently over-forecast by more than \(1 \%\) (on 12 of the 15 comparison points).
8.10 The secondary forecasts have been accurate to within \(1 \%\) on 13 of the 15 points of comparison, with one occasion forecasting \(1.2 \%\) too low and one \(1.5 \%\) too high (Table 2).
8.11 At a District level the forecasts have varied more, with some significantly over forecasting (Sevenoaks), while others under forecast (Tonbridge \& Malling).

Table 2 - Historical accuracy of forecasts at secondary level
\begin{tabular}{|l|r|r|r|r|r|r|r|r|}
\hline \% accuracy & 2007-08 & 2008-09 & \(\mathbf{2 0 0 9 - 1 0}\) & \(\mathbf{2 0 1 0 - 1 1}\) & \(\mathbf{2 0 1 1 - 1 2}\) & \begin{tabular}{l}

\section*{Quality Assurance of Forecasts}
8.12 Kent County Council Provision Planning and Operations Unit carry out a yearly quality assurance on the forecasting process.
8.13 Pre-school population data forms part of the core dataset for generating forecasts and this is obtained from an external organisation; the Kent and Medway Public Health Observatory (KMPHA). They provide an excerpt from a database maintained by the Kent Primary Care Agency (KPCA) which is subject to their own QA processes. The degree to which Kent County Council can interrogate this data is limited, which is a risk factor in the forecasting process. However, the data received is checked against previous years and a report on the yearly change in cohort sizes is produced. Any deviations from expectation (for example a decrease in cohort size from one year to another in a known growth area) will be questioned via our Management Information Unit (MIU).
8.14 The forecasting process includes various assumptions such as the level of preschool migration, school intake percentages, travel to school patterns and levels of forecast housing growth (being achievable). Forecasts are compared to actual reported data to gauge the degree of variance across the planning area (for primary) and District area (for secondary).
8.15 Where variance levels are unacceptably high, in-depth analysis will be carried out, potentially with the result of later-year forecasts being adjusted and assumptions for some/all schools and areas revised for the following forecasting round.

\section*{Risk Assessments and Scenario Forecasting}
8.16 The forecasts produced for this Plan have been generated by a different system to that which produced previous forecasts. The forecasts produced by this new system have been compared to those produced by the former system. This comparison and the historic accuracy of the forecasts for the individual District have been used to give each a risk rating (confidence level). This process will be further refined during the year. This will enable us to develop scenario approaches to forecasting.

\section*{9. Overview of Kent's Demographics}

\subsection*{9.1 Kent Birth Rates and Long Term Forecasts}

Chart 1 shows the changing birth rate in England and Wales, and in Kent over the past 20 years. Chart 2 shows the number of births in Kent. These demonstrate that the upward trend we have seen in the number of Reception Year children entering our schools will continue for the next few years, and as from 2013 the pattern of declining numbers of Year 7 pupils entering our secondary schools will reverse. The trend for individual Districts \({ }^{8}\) in Kent will vary, and will affect the District forecasts contained in Appendix 1.

Chart 1 - Birth rates in England \& Wales and Kent

Chart 2 - Number of births in Kent

Notes: (1) Births data shown above is by calendar year from the Office for National Statistics release FM01

\footnotetext{
\({ }^{8}\) For district level data see Appendix 7
}
9.2 Chart 2 (above) indicates that the number of births in Kent has increased by in excess of \(20 \%\) between the period 2002 and 2010.
9.3 Tables 3 and 4 below provide long term population forecasts. These allow for planned housing developments and expected in-migration. In Kent there is a resident-based take up of mainstream education of about \(92 \%\) at the primary phase and \(87 \%\) at the secondary phase (mid year population estimate 2010 compared with annual schools census January 2011). This ranges from 79\% primary take-up and \(68 \%\) secondary take-up of mainstream places in Tunbridge Wells to near 100\% takeup in some eastern Kent areas. Those not attending state maintained schools in Kent are instead educated at home, attend independent schools, special schools or alternative education provision.

Table 3
Long term primary-age population forecast by Kent District
\begin{tabular}{|l|r|r|r|r|}

\hline Kent & \(\mathbf{8 8 6 0 0}\) & \(\mathbf{8 4 9 0 0}\) & \(\mathbf{9 5 4 0 0}\) & \(\mathbf{9 3 4 0 0}\) \\
\hline
\end{tabular}

\section*{Notes:}
(1) KCC strategy forecast (October 2011), Research and Evaluation, KCC
(2) All figures have been individually rounded to the nearest one hundred and therefore may not sum
9.4 Table 3 demonstrates that the number of primary-aged pupils in Kent is expected to rise significantly from 116,600 in 2011, to 127,300 in 2016. Beyond this point numbers remain comparatively level, although increases in some Districts are off-set
by reductions in others. This indicates there will be a need to continue to make new provision available in some Districts on a permanent basis, while in others temporary solutions may represent better value for money.
9.5 Table 4 shows the secondary-aged population reducing between now and 2016, before rising through the latter part of this decade, and falling again in the first half of the 2020s.

\subsection*{9.6 Long Term Primary Forecasts}

Our primary forecasts provide a medium term view of the need for primary school places. Long term primary forecasts are inherently difficult to produce. However, it is important to have a view of the longer term to avoid making poor short and medium term decisions. We are developing long term primary forecasts (Appendix 8) for each District using base data from the long term primary aged population data and historic uptake of places in each District. These help guide the decisions made in Section 11.

\subsection*{9.7 Housing}

Table 5 provides an overview of house completions and planned completions by District. The planned completion numbers are used to forecast school place needs. The current volatility in the UK and global economies, and Kent housing market means that the eventual level of house completions may differ significantly from the planned level, and this will alter the need for school places. A comparison of historic actual and planned levels of housing completions by District has been completed \({ }^{9}\). This information informs the District risk assessment referred to in Section 8.16 above. The number of planned house completions in the period 2011-16 is very high when compared to completion rates of the past, and in view of the current economic climate.

Table 5
Completions and future planned housing for Kent Districts
\begin{tabular}{|l|r|r|r|r|r|r|r|}
\hline District & \(\mathbf{1 9 9 5 - 0 0}\) & \(\mathbf{2 0 0 0 - 0 5}\) & \(\mathbf{2 0 0 5 - 1 0}\) & \(\mathbf{2 0 1 0 - 1 1}\) & \(\mathbf{2 0 1 1 - 1 6}\) & 2016-21 & \(\mathbf{2 0 2 1 - 2 6}\) \\

\hline
\end{tabular}

\section*{Notes:}
(1) 2010-11 completions data has yet to be released (at \(1^{\text {st }}\) December 2011) by all Kent Districts
(2) Future planned housing from Kent Integrated Infrastructure and Finance Model (IIFM) December 2011
(3) It should be noted that where future planned housing looks very low it may be that Districts have yet to make housing allocations for those years
(4) Districts are no longer obliged to follow South East England Regional Assembly (SEERA) housing allocation levels and are now to be determined locally

\footnotetext{
\({ }^{9}\) Appendix 9 - Historic actual versus planned levels of housing completions, at District level.
}

\subsection*{9.8 Travel to School Patterns (pupil migration)}

Pupil migration from one District to another at the primary phase is relatively low but the situation is very different at the secondary phase where there are some significant cross border flows (Chart 3), including into and out of the County as well as between Kent Districts.

Chart 3

Notes: (1) Management Information Unit, KCC, based in analysis of District of home address against District of school location, Annual Schools Census (ASC) 2011
9.9 The headlines for secondary travel to school patterns are as follows:
- Pupils often travel significant distances, especially in the west of the County to grammar school and denominational provision
- 3000 out of County children travel into Kent secondary schools (predominantly grammar schools). This figure includes:
- 700 Medway children
- 1,200 children travel into Dartford from London Boroughs (mainly Bexley Borough)
- 270 travel into Tonbridge and 500+ into Tunbridge Wells
- Only around \(25 \%\) of Sevenoaks resident children attend mainstream secondary provision within Sevenoaks District; 1,000 travel to Dartford, 1,300 to Tonbridge and 700+ to Tunbridge Wells

\subsection*{9.10 Current and Forecast Pupils in Mainstream Primary Education}

Chart 4 (below) shows that the number of Reception pupils in Kent schools has risen from 14,498 in 2006-07 to 16,209 in 2011-12. This is an increase of almost \(12 \%\). In 2006-07 Reception year groups at Kent primary schools operated with over 15\% surplus capacity. This has reduced to \(6 \%\) in 2011-12. The number of Reception pupils is forecast to be around 16,600 to 16,800 over the next five years, apart from in 2015-16 where there is expected to be a peak of about 17,200 pupils.

Chart 4 - Forecast reception pupil numbers

Notes: (1) KCC pupil forecasts (2011-based), Provision Planning and Operations, KCC
9.11 Table 6 presents Reception Year data at District level. It shows that the growth in pupil numbers is not uniform across the County, nor is the level of surplus capacity. The current surplus capacity for Reception year groups varies from \(2 \%\) in Swale to \(15 \%\) in Sevenoaks. If no further action is taken (apart from the completion of projects already planned and proposed) by the end of the forecasting period (2016-17) there will be \(5 \%\) surplus capacity in Reception year groups across the county. Action will be taken in those Districts where surplus capacity will fall below \(5 \%\) to provide additional places. Solutions will vary from brand new provision to expansion of existing facilities through permanent or temporary means.

Table 6
Current and forecast Reception Year pupils in mainstream schools by Kent District
\begin{tabular}{|c|c|c|c|c|c|c|c|c|}

\hline
\end{tabular}

Notes: (1) Provision Planning and Operations, KCC (December 2011)
(2) 2011-12 (A) pupil roll data from Schools Census (Autumn term), October 2011
9.12 Chart 5 and Table 7 (below) show that the number of primary pupils in Kent schools is forecast to rise from 106,097 in 2009-10 to around 117,800 in 2016-17. This is an increase of over 11\%. Kent primary schools currently operate with almost 9\% surplus capacity but this is forecast to decrease over the coming years to a little under \(4 \%\) by 2016/17 (taking into account the planned capacity changes (see Section 11).

Chart 5
Forecast total primary school rolls

Notes: (1) KCC pupil forecasts (2011-based), Provision Planning and Operations, KCC

\hline
\end{tabular}

Notes: (1) Provision Planning and Operations, KCC (December 2011)
(2) 2011-12 (A) pupil roll data from Schools Census (Autumn term), October 2011
9.13 Table 7 shows that current surplus capacity for primary year groups ( \(\mathrm{R}-6\) ) varies across the county; from 5\% in Gravesham to 16\% in Dover.
9.14 Current and Forecast Pupils in Mainstream Secondary Education

Chart 6 indicates how the Year 7 rolls in Kent's schools are forecast to rise up to 2019-20 before falling again. Table 8 below provides an overview of this at District level. Chart 7 and Table 9 below provide similar information but for roll numbers of Years 7-11.

Chart 6
Forecast Year 7 pupil numbers

Notes: (1) KCC pupil forecasts (2011-based), Provision Planning and Operations, KCC
9.15 The number of Year 7 pupils in Kent schools has fallen for three consecutive years from 16,605 in 2008-09 to 15,421 in 2011-12 and is expected to continue falling to around 15,200 in 2013-14. Thereafter it is forecast to rise to a peak of around 16,900 in 2019-20 - a growth of \(9 \%\) on current Year 7 roll numbers after which numbers will begin to decline again.
9.16 Table 8 (below) shows that current surplus capacity for Year 7 is \(10 \%\) across Kent, but the figure varies from District to District with the extremes being from 3\% in Dartford to \(27 \%\) in Sevenoaks. By the end of the forecasting period (2021-22) there will be \(5 \%\) surplus capacity in Year 7 across the County, an improvement in the situation two years prior when only \(2 \%\) surplus capacity is forecast.

Chart 7
Forecast total secondary school rolls

Notes: KCC pupil forecasts (2011-based), Provision Planning and Operations, KCC
9.17 Chart 7 shows that the number of Year 7-11 pupils in Kent schools has been falling over the previous six years from 82,934 in 2005-06 to 80,372 in 2011-12 and is expected to continue falling to around 77,600 in 2015-16. Thereafter it is forecast to rise to a peak of around 83,200 in 2021-22 - a growth of just over 4\% on current roll numbers.

\end{tabular}

Notes: (1) Provision Planning and Operations, KCC (December 2011)
(2) 2011-12 (A) pupil roll data from Schools Census (Autumn term), October 2011
9.18 Table 9 shows that current surplus capacity for secondary year groups (7-11) is 7\% across Kent, with the extreme ranges being 3\% surplus in Dartford to 20\% in Sevenoaks. This is forecast to decrease over the coming years, such that by the end of the forecasting period (2021-22) there will be \(4 \%\) surplus capacity in secondary schools across the county. While these figures indicate that across Kent there will be sufficient places for all children, this will not be true for all Districts (for example Ashford, Dartford and Gravesham). The different demographic trends resulting from house building and migration will require additional capacity to be added to meet localised demand at times when rolls are falling in other parts of the County. The District level data in Appendix 1 highlights these differences, and are reflected in the commissioning plans in Section 11.

\section*{10. Areas of Kent}
10.1 For the purposes of administration and service delivery Kent is divided into three areas; East, Mid and West Kent. These areas are used for place planning purposes, using Districts as the building blocks. For primary school organisation purposes, each District is broken down into planning areas. These are used to identify the need to address surplus or deficit capacity within a locality, recognising that substantial housing development or pupil migration may involve more than one planning area.

\subsection*{10.2 East Kent \\ East Kent consists of the four Districts of Dover, Thanet, Swale and Canterbury.}
10.3 Three of these four Districts (excluding Canterbury) exhibit a high degree of deprivation and social and economic challenge. Dover is scheduled for major regeneration, including substantial housing development, over the next twenty years and this will have an impact on the need for primary school places. Some regeneration is planned for parts of Thanet where localised pressures are already emerging in relation to the demand for primary school places.
10.4 New house building continues to be a significant feature in Swale. Canterbury is relatively stable in terms of population growth and potential housing development and this is reflected in the detailed roll forecasts included in this Plan.

\subsection*{10.5 Mid Kent}

Mid Kent comprises four Districts of Ashford, Maidstone, Shepway and Tonbridge \& Malling.
10.6 The socio-economic profile of the area is extreme with Shepway being one of Kent's most deprived Districts, while Tonbridge and Malling is the least deprived. The demographics of each District are different; with Ashford being one of the major growth areas in the South East with forecast need continuing to grow; the Malling area of Tonbridge and Malling being subject to several major housing development sites which will cause pressure points, rather than District wide demand; Shepway with differing demographics between Folkestone Town and the rural Romney Marsh; and Maidstone where pupil numbers remain more stable.

\subsection*{10.7 West Kent}

West Kent comprises four Districts, Dartford, Gravesham, Sevenoaks and Tunbridge Wells.
10.8 On cursory observation, the four Districts are quite dissimilar, but a detailed look shows a similarity that is repeated across all four. The larger towns (Dartford, Gravesend, Sevenoaks and Tunbridge Wells) all have more capacity pressures than the outlying villages and rural areas.
10.9 As part of the Kent Thameside area, Dartford and Gravesham are undergoing significant developmental change as part of an era of house building, job creation and environmental enhancement in the Kent Thameside development area. Eventually, more than twenty thousand new homes will be created across the entire development area. However, the current recession has suspended much of the work on the developments and appears to have delayed the house building process for several years. Once house building re-commences, the expected children from these new housing developments will of course be looking for school places.

\subsection*{10.10 Boundary Factors}

Kent shares local authority boundaries with one unitary authority (Medway), two London Boroughs (Bromley and Bexley) and two county councils (Surrey and East Sussex). There are also two other authority boundaries that are close enough to facilitate cross border pupil movement (Thurrock and West Sussex).
11. Analysis and Forward Plan BY DISTRICT
CANTERBURY
District Analysis - Primary
There are currently 37 schoo
Year. The number of Reception
will be sufficient places to me
below the \(5 \%\) operating surplu
Canterbury City Reception Year numbers are expected to increase slightly over the medium term but any increased demand can be managed through commissioning extra places in the more popular existing schools. This will also support maintenance of a \(5 \%\) operating surplus.
Very low levels of housing development are currently projected for Canterbury up to 2015 and the impact on the demand for places will therefore be minimal.
NHerne Bay Reception Year numbers declined in September 2011 and it will be necessary to keep under review surplus capacity in the \({ }_{\circ}\) Dplanning area. If numbers continue to decline it may be necessary to remove surplus capacity in some schools.
The long term population forecast is for the primary aged population to increase to 10900 in 2021 before falling back to 10300 in 2026.
Accuracy of forecasts - In recent years forecasts for Canterbury primary schools have been very accurate.
District Analysis - Secondary
The number of Year 7 places on offer in Canterbury is 1718 . This exceeds the projected demand for places over the coming 10 year
period. Currently four of the 10 secondary schools in the District are academies. No change in provision is expected to be required in the
short, medium or long term.
Accuracy of forecasts - in recent years forecasts for Canterbury secondary schools have been very accurate.

\end{tabular}

\section*{District Analysis - Primary}
There are 49 primary phase schools in the Swale District, providing 1696 Reception Year places. Surplus places in Swale are forecast to reduce and a deficit of 43 Reception Year places is predicted in 2014 when Reception Year rolls are forecast to peak at 1822 pupils. This means action is needed to increase capacity.
 for expansion of primary school capacity in Sheppey in response to the rising birth rate and proposed housing development at Thistle Hill. There was a shortfall of Reception Year places for entry in September 2011 and an additional 35 places were commissioned. These were in addition to the published admission numbers for the planning areas. Reception Year forecasts show a continual increase and the demand for places will be managed through temporary arrangements with schools until permanent solutions are agreed.
Sittingbourne is a growth area with further new housing proposed. School rolls are forecast to increase. 2FE to 3FE may be needed to meet demand generated by housing developments at East Hall Farm, Stone Farm and Iwade. Up to 1625 new housing units are anticipated from these three developments. Numbers are expected to reduce in the more rural areas of Sittingbourne and as traditionally parents have sought places in these locations, this will help to ease any pressure on places in Sittingbourne Town. Some of this expansion may be on a temporary basis as Reception Year numbers are predicted to fall again across the District in 2015
Expansion is already underway in some Faversham primary schools to meet the increased demand for Reception Year places. Due to the ©increased demand for Reception Year places for entry in September 2011 an additional 1.3 forms of entry were commissioned. 15 places
 permanent to meet continuing demand.
Accuracy of forecasts - Primary forecasts for Swale have been generally accurate over the last few years.
District Analysis - Secondary There are currently 1642 places in Year 7 in secondary schools in Swale. This exceeds the demand for secondary school places in the District in each of the next 10 years. However, surplus capacity in The Abbey School in Faversham and the Isle of Sheppey Academy masks a pressure on places in Sittingbourne. By 2018 the demand for secondary school places in Swale will have almost peaked and the pressure on secondary school places in Sittingbourne will be acute. Action will need to be taken in order to maintain sufficient local capacity and to maintain a degree of parental choice. This will involve consultation with existing providers to consider the scope for the expansion of existing provision.

\hline
\end{tabular}

\section*{District Analysis - Primary}
There are currently 41 schools in the Dover District serving the primary phase with a total of 1267 places available annually in Reception Year. There was an increase in the demand for Reception Year places for entry in September 2011 in the Deal locality. In agreement with the local authority, Hornbeam Primary School admitted 60 pupils ( 30 over the PAN of 30 ), to meet this demand. Forecasts indicate that the "blip" of 2011 will be repeated in 2013/14, while in other forecast years Reception Year numbers will be 70 to 90 pupils fewer.
The number of surplus places forecast for the Dover District primary schools across the entire primary age range will reduce to \(5 \%\) by 2016 . This means that, on the basis of current projections, there is sufficient capacity across the District to meet the expected demand.
Major new housing is projected for Dover over the next 20 years with up to 14000 new houses predicted over that period. Potential development is documented within the Local Development Framework. The most intensive development is planned for the Whitfield area where up to 6000 new houses are anticipated. Realisation of development on this scale would require significant new primary school capacity. A new 1FE school will need to be commissioned by 2016 with the potential for expansion to 2FE in the longer term
In Aylesham, planned new house building has not so far impacted on demand for primary school places. Unless proposed housing odevelopments bring forward additional pupils it may be necessary to consider reducing the capacity in the planning area.
\({ }^{\circ}\) The long term pulation forecast is for the primary aged population to increase to 9900 by 2026 . This would require 800 additional places \(Y(4 \mathrm{FE})\) to those currently available (2011/12) if a \(5 \%\) surplus is to be maintained (and assuming \(95 \%\) of the cohort seek places in Dover's state schools.
Accuracy of forecasts - Forecasts for Dover primary schools have in recent years tended to over estimate the number of pupils consistently.
On the basis of current projections, the existing Year 7 capacity of secondary schools in the Dover District exceeds the demand for places
in each of the next 10 years. This means that unless there is a substantial acceleration in the pace and/or scale of proposed housing development, there will be no need to commission additional places in Dover over the next 6 years.
Currently four of the nine secondary schools in the Dover District are academies with a further conversion of one school expected this year.
Accuracy of forecasts - Dover secondary forecasts have proved to be largely accurate over the last 5 years.

\section*{THANET}
District Analysis - Primary
There are 31 primary phase schools within Thanet District, providing 1498 Reception Year places. Currently there is a shortage of places in
 the greatest pressure emerging in Margate and Ramsgate. Permanent expansion is already planned for some primary schools and temporary expansion may be necessary at other primary schools. Forecast data indicates the number of places required in Reception Year from September 2012 will exceed the number of places available. Arrangements have already been put in place to secure an additional 60 places through expansion of existing provision. Further discussions are underway to secure the additional capacity required.
There will be major new housing at Westwood Cross, the timing of which is not yet finalised. Agreement has been reached with developers
for Bromstone Primary School to re-locate to a new site at Westwood Cross. Depending on the precise timing of the Westwood Cross
development, some localised expansion of existing provision may be necessary over the medium to long term to meet additional demand
from the new housing. We have also become aware of an additional development, not included in the Thanet LDF that is close to the
Westwood Cross site. The East Kent Opportunities development has the potential to yield 550 dwellings with a pupil product of up to 143 .
If this development is realised there may be a need for an additional 1FE primary school.
In Margate and Garlinge an additional 30 places were commissioned for entry into Reception Year in September 2011. A further 30 places were also commissioned following the start of Term 1, as late applicants came forward. 30 places at Drapers Mills and 30 places at סGarlinge. A further 60 places have been commissioned for entry to Reception Year in September 2012-15 places at Northdown, 15 at 0 Palm Bay and 30 at Garlinge. Permanent expansion is planned for these four primary schools creating an additional 3FE to meet the future \({ }^{\circ}\) demand for places in the short to medium term.

\section*{District Analysis - Secondary} With a PAN capacity of 1544 in Year 7 for Thanet and a projected need for 1379 places by 2013 there are sufficient secondary school places to meet the expected demand. Within the longer term projections, demand for places only exceeds supply in 2019 and then only by 18 places. There may be a need to offer some additional places in 2019 and 2020 to maintain a degree of parental choice. The situation will be monitored and reviewed in 2016-17 to ensure a sufficient number of places are available when demand peaks in 2019.
Currently six of the ten secondary schools in the Thanet District are academies.
Accuracy of forecasts - in the last 2 years forecasts have been broadly accurate.

\hline
\end{tabular}

\section*{District Analysis - Primary}
There are currently 40 schools in the primary phase in the Ashford District and a total of 1456 places available annually in Reception Year. The immediate pressures in Ashford are arising in Reception Year as larger cohorts enter the school system. Recent expansions at Aldington, Challock, and John Wesley CE Primary Schools have provided some relief. By September 2012 the number of Reception Year places will increase to 1529 with the opening of Repton Manor Primary School as a 2FE provision.
Forecasts indicate that a further 50 Reception Year places are needed to serve Ashford Town for September 2012 when Reception Year numbers are forecast to peak. These places are being provided by admitting bulge year groups into Great Chart and Furley Park Primary Schools (adding 60 places). In subsequent years demand falls from the 2012 peak by between 2\% and 4\%, with 1540 Reception Year children expected to be seeking places by 2016/17. However, these District wide figures mask the fact that places are likely to remain vacant in the Tenterden area of the District, while demand outstrips current capacity in Ashford Town.
In Ashford Town arrangements are in place to enable an additional 60 Reception Year places to be made available between Great Chart Jand Furley Park Primary Schools in 2013, and Goat Lees Primary School, is due to open in September 2013 with 30 Reception Year \(\stackrel{0}{0}\) places.
to create and maintain a \(5 \%\) operating surplus.
to those of the housing developments.
The long term population forecast sees the primary aged population increasing to 14800 by 2026 . This would require 4800 additional places (23FE) to those currently available (2011/12) if a \(5 \%\) surplus is to be maintained (and assuming \(95 \%\) of the cohort seek places in Ashford's state schools). The two new schools mentioned above will ultimately provide three of these forms of entry.
Accuracy of forecasts - Historically in Ashford, fewer houses have been built annually than planned for. Consequently primary forecasts
have tended to over estimate demand (by more than the \(1 \%\) tolerance we seek), particularly towards the end of the forecast period.
The number of Year 7 places on offer in Ashford is 1351. Currently, 7\% of Year 7 places are vacant in Ashford, with 6\% of all secondary school places vacant. The Year 7 cohort is expected to be at its lowest in 2012 before rising and peaking in 2019. At this peak a further 60 places will be needed to meet demand. A deficit of places is expected from 2018 to 2020, before rolls reduce back to the current capacity figure. The need for action is therefore dependent upon whether house building matches the proposed housing trajectory.
Currently Highworth, Norton Knatchbull and The Towers School have more sixth form pupils than capacity to accommodate them. Sixth form rolls across Ashford are forecast to rise until 2015/16, but new sixth forms at the North and The John Wallis Academy will provide additional capacity.
At the time of writing four of the six secondary schools in Ashford are academies, with the remaining two seeking to convert.

\end{tabular} & Commission two secondary schools ( \(1 \times 8 \mathrm{FE}\), \(1 \times 6 F E\) ) to serve the growth of Ashford. \\
\hline
\end{tabular}

\section*{District Analysis - Primary}
There are currently 35 schools in the primary phase in the Shepway District and a total of 1201 places available annually in Reception Year. Reception Year forecasts indicate surplus places across the District will fluctuate between 1\% and 5\% up to 2016/17.
Folke Town will increasingly come under pressure during the next few years. In the east of the Town, the Reception Year forecasts indicate that between 20 and 60 more pupils than places will be available during the forecast period, with the peak being in 2014/15. This can be managed via surplus capacity in the west of the Town and in Hawkinge, although a one-off solution for 2014/15 and 2015/16 may be preferable / required.
In Hawkinge in 2013 it is expected that a bulge cohort of Reception Year pupils will be seeking places. Some pupils may need / choose to travel to schools in neighbouring villages, or to Folkestone, or a one-off solution may be found. The numbers fall back in 2014.
Surplus capacity across all year groups is set to reduce by 2016/17, as larger cohorts enter Reception Year (largely driven by pre-school migration) than those leaving Year 6, particularly in Folkestone Town. While sufficient, this is below the optimum 5\% operating guideline. Despite reducing surplus capacity in schools on Romney Marsh in recent years (which is reflected in the capacity changes in the table above), these schools are expected to continue to have significant levels of surplus places.

\section*{SHEPWAY}

\section*{District Analysis - Secondary}
DThe long term forecast is for the primary aged population in Shepway to increase to over 8200 in 2016 before falling to 7600 in 2026 . The
Dilong term Reception Year forecasts rise to 1200 pupils in 2015 . However, the Local Development Framework is seeking to identify land for
U6000-8000 houses and these are likely to require further provision (1FE at Palmarsh, 2.5FE in Folkestone, up to 2FE in the rural hubs).
Accuracy of forecasts - both primary and secondary forecasts have generally been accurate to within the \(1 \%\) tolerance we seek.
The number of Year 7 places on offer in Shepway is 1210. Currently, \(16 \%\) of Year 7 places are vacant in Shepway, with \(12 \%\) of places in all year groups being empty. Year 7 intake numbers fluctuate over the forecast period peaking in 2019/20 before starting to fall again. Forecast Year 7 numbers, and forecast total roll numbers are below the capacities of the schools. In 2016 the surplus capacity for pupils aged 11-16 years is expected to reach its maximum at \(22 \%\). This situation presents the opportunity for some schools to consider taking unsuitable accommodation out of use. Sixth form rolls are forecast to rise up to the year 2014 before reducing back to below current numbers.
At the time of writing, three of the six secondary schools in Shepway are academies, with a fourth in the process of converting.

\section*{District Analysis - Primary}
 Year. The District has sufficient capacity to accommodate pupil numbers throughout the forecast period, with the exception of Reception Year places in 2015, when a forecast bulge may result in a deficit of 47 places ( \(-3 \%\) ). A new free school, The Tiger School, opens in September 2012 (subject to Secretary of State approval). Initially it will provide up to 60 Reception Year places, and ultimately provide 420 places across all year groups.
The forecasts for the Maidstone North planning area indicate a large cohort is expected to enter the schools in Reception Year in 2014, resulting in a deficit of over 30 places. However, the intake numbers forecast for the Bearsted area reduce. Historic parental preference data suggests these forecast differences will in fact balance out. In terms of total rolls the schools will be full in 2014. There is potential to add 60 places to one of the local schools.
The forecasts for the Tonbridge Road planning area indicate there will be a deficit of up to 50 Reception Year pupils throughout the forecast period, and a shortfall of places across all year groups. For the past two years St Francis RCPS has admitted beyond its PAN of 49, and consideration is being given to increasing capacity to support a 2FE intake, thereby adding 77 places. Schools in this planning area have, in the past, attracted pupils from adjoining planning areas. Surplus capacity in these areas is sufficient to accommodate any displaced
DThe long term population forecast is for the primary aged population to increase to 12600 in 2016 before falling back to 11700 in 2026 . The ©long term Reception Year forecasts are relatively stable.
The need for new local provision will be driven by housing. Maidstone Borough Council is continuing to work on its Local Development Framework, and future needs will be driven by this (10080 houses in the SE Plan).
Accuracy of forecasts - primary forecasts have been consistently accurate.

\section*{District Analysis - Secondary}
Accuracy of forecasts - Secondary forecasts have been accurate over the past three years.

\begin{abstract}
At the time of writing, six of the eleven secondary schools in Maidstone are academies, with a seventh in the process of converting.
\end{abstract}

\end{tabular}

\section*{District Analysis - Primary} There are currently 44 schools in the primary phase in the Tonbridge \& Malling District and a total of 1561 places available annually in Reception Year. In total school roll terms the District has sufficient places to meet demand throughout the forecast period, with surplus capacity remaining over the \(5 \%\) operating guideline. However, these figures mask the pressure points, which are primarily linked to house building.
Housing development is predominantly in the Malling area. The level of new houses being built in areas such as Kings Hill and Holborough Quarry do not exceed those built historically and therefore the base forecasts capture migration to these locations. For this reason the forecasts do not show further pupils arising from new housing (pupil product adjustment).
Holborough Quarry (1000 houses) is being provided for via the Snodland primary schools. The S106 agreement provides, if needs are evident, for the provision of a 1 FE or 2 FE site. The cash contribution is \(£ 1.2 \mathrm{~m}\) (if new build) or \(£ 700 \mathrm{k}\) (extension rate).
1000 homes are planned in the Peter's Pit development. Wouldham CEPS is the nearest school. The S106 agreement for this site is linked to the agreement for Holborough Quarry, and provides for education provision. The extent of the contribution is dependent upon an oassessment of need at a future date.
\(\stackrel{\infty}{\infty}\) Leybourne Grange will have 700 homes. The developer is providing a 1 FE site and \(£ 2 \mathrm{~m}\) towards the cost of a new school building.
Kings Hill - anticipated build rate is \(100-150\) per year for the remaining 500 houses. Planning consent is currently being sought to make additional accommodation of 1FE available on the Discovery School site. Should more housing allocations be made, a further 1FE might be needed. It is anticipated that once development is complete, the need for school places will reduce, possibly by 1FE. Historically, this housing development has seen a very high rate of families moving in with pre-school aged children, or starting a family when they arrive. Thus the pre-school migration rate has been far in-excess of the County average. It is probable that a significant proportion of the extra pupils forecast in the pre-school migration line of the table above should be attributed to this and neighbouring housing development areas.
The long term population forecast shows the primary aged population peaking in 2016 at 10900 pupils before reducing to 10100 in 2026. However, new housing clearly affects where school provision needs to be located.
Accuracy of forecasts - on occasions underestimated the number of primary aged pupils, although those produced in the last two years have proved accurate to within 1\%.

\section*{TONBRIDGE \& MALLING}
The number of Year 7 places on offer in Tonbridge \& Malling is 1642 . In \(2011,6 \%\) of both Year 7 places and total places (years \(7-11\) )
remained vacant. The vast majority of surplus places are contained in The Malling School ( 454 ), and neighbouring schools in the Malling
area (about 100 ). Under 100 places are vacant in Tonbridge. The admissions pattern for the secondary schools in Tonbridge \& Malling are
linked to Maidstone (for Malling) and Sevenoaks and Tunbridge Wells (for Tonbridge). Thus commentary on those Districts should be
considered alongside this section.
Year 7 numbers are forecast to fall until 2013, before rising again to peak in 2018 . There is forecast to be a deficit of up to 80 places from
\(2016 / 17\) to \(2019 / 20.180\) places would be required at the peak if a \(5 \%\) surplus is to be maintained. The deficit relates to schools in
Tonbridge, predominantly at Hayesbrook Boys School, and the District's three grammar schools.
The larger Year 7 cohorts will cause the total school rolls to rise, leading to an overall shortfall of places from 2018/19.
Post 16 numbers are forecast to increase throughout the forecast period reaching 2174 by 2021. There is a deficit of places throughout the
period, although surplus accommodation in schools is sufficient to offset this until 2018 .
Accuracy of forecasts - have in the past significantly underestimated secondary pupil numbers, but in the last two years these have been
correct to within \(1 \%\).

\section*{WEST KENT}

\section*{DARTFORD}

\section*{District Analysis - Primary}
 The total rolls are forecast to increase significantly, and will continue to do so throughout the forecast period. The District has sufficient capacity to accommodate the forecast pupil numbers until September 2015 by which time the local authority will need to commission a minimum of 2FE and an additional 1FE the following year.
Stone and Fleetdown planning areas will increasingly come under pressure. A proposed 1FE enlargement at Fleetdown Primary School from September 2012 has been agreed. Longer term, there is a new development planned in the quarry at St James Lane. This development will require a new 2FE primary school.
Expected new housing developments in North Dartford and New Town planning areas will predicate a need for up to 2FE of Primary provision. This development is not yet underway and is not expected until 2015.
OThe Ebbsfleet Valley development will see an additional 7,000 new dwellings in the Swanscombe area. This will require the local authority Oto commission \(4 \times 2\) FE primary schools to manage the pressure.
\({ }^{\infty}\) ith tal rell
Accuracy of forecasts - The primary forecasting for Dartford is consistently accurate, even over the longer term.
The number of Year 7 places on offer in Dartford is 1405. Secondary rolls are forecast to rise steadily until 2017. After this, the rate of increase rises faster. In the medium to long term, the local authority will be commissioning a new 8FE secondary school on the Ebbsfleet Valley development. If the new development is not able to deliver the secondary school when required the local authority would need to consider commissioning up to 4FE of secondary provision from the current Dartford secondary sector.

\footnotetext{
The pressure on secondary PAN capacity is led from increasing Year 7 intakes which over the next nine years are forecast to see an increase of 330 . The local authority will need to consider commissioning 3-4 FE additional secondary provision, over and above the 8FE being provided on the Ebbsfleet Valley development.
}
Accuracy of forecasts: numbers are impacted by Kent/Bexley border migration.

\end{tabular} \\
\hline
\end{tabular}

\section*{District Analysis - Primary}
There are currently 27 schools in the primary phase in the Gravesham District and a total of 1304 places available annually in Reception Year. The Reception Year intakes are forecast to fluctuate slightly over the next 5 years. Total roll forecasts will increase throughout the forecast period. The District appears to have sufficient capacity to accommodate the forecast pupil numbers during this time, but this masks the true picture.
West Gravesham and Northfleet planning areas require additional capacity. Proposals being put in place to manage this include enlarging Dover Road Community Primary School by 1FE, (temporarily up to 2012) and enlarging St Botolph's Church of England Primary School by 1FE (from September 2012). There is also a medium term proposal to enlarge and relocate Rosherville Church of England Pr8imary School to a new site on the Springhead housing development, as a 2FE primary school from 2015.
Gravesham Borough Council (GBC) is currently reassessing its housing requirement. There is a probability that GBC will consider new housing development sites in addition to existing sites. The number of new houses is not yet decided but is expected to be in the region of 5,200 . The local authority is working with GBC to ensure that we have early notification of new development, and an input into where new provision would need to be commissioned. Some of the housing is likely to be in East Gravesend and, if so, additional provision will need to be commissioned.
The total rolls for Gravesend rural schools are forecast to remain fairly static. There is spare capacity which will help to manage overspill Ofrom Gravesend rural if required.
© The long term population forecast sees the primary aged population increasing to 10100 by 2026. This would require 1470 additional
places (7FE) to those currently available (2011/12) if a \(5 \%\) surplus is to be maintained (and assuming \(95 \%\) of the cohort seek places in Gravesham's state schools). However this is dependent upon housing development starting as planned. shorter term, however, the forecasts tend to over estimate demand, by as much as \(3 \%\). Secondary of Year 7 places on offer The number of Year 7 places on offer in Gravesham is 1284. Forecast Year 7 intakes show a fluctuation over the next 10 years, although numbers will rise gradually. There is sufficient Year 7 capacity in Gravesham to manage this increase and, although some temporary accommodation may be needed in 2017/18-2018/19, no significant additional provision is likely to be needed. However, this situation might change once GBC decides where it intends to allow housing development.
Accuracy of forecasts - Gravesham secondary forecasts have been accurate with the exception of short and medium term forecasts for 2011/12 which have over-estimated by about \(2 \%\) every year.
Accuracy of forecasts - Longer term Gravesham primary forecasting tends to under estimate actual roll numbers by up to \(2 \%\). In the forecasts tend to over estimate demand, by as much as 3\%.

will need to be considered.
\end{tabular} \\
\hline
\end{tabular}
There are currently 42 schools in the primary phase in the Sevenoaks District and a total of 1436 places available annually in Reception Year. The Reception Year forecasts fluctuate over the next five years, with an overall slight reduction in intake. However, this fluctuation is not reflected in total roll numbers which show an increase overall. Sevenoaks District has sufficient capacity to accommodate the forecast increases although the size of the District and its geographical north/south spilt mean that provision may not be as local as would be ideal. There are however no individual planning areas that cause concern.
In 2011, Sevenoaks Town had an increase in numbers and three temporary enlargements were established. Forecasts indicate slight increases in demand, largely due to parental preference. A further enlargement by 1FE may well be required by September 2013. enlargement of 0.5FE may be required at Dunton Green Community Primary School.
The forecasts for Sevenoaks rural schools remain fairly static. There is enough spare capacity if demand increases.
TThe long term forecast is for the primary aged population in Sevenoaks to increase to 10400 in 2016 before falling to 9300 in 2026.
\({ }^{(1)}\) Accuracy of forecasts - Since 2008, Sevenoaks primary forecasts have been consistently within 1\% accuracy

\section*{District Analysis - Secondary}
The number of Year 7 places on offer in Sevenoaks is 510. Forecasts indicate an increase in Year 7 intakes for the next seven years. The increase is exacerbated by corresponding increases in the forecasts for Tunbridge Wells and Tonbridge, where half of Sevenoaks children travel to receive their education. As demand increases in these areas, Sevenoaks pupils will find their ability to access a secondary education of their choice becoming increasingly challenged. New provision in Sevenoaks will therefore provide a solution for the secondary capacity issues. This will influence not only Sevenoaks, but also Tonbridge and Tunbridge Wells Districts as well.
Longer term, District numbers are forecast to decrease. All surplus capacity will be in the northern part of the District. This decrease masks the situation in the southern part of the District where forecasts indicate sustained growth. There is negligible migration from southern to northern parts of the District.
Accuracy of forecasts - The secondary forecasts for Sevenoaks have shown a significant and consistent divergence from actual numbers. This divergence has two causes. Firstly, the cross border migration from Sevenoaks to Tonbridge/Tunbridge Wells and secondly, there are only three schools in Sevenoaks which will show a less dependable result.

\section*{District Analysis - Primary}
There are currently 31 schools in the primary phase in the Tunbridge Wells District and a total of 1321 places available annually in Reception Year. The Reception intake for primary schools in Tunbridge Wells is forecast to fluctuate. The District appears to have sufficient capacity to accommodate the forecast pupil numbers during this time, but this masks the true picture.
Tunbridge Wells town centre is experiencing significant pressure on Reception numbers. The Tunbridge Wells, Southborough, Rusthall, Langton Green, Broadwater, Pembury and Hawkenbury planning areas, when analysed together, indicate a picture that is not reflected in the more rural areas of Tunbridge Wells District. The local authority is working closely and productively with Tunbridge Wells Borough Council and the housing developers to commission additional provision in the medium term. These proposals involve enlarging St Peter's

 by 1 FE of four local primary schools.
The total rolls for Tunbridge Wells rural schools are forecast to remain fairly static. There is spare capacity but this will not be local enough to benefit the main population centres.
OThe long term forecast is for the primary aged population in Tunbridge Wells to increase to 10100 in 2016 before falling to 8900 in 2026.
\({ }^{-}\)Accuracy of forecasts - Medium term forecasts tend to overestimate demand. Short term forecasts are more accurate.
The number of Year 7 places on offer in Tunbridge Wells is 1499. The secondary situation for Tunbridge Wells selective provision is currently influenced by the demand from Sevenoaks (mainly selective) pupils. This demand exacerbates the local pressure on grammar school places. The local authority is considering a proposal to commission an increase in non-selective provision at Knole Academy, Sevenoaks and selective provision as a satellite of two existing selective schools.
Currently, there are no capacity issues in non-selective schools and two schools, Angley Sports College and Skinners Kent Academy, are experiencing low numbers. Any increases in non-selective demand can be managed through the capacity in these two schools.
Accuracy of forecasts - Tunbridge Wells secondary forecasting has been generally accurate over the last five years although there is a tendency to over estimate by between \(1-2 \%\).

\section*{12. Planning Provision for Special Educational Needs}
12.1 The future provision for children with special educational needs (SEN) will form an integral part of the School Organisation Plan. Current provision is already identified within this document including the significant developments planned for providing new/enhanced accommodation for ten special schools. The future capacity of specialist SEN provision within special schools and within the mainstream sector will be subject to review as Kent develops its new strategy for SEN during the course of 2012. This will include an evaluation of the range of existing provision available to meet the full spectrum of need types, the geographical spread of such provision and the need to ensure that all students from pre-school to post 16 have access to the specialist support and provision that is necessary to meet their individual needs, wherever they may live in Kent. Future decisions on the location and mix of provision, as well as capacity issues will clearly be considered within the context of the need to consider cost effectiveness and value for money from available sources.
12.2 It is intended that decisions will be taken following close engagement with the full range of schools and education providers. At this stage therefore the SEN entry in this document should be considered as work in progress which will be significantly developed and enhanced over the next few months in line with the development of the County Council's SEN Strategy.

\subsection*{12.3 Special School Review}

The County Council embarked on a review of its special school provision during the last decade. Its provision was re-designated to meet the needs identified at that time. The intention was to ensure we had sufficient provision, in the right place, and meeting relevant needs. The local authority has and continues to invest (presently £120m) in rebuilding/refurbishing its special schools to enable these to be able to function in the best quality environments we can offer.
12.4 Table 10 below details the current special school provision in Kent.

\end{tabular}

12.5 We are currently working with ten of these schools to provide them with the quality of accommodation we aspire to. The present position is:

St Anthony's - We are planning a sports hall, four classrooms and refurbishment work to the existing main building. The main building requires reroofing and a new boiler and there have been recent asbestos issues connected with ceilings. There is also fire precaution works to be done. Increase from 112 to 122 but this could be achieved by the school converting the current science block into an ASD Unit

Laleham Gap - We are planning a new school on KCC land at Pysons Road, Ramsgate, where we already have planning permission. Discussions are currently taking place with the headteacher and governors as they are looking for a larger building and may prefer instead to have the existing buildings refurbished. Remain at 176 , including 25 boarding places.

The Foreland - We were planning a new school apart from Saxon House (the most recent buildings). It now appears unlikely that we can acquire the freehold of the whole site from the NHS Trust Board due to their reorganisation. We need another site to relocate the school: Pyson Road is a possibility if Laleham Gap does not move there. Increase from 140 plus 17 nursery to 192 plus 17 nursery

Stone Bay - We are planning an admin extension and replacement of two hutted classrooms with a modular block. We were also seeking to acquire Lanthorne Bungalows from the NHS to allow for the expansion of 52 week boarding provision but the same difficulty exists as on adjoining Foreland site. Provide 10 new 52 week boarding places at Lanthorne (plus 46 term time boarders at Stone Bay site) and increase day pupils from 22 to 24

Portal House - We are planning a new school on a site that we need to acquire at Townsend Farm Close. Increase from 60 to 80

Foxwood/Highview - We are planning a new school, but there are some issues that still need to be resolved about a new site. KCC does own sufficient land in Park Farm Road for this proposal. Currently 139 at Highview and 121 at Foxwood; plan for 286 on one site including Post 16, possibly off site

Five Acre Wood - We are planning an extension, the conversion of the Professional Development Centre and refurbishment to the existing buildings. Currently 182 on roll with 146 on the main site and 36 in the post 16 provision at Aylesford School. Planning for 210 places with 180 on the main site and 30 at Aylesford School.

Ridge View - We have looked at the options of a new school and refurbishing the existing building and providing additional accommodation. The options are being evaluated. The project needs Oakley School to move from its Tonbridge site to provide decant accommodation. Increase from 88 to 160

Oakley - We are planning a hall and classroom block to enable the primary phase to move from Tonbridge. This needs to be an early project to allow for the Ridge View decant. Increase from 169 to 206 and plan a Post 16 phase of 40 off site

Broomhill Bank - Some adaptability is required to the old residential building and current consideration is being given to address suitability and capacity issues at the school. The current roll is 72
12.6 In Kent, we also provide specialist provision through Units attached to mainstream schools or via integrated provision within mainstream schools which have specialist designations. At present we have the following provision (Table 11):

\section*{13. Early Years Education}
13.1 Local Authorities act as strategic leaders in facilitating the childcare market, focusing particularly on ensuring sufficient, sustainable and flexible early education and childcare is available that is responsive to parents' needs.
13.2 Table 13 sets out the number of children across Kent aged 0-4 years old by year group.

Table 13 - Number of children aged 0 to 4 in Kent
\begin{tabular}{|c|c|}
\hline Year cohort & Number of children * \\
\hline 0 & 17,215 \\
\hline 1 & 17,589 \\
\hline 2 & 17,786 \\
\hline 3 & 17,696 \\
\hline 4 & 17,363 \\
\hline Total & \(\mathbf{8 7 , 6 4 9}\) \\
\hline
\end{tabular}

Note: Data on the number of children aged 0 to 4 is taken from the Health Authority population statistics for October 2010.

\subsection*{13.3 Early Years Education Entitlement}

The Early Years Education Entitlement is available for parents of children with a child aged 3 or 4 years to help provide a free early years education place for their child. This can only be provided by Ofsted registered providers of childcare for 3 and 4 year-olds and by Ofsted registered maintained and independent schools, all of whom deliver Foundation Stage education.
13.4 The Childcare Sufficiency Assessment (CSA) provides an overview of provision with total early years and childcare places available in each District across Kent (Table 14). This suggests that there are significant numbers of surplus places in every District in Kent. However, this is not always the case. It should be noted that places recorded are those stated in the Ofsted registration and therefore are the maximum number a provision can accommodate. Taking account of the varying child to staff ratios for the different age ranges of children many providers work to set patterns and therefore it is unlikely that they would operate at maximum occupancy.

Table 14-A breakdown of provision by District is set out below:
\begin{tabular}{|l|c|c|}
\hline District & \begin{tabular}{c} 
No. of children \\
aged 3 \& 4
\end{tabular} & \begin{tabular}{c} 
No. of EY Educational \\
Places
\end{tabular} \\
\hline Ashford & 3057 & 3834 \\
\hline Canterbury & 3008 & 4284 \\
\hline Dartford & 2527 & 3886 \\
\hline Dover & 2456 & 3354 \\
\hline Gravesham & 2745 & 3083 \\
\hline Maidstone & 3635 & 5258 \\
\hline Sevenoaks & 2917 & 3957 \\
\hline Shepway & 2341 & 3182 \\
\hline Swale & 3400 & 4408 \\
\hline Thanet & 3117 & 3681 \\
\hline Tonbridge \& Malling & 3025 & 4523 \\
\hline Tunbridge Wells & 2831 & 3382 \\
\hline Total & \(\mathbf{3 5 0 5 9}\) & \(\mathbf{4 6 8 3 2}\) \\
\hline
\end{tabular}

Note: The number of EY Educational Places includes Reception classes in Kent maintained schools and Academies.
13.5 Provision made in the private and voluntary sector and in nursery classes in maintained schools is as follows, and summarised in Table 15:
- Full day care for children aged 0 to \(\mathbf{4}\) - There are 319 providers registered with Ofsted as full day care (i.e. provision which is open for children aged 0 to 4 for more than 4 hours per day) with a total of 14,165 places.
- Pre-school Sessional providers - There are 333 Ofsted registered pre-school playgroups (i.e. provision which is open for children aged 0 to 4 for less than 4 hours per day) with a total of 9,276 places.
- Childminders - There are 1,594 Ofsted registered childminders, with a total of 7,186 places. Of these 113 registered childminders have achieved quality assured status and can therefore offer the early education entitlement.

Table 15
\begin{tabular}{|lr|r|}
\hline \multicolumn{2}{|c|}{\begin{tabular}{c} 
Total registered pre-school \\
provision
\end{tabular}} & Registered places 0 to 4 years \\
\hline Full Day Care & \\
\hline Pre-school sessional & 319 & 14,165 \\
\hline Childminders & 1533 & 9,276 \\
\hline Maintained nursery units & 68 & 7,186 \\
\hline Total & 3,536 \\
\hline
\end{tabular}
* Information from CSA April 2011

Note: It should be noted that a parent may only require part-time childcare and therefore 'a place' may be occupied by more than one child.
13.6 It is also important to note that places are not uniformly available to children of all ages. Table 16 breaks down the places available (in Table 14) by age group. This data is particularly important when considering the 3 and 4 year old entitlement set out above, and the incoming entitlement for 2 year olds set out below.

Table 16 - Estimated split of places for 0 to 4 year olds.
\begin{tabular}{|l|c|c|c|c|c|}

\end{tabular}

Data from the Annual Provider Survey 2011
13.7 Free entitlement for 2 year olds - the Government intends to introduce a duty from September 2013, for the most disadvantaged 2 year olds to be able to access up to 570 hours free provision ( 15 hours per week for 38 weeks). Kent has been set a target by Government to create 3300 places with an increase to some 6600 places by September 2014. The introduction of this duty represents a significant challenge for Kent, as set out in Table 17.

Table 17 - Provision of Early Education places for 2 year olds
\begin{tabular}{|c|c|c|c|c|c|c|}
\hline LCT Area & Estimated no. of 2 year olds in 2013 & Estimated no. of 2 year olds eligible for "Free for 2" by 2013 (based on deprivation) & Estimated no. of 2 year olds eligible for "Free for 2" by 2013 (based on disability) & Total Estimated no. of 2 year olds eligible for "Free for 2" by 2013 & \begin{tabular}{l}
Estimated \\
no. of vacancies for 2 year olds
\end{tabular} & Shortfall in places \\
\hline Ashford & 1782 & 236 & 107 & 343 & 76 & 267 \\
\hline Canterbury & 1571 & 208 & 94 & 302 & 104 & 198 \\
\hline Dartford & 1450 & 173 & 87 & 260 & 14 & 246 \\
\hline Dover & 1300 & 236 & 78 & 314 & 88 & 226 \\
\hline Gravesham & 1408 & 202 & 84 & 286 & 10 & 276 \\

\hline Shepway & 1290 & 219 & 77 & 296 & 66 & 230 \\
\hline Swale & 1878 & 322 & 113 & 435 & 14 & 421 \\
\hline Thanet & 1794 & 349 & 108 & 457 & 232 & 225 \\
\hline Tonbridge \& Malling & 1599 & 147 & 96 & 243 & 65 & 178 \\
\hline Tunbridge Wells & 1515 & 128 & 91 & 219 & 30 & 189 \\
\hline TOTAL & 19194 & 2553 & 1152 & 3705 & 780 & 2925 \\
\hline
\end{tabular}

Note: The above figures are estimations. However, a full audit of provision is planned to be carried out AprilJune 2012.
13.8 It has been identified both Nationally and in Kent that assessing the childcare market and sufficiency of provision is both a complex and constantly moving challenge therefore to better inform our planning and provision Kent intend to carry out a full audit of all pre-school providers to be completed by July 2012.

\section*{14. Post-16 Education in Kent}
14.1 Table 16 below sets out the percentage of pupils who stay on into school sixth forms in Kent. Across Kent, approximately two thirds of Year 11 students continue post 16 education in Year 12 in school sixth forms; four fifths of these students then remain into year 13.

Table 16: Sixth Form Stay-on Rates

(\%)
\end{tabular} \\
\hline Ashford & 1256 & 855 & 68.1 & 814 & 667 & 81.9 \\
\hline Canterbury & 1603 & 1052 & 65.6 & 1079 & 891 & 82.6 \\
\hline Dartford & 1300 & 1066 & 82.0 & 913 & 766 & 83.9 \\
\hline Dover & 1254 & 761 & 56.9 & 764 & 603 & 78.9 \\
\hline Gravesham & 1763 & 1166 & 57.2 & 789 & 648 & 82.1 \\
\hline Maidstone & 455 & 150 & 66.1 & 1276 & 1080 & 84.6 \\
\hline Sevenoaks & 1014 & 651 & 64.2 & 145 & 90 & 62.1 \\
\hline Shepway & 1524 & 940 & 61.7 & 998 & 525 & 75.3 \\
\hline Swale & 1474 & 769 & 52.2 & 770 & 612 & 81.4 \\
\hline Thanet & 1456 & 969 & 66.6 & 1028 & 868 & 78.1 \\
\hline Tonbridge \& Malling & 1408 & 999 & 71.0 & 1033 & 923 & 84.4 \\
\hline Tunbridge Wells & \(\mathbf{1 5 8 4 5}\) & \(\mathbf{1 0 0 9 5}\) & \(\mathbf{6 3 . 7}\) & \(\mathbf{1 0 3 0 6}\) & \(\mathbf{8 4 7 4}\) & \(\mathbf{8 2 . 2}\) \\
\hline Kent & & & & &
\end{tabular}

Note:
Comparing the January Census with the following October Census will give a slightly higher stay-on rate (than comparing January with January) as some pupils will drop out of sixth form education between the October and January Census dates
14.2 There are six Colleges of Higher and Further Education in Kent. Currently these provide for students aged 16-18 years as follows:

Table 17 - HE \& FE Colleges in Kent

\end{tabular}
14.3 Since April 2011 Connexions have collected data on young people by academic year age, so it is now possible to distinguish the activities of those in Year 12 and Year 13. This information is essential to the planning of provision to ensure that the incoming duties relating to "Raising the Participation Age" are delivered.

Table 18 - Activities of Year 12 and Year 13 cohort, \(30^{\text {th }}\) April 2011

\end{tabular}

Source: CCIS Connexions
Note: The cohort total includes all Kent resident young people, including those formerly home educated, in independent provision etc.
14.4 The employment and education status for a proportion of young people aged 16-18 years changes on a regular basis. Table 18 indicates that we need to be planning full time education or full time employment with training pathways for the young people who are Not in Education, Employment or Training, or whose status is not known to the Authority. Additionally, not all those in employment will be receiving training which meets the incoming requirements. We estimate \(40 \%\) of those in employment in Year 12 , and \(60 \%\) of Year 13 aged pupils in employment do not receive training which meets the learning requirements.

\begin{tabular}{|c|c|c|c|c|}
\hline Type of school & What are they? & Who sets them up? & How are they run? & How do they get permission? \\
\hline Free schools & New state schools (including independent schools becoming state schools) & Teachers, parents, educational charities, universities, community groups & Held accountable through a funding agreement with the Government. & Two stage application process - a proposal and a business case \\
\hline Traditional academies & Usually existing poorly performing state schools which are given to a new provider & Universities, FE colleges, education charities, businessmen & Held accountable through a funding agreement with the Government. & The DfE brokers between academy providers and underperforming schools \\
\hline Academy converters & Usually existing highly performing schools which opt out of LA control to gain independence and autonomy & Existing state schools & The Governing Body signs a funding agreement with the Government. & Outstanding schools go through a rapid approval process. All schools can apply to the Government. \\
\hline \multicolumn{5}{|l|}{Maintained Schools} \\
\hline  & Schools run by the LA & & LA employs staff, owns the land and buildings and determines the admission arrangements & \\
\hline Foundation and Trust schools & Schools run by their Governing Body & & Governing Body employs staff, and sets admission criteria. Land and buildings usually owned by a charity or the Governing Body & \\
\hline Voluntary Aided schools & Faith schools are usually VA schools & & Governing Body employs staff and sets admission criteria. Land and buildings usually owned by a religious organisation & \\
\hline Voluntary Controlled schools & Like VA schools but run by the LA & & LA employs staff and sets admissions criteria but the land and buildings are usually owned by a charity & \\

\end{tabular} \\
\hline Summary: & \begin{tabular}{l} 
This report scopes the issues and next steps that will inform a \\
comprehensive review of Special Educational Needs and \\
Disabilities (SEND) in Kent. The aim is to develop a SEND \\
Strategy for the children and young people of Kent that \\
articulates clear priorities for improvement, based on an \\
analysis of existing and future needs and provision, having \\
regard to local and national challenges and drivers for \\
change.
\end{tabular} \\
Recommendations: \begin{tabular}{l} 
(i) \begin{tabular}{l} 
That Members note the issues identified in the \\
Scoping Paper attached to this Report and endorse \\
the framework for the review and the development of \\
a Special Education Needs and Disabilities Strategy \\
for the children and young people of Kent:
\end{tabular} \\
That the outcomes of the review and a draft SEND \\
Strategy will be brought back to this Committee for its \\
further consideration in due course.
\end{tabular} \\
(ii)
\end{tabular}

\section*{1. Introduction}
1. (1) Following the cessation of the SEN Lead School Programme, Members agreed in September 2010 to conduct a comprehensive review of SEN policy and provision. Preliminary work has been undertaken and is detailed in the attached Scoping Paper.
(2) Through the process of developing and implementing the SEN Lead School Programme, a number of improvement issues were identified that needed to be addressed. Members therefore agreed to a comprehensive review and the development of an SEN Strategy to describe and provide a continuum of provision to meet the needs of all children and young people with SEND.

\section*{2. Financial Implications}
2. (1) There are no immediate financial implications arising from the proposal to have a review and further development of the SEND Strategy.
(2) However nearly 20\% (£187m), of the Schools Dedicated School's Grant (DSG), is invested in schools to meet additional and special educational needs of pupils in Kent. There is a lack of clarity and shared understanding across the LA at all
levels, about the approach to resourcing SEND. This is a significant amount of money which this strategic review will ensure is spent in a more appropriate and effective way to secure better outcomes. Resources and provision need to be effectively targeted to maximise best value improvements; historically the resources for SEN support have not been allocated and managed to secure optimum benefit. Therefore the current funding arrangements for SEN necessitate a reorganisation of resources which will form part of the Strategy.

\section*{3. Bold Steps for Kent and Policy Framework}
3. (1) The development of a SEND Strategy supports the delivery of Bold Steps for Kent Strategic Priorities 3 - Ensure all pupils meet their full potential and priority15-Improve services for the most vulnerable in Kent.
(2) KCC's Education, Learning and Skills Vision and priorities for improvement document details targets and priorities for schools and the LA to achieve by 2015. The targets detailed below will be met, in part by developing a SEND strategy to provide higher quality, local and more cost effective provision that improves outcomes for children and young people with SEND:
- pupils with special educational needs and disabilities in Kent will achieve better progress and outcomes than nationally
- All special schools will be good or outstanding
- The number of pupils requiring a statement of SEN will be reduced by developing more effective early intervention
- \(\quad 95 \%\) of SEN statutory assessments will be completed within required timescales
- The number of independent and non maintained special school placements will be reduced by \(10 \%\) to ensure the needs of more Kent children are met in their locality

\section*{4. Strategic Context}
4. (1) Any SEND Strategy cannot sit in isolation from other significant changes that are underway:
- Next steps for reform of SEND, following the consultation on the Green Paper last year (Government announcement expected shortly)
- Proposed changes to school funding and high needs pupils
- The raising of the participation age to 18 by 2015
- The role of schools and KCC in commissioning services
- The changes to the health service, particularly the move to neighbourhood commissioning by GP consortia and the Care Quality Commission review of health services for disabled children
(2) The strategy will also consider the proposed national changes to future funding of SEN, the work of the South East 7 SEN Pathfinder, the new guidance on Learning Difficulty Assessments for young people aged 16-25, increasing levels of delegation and devolution to schools, new ways of working including integrated local assessment and decision making and the ambitions of Bold Steps for Education as they affect children and young people with SEND.

\section*{5. Why are we having a Review?}
5. (1) The SEND Strategy is a key element of Kent County Council's (KCC) policy framework for supporting the needs of all children and young people between the ages of 0-25. The Local Authority (LA) has a statutory duty to keep under review its arrangements for special educatioßprovision.
(2) The attached Scoping Paper sets out the issues in paragraphs 9 and 10 that the strategic review will address. From our early analysis we know that:
- Children with SEND have poorer outcomes and life chances. Young people with SEND are less likely to stay in full time education after age 16 and are more likely not to be in education, training or employment then their nonSEND peers
- There is a significant gap in educational performance locally and nationally between children and young people with SEND compared to non SEND children and young people
- Day to day support to help children and young people with SEND varies hugely in schools. This is partly as a consequence of ineffective targeting of resources, partly to do with the need for more consistent high quality classroom practice and partly due to the lack of integration and joint commissioning across education, health and social care to support SEND children and young people
- In general terms parental satisfaction with services is lower for parents with children with SEND when compared to the whole parent cohort
(3) Whilst much is being done already to improve provision and the experience for children and young people with SEND, it will be difficult to achieve improvements in this period of financial challenge, without reforming our approach to secure higher quality, more cost-effective provision that improves outcomes and narrows the gap for children and young people with SEND

\section*{6. What we want to achieve?}
6. (1) The aim of the strategic review is fourfold:
- To address issues identified by stakeholders which impede the achievement of excellent outcomes for children and young people with SEND
- To determine priorities for improvements
- To ensure that the education, health and social care needs of SEND children and young people are improved through integrated working
- To more effectively target SEN resources to secure value for money
(2) It is widely acknowledged that the SEN framework is too complex and bureaucratic and needs to be simplified in order to:
- Provide earlier support ;
- Provide a more intensive focus on progress and outcomes;
- Ensure that parents get better information to make informed choices about their child;
- Deliver a more holistic integrated service for children and young people with SEND;
- Ensure school staff receive better training and development in recognising SEN and developing more effective teaching approaches;
- Ensure planning for transition to adulthood starts earlier and has a stronger focus on pathways to employment/supported living.
(3) In conjunction with the Kent Association of Headteachers (KAH) and Kent Association of Special Schools (KASS), work has already commenced on analysing the challenges for SEND in Kent and the attached Scoping Paper provides information on the quality of existing proxisiondrends and performance. The paper
also identifies many of the issues that the strategic review will need to resolve when looking at options for improvement.

\section*{7. Priority Work Strands}
7. (1) A SEN Strategy Group has been established to carry out the review and develop a draft strategy for implementation. The strategy will be supported with proposals for action. The Strategy Group comprises Headteachers, Senior Officers, practitioner representatives and other key stakeholders representing parents.
(2) The Strategy Group identified the following priority work strands to analyse issues including reviewing current provision and future needs, providing a rationale for change and setting out proposals for action that secure improvements:
I. Increase parental/carer engagement and confidence building
II. Review capacity of special schools (defining existing offer and building in future need and development)
III. Develop and identify better resourced specialist provision in mainstream schools
IV. Develop and plan post 16 provision and services
V. Review funding streams/mechanisms (delegated and non delegated)
VI. Review statutory assessment criteria and streamlining processes
VII. Build capacity in mainstream schools
VIII. Improve integrated working and joint commissioning arrangements
IX. Review the process and operation of local forums and panels
\(X\). Define and rationalise local decision making arrangements
(3) Work strand leads will be identified in May 2012 to take forward the key work strand priorities.

\section*{8. Timescale for Completion}
8. (1) A series of steps will be undertaken to develop and implement the strategy:

\section*{SEN REVIEW AND PROPOSALS FOR DEVELOPING A REVISED SEN STRATEGY: SCOPING PAPER}

\section*{A position paper to scope the issues in Kent to help identify priorities for review and the development of an SEN Strategy and Implementation Plan}

\section*{1. Introduction}
1.1 This paper scopes the position in Kent with regard to how children and young people (CYP) with special educational and/or disabilities (SEND) are supported, looks at what the data and other qualitative information tell us about the quality of provision for them and the progress they make, and identifies priorities for a review and developing an SEN Strategy.
2. Data on Children and Young People with Special Educational Needs
2.1 Kent supports its CYP with lower level special educational needs and/or disabilities (SEND) in a variety of provisions, including state-funded \({ }^{1}\) mainstream schools, pupil referral units and alternative provision. For those CYP with higher levels of need who have a Statement of SEN, they also have access to special education provision in state-funded mainstream and special schools and, as deemed appropriate, to special schools in the independent sector.
2.2 Kent has a school population of just under 233,000 and, of those, CYP with SEND are supported in stated-funded mainstream and special schools in Kent as follows \({ }^{2}\) :
\begin{tabular}{|l|l|l|l|}
\hline \begin{tabular}{l} 
Phase, including \\
academies
\end{tabular} & Statements & \begin{tabular}{l} 
School Action \\
Plus
\end{tabular} & School Action \\
\hline Nursery & 0 & 2 & 3 \\
\hline Primary & 1114 & 7634 & 14,667 \\
\hline Secondary & 1404 & 7324 & 13815 \\
\hline Special & 3027 & 0 & 0 \\
\hline Total & 5545 & 14,960 & 28,485 \\
\hline
\end{tabular}

These numbers do not include Kent CYP who attend state-funded schools in neighbouring LAs.
2.3 Those CYP with Statements of SEN which are maintained by Kent but which are not included in the above table are placed as follows \({ }^{3}\) :

\footnotetext{
\({ }^{1}\) Any school funded using public money, which includes LA maintained schools and academies, and which is free at the point of admission

\end{tabular}

\section*{3. Kent and its Statistical Neighbours (SN)}
3.1 Attached at Appendices 1 (a) to 1(c) are summaries of the comparative incidence of SEN in Kent and its Statistical Neighbours (SNs). \({ }^{4}\)
3.2 Table 1 (a) shows that Kent, along with East Sussex, Worcestershire, Staffordshire and Lancashire, supports more CYP with Statements in its schools than the number of Statements it maintains. In other words, Kent is a net importer of CYP with Statements from other LAs.
3.3 Of the statutory assessments Kent carries out, the percentage that result in Statements being issued is smaller than for its SNs. However, its placement of CYP with newly issued Statements in maintained special schools is higher than the average for the group.
3.4 Kent maintains a lower rate of Statements than its SNs, with only 2 LAs having a statementing rate which is lower. However, its percentages of CYP at School Action and School Action Plus are higher than the SN averages and so its overall SEN profile shows a higher incidence of SEN than its SNs.
4. Statutory Assessment Referrals and Statements of SEN in Kent
4.1 Attached at Appendix 2 is an analysis of statutory assessment referrals, statements issued and Statements maintained in Kent between April 2008 and December 2011.
4.2 The data show that Kent's rates of statutory assessment referral and statementing have remained stable over the past 3 to 4 years. In fact, there has been a slight fall in the number of statements issued although until the January to March 2012 figures are available, it is not known whether this trend continued for the year 2011-12.
4.3 While there are not significant changes to the number of statement issued, there are changes to the need categories identified in Statements. Autistic

\footnotetext{
\({ }^{4}\) Data taken from the Office for National Statistics publication on its website
}

Spectrum Disorder (ASD) is the category where there is the most significant increase. There is an upward trend in CYP identified with ASD and there has also been a significant downward trend in the number identified with Moderate Learning Difficulties (MLD) and Specific Learning Difficulties (SpLD).
4.4 The data show that there are considerably more CYP from other local authorities whose statements are maintained by Kent whose primary need is Behaviour, Emotional and Social Difficulties and Thanet receives a higher number of those CYP than other districts in Kent.

\section*{5. Support for CYP with Statements of SEN in Kent}

This section sets out a summary of provisions used by Kent for CYP with Statements.

\section*{Mainstream Schools}
5.1 There is a total of 2518 CYP with Statements placed in Kent state-funded mainstream schools. Within some of these mainstream schools there are specialist provisions for particular need types (formerly known as units/designations) where 735 of these CYP are placed (September 2011 figure). There are 60 such specialist provisions. Details of these provisions and placement numbers are attached at Appendix 3
5.2 The CYP who are placed in these provisions attract a per-pupil sum of money referred to as Individually Assigned Resources (IAR). It is a diminishing rate as more pupils are placed. However, there are also 614 CYP with Statements in mainstream schools but not in specialist provision who attract IAR as a result of the severity and complexity of their needs. This makes a total of 1349 CYP across all Kent state-funded mainstream schools who attract IAR.
5.4 Attached at Appendix 4 is a table showing the 2011/12 rates of IAR per CYP per need type and a breakdown of the number and allocation of funding across the need types.

\section*{Maintained Special Schools}
5.5 There are 24 special schools in Kent \({ }^{5}\) supporting \(3027^{6}\) CYP with severe and complex needs. Of the 24, 11 are for Profound, Severe and Complex Needs (PSCN) and they cover the age range from pre-school to 19. These schools are sometimes referred to as the District Special School as each district, except for Dover and Deal, is served by one. However, Dover and Deal District is served by 2 specialist PSCN units, one primary and one secondary, attached respectively to Whitfield (and Aspen Unit) Primary School and Dover Christ

\footnotetext{
\({ }^{5}\) Foxwood and Highview are part of the same federation serving the district of Shepway
\({ }^{6}\) Autumn 2011 Schools Census
}

Church Academy. Each of these PSCN units support 52 and 39 CYP respectively \({ }^{7}\).
5.6 Attached at Appendix 5 is a list of all special schools with their designated need types, designated numbers and roll numbers as at 19 January 2012.

\section*{Alternative Provision}
5.7 For a number of CYP with Statements, they need access on occasions to provision in Pupil Referral Units (PRU) (including health needs units) or to a mix of home and group tuition programmes. For other young people provision is arranged in Alternative Curriculum Programmes and there is small group of CYP who are educated at home. Those educated at home total 44 and those in other alternatives including PRUs total \(105^{8}\).

\section*{Independent and Non-Maintained Schools}
5.8 For a small but significant number of CYP with Statements, provision is arranged in schools in the independent and non-maintained sector. These schools cover a range of need types but mostly support CYP with ASD and BESD. There are 435 CYP placed in these schools, 139 of which are lookedafter CYP from other LAs and for whom Kent has the responsibility for maintaining a Statement \({ }^{9}\).
5.9 Attached at Appendix 6 Is a table showing the breakdown of placement numbers by need type, indicating those placements with funding from Health and/or Social Care.

\section*{Out of School}
5.10 As at February 2012, there are currently 42 CYP with no placements \({ }^{10}\).

\section*{Support through integrated working arrangements}
5.11 Kent has always supported inter-agency and inter-disciplinary working and practices at both an operational and strategic level to support CYP with SEND. A variety of decision-making and planning groups and forums exist at both a local and strategic level where joint protocols and arrangements, including some limited joint-funding arrangements (for example, for placements in the independent sector, therapies and the children's specialist equipment store), are in place. These working arrangements evolved over time, supported by

\footnotetext{
\({ }^{7}\) Data from MIU weekly FIO Impulse Report as at 20 February 2012
\({ }^{8}\) Data from combination of Area SEN Finance and Information Officers (FIO) working spreadsheets and MIU weekly FIO Impulse Report as at 20 February 2012
\({ }^{9}\) Data from Area SEN Finance and Information Officers (FIO) working spreadsheets
\({ }^{10}\) Data from MIU weekly FIO Impulse Report as at 20 February 2012
}
the national and local agendas, all of which have increasingly placed an emphasis on multi-agency and multi-disciplinary working. The development of these multi-agency arrangements has been on both a planned and ad hoc basis.

\section*{6. Funding for SEN}
6.1 Kent invests significant funding (nearly \(20 \%\) of the DSG) in schools and from County budgets to meet the additional and special needs of CYP. Appendix 7 shows a summary of the budgets for schools and academies, delegated and non-delegated, for the periods 2009-10, 2010-11 and 2011-12. It shows that in addition to the significant level of funding delegated to schools, there is also a significant level of non-delegated SEN funding which supports the needs of CYP. These non-delegated budgets include funding for therapies, specialist equipment and placements in the independent sector.
6.2 In addition to this funding, the budget for transport for CYP with statements is £17m.
6.3 The above budgets do not include funding that comes from other agencies to support the special educational needs of CYP. For example, Education is not the only provider of services for schools. Health is also a key commissioner of therapy services for schools. Health and Social Care also joint fund some of the placements in the independent sector (see Appendix 6).

\section*{7. Attainment}
7.1 Appendix 8 sets out the KS2 outcomes for SEN pupils and non-SEN pupils. Overall, the number of Kent pupils with SEN at key Stage 2 who achieved Level 4 in English and Maths in 2011 was one percent below the national average. If we look individually at School Action, School Action Plus and Statutory Action (Statements), there was one percent more CYP supported at School Action Plus who achieved Level 4 in English and Maths in 2011 than the national average. The number who achieved Level 4 at School Action and Statutory Action were respectively two percent and one percent below the national average. The gap between SEN pupils and non-SEN pupils at KS2 is greater in Kent than nationally, standing at \(53 \%\) as opposed to \(52 \%\) nationally.
7.2 Appendix 8 also sets out the KS4 outcomes for SEN pupils and non-SEN pupils. More Kent pupils at both School Action and School Action Plus achieved 5 GCSE A* to C grades in English and Maths than this cohort did nationally in 2011. However, for pupils with Statements, the percentage who achieved at this level was one percent lower than the national figure.
7.3 At both key stages 2 and 4, the data show that Kent pupils receiving free school meals do much less well than the average nationally for this cohort of pupils, whether they are at KS2 or KS4.

\section*{8. Effectiveness of Kent SEN provision}
8.1 All pupils with SEN at all stages of the Code of Practice are enrolled in every school in Kent so it is very important that all schools make effective provision for them. Pupils with statements of SEN can also be enrolled in any school, but the numbers are highest in special schools and mainstream schools with specialist mainstream provision.
8.2 An analysis of the overall effectiveness judgement from each school's latest Ofsted inspection (summary attached at Appendix 9) shows that although the difference between secondary schools with a specialist mainstream resource and those without a specialist mainstream resource is small (69\% good or better for those without versus \(64 \%\) good or better for those with), the difference for primary is much greater ( \(75 \%\) good or better for those without versus \(37 \%\) good or better for those with).
8.3 The quality of provision in special schools (79\% good or better) is the highest of all, with pupil referral units ( \(57 \%\) good or better) the second lowest.

\section*{9. Issues to be addressed}

\section*{SEN Review September 2010}
9.1 Following the cessation of the Lead School Programme, Members agreed in September 2010 to carry out a comprehensive review of SEN policy and provision. Through the process of developing and implementing the Lead School Pilot there were a number of improvement issues identified that needed to be addressed:
- There was generally a lack of clarity or shared understanding across the LA at all levels and among all groups on what the SEN strategy, policies and operational procedures comprised
- There was a failure to manage demand effectively, whether the demand came from schools, other agencies, LA services or parents/carers.
- The current statutory assessment criteria had been in place for approximately 11 years and were in need of review
- A significant level of funding was available directly to maintained special and mainstream schools and academies. However, historically, the nature and level of this support and how it was intended to be used, had not been as clearly spelt out by the Local Authority as it could have been. Challenge to schools on how they supported children with SEN had been limited and the process had not been sufficiently robust or universally applied.
- The level of health services, such as speech therapy, occupational therapy, physiotherapy and nursing, was insufficient to meet needs and those services that were available were patchy, with great variations in service level between one locality and another.
- There was often a mismatch between the views of schools and parents on delivering therapy interventions and the views of those of professionals managing and commissioning the services.
- Parents and many professionals had insufficient confidence, whether justified or otherwise, in local SEND provision.
- There was inadequate provision in both mainstream and special schools to meet the needs of children and young people with Autism Spectrum Disorder and Behavioural, Emotional and Social Difficulties.
- Provision for children and young people with severe and complex special educational needs was not sufficient or adequate at the early years or post-16 phases
- There was still a significant number of Kent maintained special schools that were not able to reach their designated capacity due to the limitations of their buildings both in size and the suitability of the accommodation
- There was a lack of a robust evaluation framework for special educational needs provision and services
- There was increasing reliance on out of county placements.
9.2 Most of these issues still remain and will need to be addressed through the SEN Strategy review. Their consequences continue to be felt and they are:
a) There is a significant level of inconsistency and inequality in delivering services and managing budgets
b) The LA often finds it difficult to effectively discharge its statutory responsibilities and making referrals for statutory assessment/seeking additional funding/resourcing is often seen as a solution to an SEN problem rather than the means to achieving better learning and progress
c) Referrals for statutory assessment are high and rising.
d) There are still many schools who do not feel they can meet the needs of children and young people with special educational needs without additional funding and some do not fully appreciate how they should be using the funding they receive.
e) There are still too many children being identified as having special educational needs when they are lower attaining and their lack of progress is due to poor teaching
f) Children are too often educated too far from home, travelling long distances to school or placed in residential provision within both maintained and nonmaintained provision
g) Too many children are placed in out-county provision and decisions to place are not taken within the context of an agreed multi-agency strategy where placements are positive decisions as opposed to a reaction to an urgent situation
h) Increasing numbers of parents/carers seek assessments from the independent sector, putting additional pressures and demands on resources.
i) It is difficult to defend services where we want to convince parents, professionals, Tribunals, the courts, the Ombudsman and others that our services and provision are good.
j) There is a disagreement between Education, Social Care and Health about where responsibility lies for meeting needs of some children and this acts as a barrier to effective multi-agency working.

\section*{10. Conclusions}
10.1 Much of the data and information provided in this scoping paper reinforce the issues and their consequences that were previously identified and as set out in section 9 above. They do not need to be repeated as they remain issues for resolution but there are some points that are worth drawing further attention to:
a) Compared with its SNs, Kent over-identifies CYP with special educational needs at School Action and School Plus and, although it compares more favourably nationally in a modest way, there are considerably more children identified at KS2 at School Action than there are nationally (27\% and 22\% respectively).
b) While the rate of statementing in Kent (2.8\% in 2011) is lower than the average for its SNs, the level of delegation to Kent schools is high and statements are often issued when there is no additional funding being made available to the school. Further, Kent CYPs with Statements are more likely than their SNs to be placed in specialist provision and among those SN authorities KCC has a high rate of placement in the independent sector.
c) While overall Kent invests generously in SEN provision, there are inequalities across the County where some areas of Kent are better served by some services than others. In particular, this happens in relation to the provision and in relation to the various health services such as speech therapy and nursing care.
d) When the Special School Review was undertaken in the early half of the 2000s, schools were re-designated in terms of both their need types and numbers (including post-16 numbers for PSCN schools) and new admissions criteria were defined. A capital programme was planned to ensure that each special school was either rebuilt or underwent significant refurbishment. However, over the past 10 years, there has been considerable pressure on special school places. Much of this pressure comes from the need to secure suitable post-16 provision for young people in PSCN schools and from pressure to find suitable provision for CYP with ASD. The situation has been compounded by the fact that the planned Capital Programme was not able to be progressed because of the current financial situation and the need to implement budget cuts.

Consequently, a remaining group of 10 schools have been unable to continue to admit pupils to realise their designated numbers. These schools are currently the subject of a revised Capital Programme that is seeking to deliver accommodation within a more restricted budget.
e) While all PSCN special schools have specialist nursery provision, this provision has never been formally prescribed nor have any admissions criteria been defined nor a funding formula developed.
f) The SEN legislation and the SEN Code of Practice have been written specifically to deal with the matter of arranging provision for CYP but there is a very significant overlap between CYP with special educational needs and CYP with disabilities A strategy should seek to develop policy, provision and services to support both disabled CYP and CYP with SEN in a more integrated way.
g) Despite the good practice in Kent, integrated working has often been left to the goodwill and commitment of people, leaving much to chance and creating inequalities and inconsistencies often leading to ineffectiveness and inefficiencies. Integrated working has not been sufficiently embedded through joint arrangements that maximise the possibilities for joint assessment, decision-making, commissioning (including managing joint budgets), planning and review. This makes life very frustrating for parents who have to deal with too many different professionals to secure the right provision for their child.
h) Kent does not have provision that is sufficient and/or suitable for young people with special educational needs when they reach the end of their schooling at age16. Further, the arrangements and processes for managing the needs of this group of young people, including the transition period into \(6^{\text {th }}\) form/further education and/or supported living are not sufficiently or effectively developed. Added to this is the need to plan for the implementation of the government agenda, set out in the recent SEN Green Paper, to secure appropriate provision and services for CYP from 0 to 25 years of age as part of the local offer.

\section*{11. Work to date following from the 2010 SEN Review process}
11.1 Although there remains a number of areas of work to develop as part of an SEN Strategy, there were, as part of the SEN Review commenced in September 2010, two key pieces of work completed (although not yet formally adopted by Council) and two other pieces of work partially completed. The pieces of work completed are set out below.

\section*{Mainstream minimum standards (Core Offer)}
11.2 This work to define and describe mainstream minimum standards, or the core offer in mainstream schools, has been completed and sets out very clear the expectations of schools in meeting the needs of CYP with SEN using the school's own resources. It seeks to:
- Provide parents with information as to what they can expect from schools
- Help professionals, including schools themselves, understand what is expected of them
- Help clarify where a CYP needs access to support that is additional to and different from that which a school can provide from its budget

\section*{Specialist mainstream provision}
11.3 For a significant number of CYP with severe and complex needs, they require access to specialist provision in a special school or in specialist mainstream provision (unit) with additional funding, or in a mainstream school without specialist mainstream provision but also with additional funding. The Review undertook a piece of work here, firstly to describe the offer that should be available to CYP with severe and complex needs in mainstream schools and, secondly, to define the criteria for access to additional funding (Individually Assigned Resources IAR) to support those needs.
11.4 The Criteria for IAR document sets out, under the headings Qualifications Skills and Expertise of Adults, Environmental Factors and Support, Equipment and Technical Access to Curriculum, the ways in which schools should be supporting CYP across all need types and clarifies what is expected of them before additional funding is made available.

\section*{Admissions criteria for PSCN special schools}
11.5 A small working group undertook some work to revise the admissions criteria for PSCN special schools. A draft document was prepared. No work has been undertaken on refining the admissions' criteria for other Kent special schools.

\section*{Local decision-making forums}
11.6 A first attempt at drafting a set of local decision-making arrangements was prepared although the draft was shared no further than the original SEN review steering group. The current arrangements that are in progress for the devolution of Specialist Teaching Service staff to special schools may provide the basis for developing local decision-making forums for the future.

\section*{12. The way forward}
12.1 This paper highlights a number of areas requiring development and where specific pieces of work need to be taken forward with a view to identifying a clear agenda for action. The attached cover paper sets out the proposed work streams to deliver this agenda together with a timescale for implementation.

}

To: Education Cabinet Committee - 9th May 2012
Subject: Review of AC/PRU Provision
Classification: Unrestricted
Summary: \(\quad\) This report outlines the background to the review of Pupil Referral Units and Alternative Curriculum provision across the County, gives the principles underpinning the review and recommends and 5 options for change.

Recommendations Members are asked to endorse the principles underpinning the review and approve the five options for change

\section*{1. Introduction}

1 (1) This report sets out the background to the review of Pupil Referral and Alternative Curriculum Provision, identifies priorities for improvement and provides members with the outline of the consultation process. This review is an opportunity to engage partners in identifying opportunities to improve outcomes for 11 - 19 year olds, excluded from school or at risk of disengagement in learning programmes.
(2) During the process of review, there will be opportunities to shape the recommendations for a different approach to educating pupils who are excluded, or who need time out of school or who would benefit from alternative provision from age 14 onwards.
(3) This will be achieved by:
- Improving inclusion strategies across the county in both schools and PRU/AC provision. In some areas of the county these are excellent inclusion and preventative strategies which significantly reduce the number of permanent exclusions. These need to be shared and developed across the county
- Providing high quality 'Time out' placements within the KS3 PRUs with robust reintegration support.
- Ensuring that learners with additional needs who are at risk of permanently disengaging are identified and their needs are met to prevent exclusion
- Developing robust referral systems across groups of schools, which also provide opportunities for managed moves
- Providing KS4 Alternative Curriculum provision which leads to higher levels of learning (including English and Maths) and appropriate progression pathways up to age 18.
(4) The initial stages of this review have been informed by a scoping document which has been shared with Headteachers and PRU/AC Curriculum managers. The
feedback from this preliminary work has informed the 5 options for change outlined in this report in section 5.

\section*{Background to the PRU/AC Review}
2. (1) The review of PRU and AC provision is underpinned by a number of national drivers for change for excluded pupils, pupil referral units and alternative curriculum including:

\section*{(i) New Requirements within the Education Act 2011}

The Education Act 2011 aims is to support staff in maintaining a safe and well ordered environment that is conducive to learning and allows pupils to reach their full potential. This includes learners who are excluded from schools and academies.

Exclusion from school does not mean exclusion from education. The Local Authority duty is to provide suitable full-time alternative education for any permanently excluded pupil of compulsory school age from the sixth day of the exclusion*. Pupils who have been excluded from school, or for some other reason cannot attend mainstream school, can receive their education in alternative provision which includes local authority Pupil Referral Units (PRUs).

\section*{(ii) Raising of the Participation Age by 2015}

The Education and Skills Act 2008 legislated to raise the age of compulsory participation in education or training to the end of the academic year in which young people turn 17 in 2013 and to their 18th birthday in 2015, helping to ensure that every young person has the opportunity to gain skills and qualifications that enable them to progress to higher education, work and adult life. The vast majority of 16-17 year olds already participate in post-16 education or training, but there is a significant minority, often the most vulnerable who do not. The Local Authority has a duty to:
- Promote the effective participation in education or training of all 16 and 17 year olds resident in their area by 2015
- Make arrangements to identify young people resident in their area who are not participating and secure appropriate provision.

\section*{(iii) Taylor review of Alternative Provision: Department of Education Report}

There are 28 recommendations contained within the Taylor report, which provides a useful framework for discussion particularly within the context of this review. It is hoped that Headteachers and Stakeholders will consider this report when considering the options for change.

\section*{(iv) The Education Commissioning Plan}

As a result of publishing the draft Education Commissioning Plan we are setting out proposals for the development of new and improved education provision in Kent. The review of the PRUs and alternative provision will inform our future commissioning intentions for this provision.
(v) Bold Steps for Education, Learning and Skills

The review is designed to help us achieve our targets for 2015 set out in Bold Steps, which are to reduce exclusions, improve alternative curriculum provision and vocational pathways so that more young people will stay in education and work based training until age 19, reduce NEETs, and improve outcomes for all young people, especially the most vulnerable, at ages 16 and 19 so that gaps in achievement reduce.

\section*{Exclusions in Kent}
3. (1) There is a high level of permanent exclusion in Kent, with variation across the districts. A high proportion of excluded pupils have special educational needs. While permanent exclusion may be necessary in some cases, in response to a specific serious incident or as a result of the risk of harm to pupils, in many cases it is possible to manage improvement, or a move to another school or a period of alternative provision.
(2) For this reason through the review there will be a move to ensure there are fewer permanent exclusions, and this can be achieved by changing the way pupils are supported and changing how arrangements for alternative provision are made.
*Foot note: Need to check implications with DoE of RPA
(3)

Table 1: Permanent Exclusions, 2006/07 to 2009/10
\begin{tabular}{|c|c|c|c|}
\hline & \multicolumn{3}{|c|}{ Permanent Exclusions } \\
\hline Year & Primary & Secondary & Total \\

\section*{Current Overview of PRU/AC Provision in Kent}
4. (1) Kent currently has a wide range of PRUs for KS1, KS2, KS3 and KS4 alternative provision, which fall into four categories.
(i) One KS 1, 2, 3, 4/5 PRU: the North West Kent Behaviour Service. This is an interim arrangement pending the outcome of this review. This service supports learners across Dartford/Gravesham and North Sevenoaks.
(ii) Key Stage 3 PRUs

(2) Warm Stone: This PRU provision meets the needs of learners who have been excluded from special schools, particularly out of county providers.

\section*{Options for the review of PRU/AC Provision}
5. (1) The current organisational structure and pattern of PRU/AC provision across the county as outlined in section 4 varies considerably. This review seeks to address these inequalities and will ensure that young people have appropriate and consistent support when required.
(2) It is clear from the evidence collected in scoping this review and through meetings with headteachers that in some areas of the county there are significant issues around the quality of accommodation, learning outcomes and progression pathways for young people. Improving learner outcomes is central to this review. This will include developing successful reintegration programmes which lead to appropriate high quality curriculum pathways (including English \& Maths) to age 18.
(3) The number of learners who are permanently excluded also varies considerably between schools and districts. Overall, across Kent, the number of permanent exclusions is high and includes one of the highest rates of exclusion of SEN learners the country. An intended outcome of this review will be to reduce the number of permanently exclusions significantly by 2015 to no more than 50.
(4) The funding and resource allocations for the PRU/AC programmes are based on historical patterns of provision, not on a profile of need in localities or individual learners. Therefore, it is difficult to assess best value on the use of the \(£ 15.9\) million allocated to the PRU and AC provision through DSG allocations. The review will seek to make better use of this resource in the short and medium term and ensure that at a local level the use of this funding can be effectively monitored and evaluated.
(5) There is evidence of good practice across the county. One of the keys to this success is where there are effective working relationships between schools, PRUs and Alternative Curriculum providers, particularly where there are robust systems in place to consider referrals to KS3 and KS4 provision (and in the future KS5). PRU and AC provision is also more successful when schools are directly involved in the decisions regarding the programme offer, delivery, quality assurance and when learners who are not permanently excluded remain on a school role.
(6) The review seeks to ensure that when planning provision, local opportunities on offer to young people will be seen as an integral part of the wider curriculum offer and there is sufficient flexibility to provide a personalised programme to meet individual learners' needs. The aim is to deliver high quality and appropriate curriculum options for young people with positive destination pathways in all districts in Kent. The review will inform future commissioning of local provision that is designed to meet local needs, and will inform the plans set out in the Education Commissioning Plan.
(7) The Principles of this review seek to;
- Develop effective, local planning and referral systems in collaboration with all Schools, FE Colleges, PRU/Alternative Curriculum providers and with other partner agencies for learners who are at risk of disengaging or exclusion from School or College.
- Provide high quality placements including provision for English and Maths to help young people to re-engage in learning, enabling them to progress into higher levels of learning and/or employment post 16.
- Deliver the Bold Steps targets to reduce exclusions, improve alternative curriculum provision and vocational pathways so that more young people will stay in education and work based training until age 19, reduce NEETs, and improve outcomes for all young people, especially the most vulnerable, at ages 16 and 19 so that gaps in achievement reduce.
- Enable and support different District models of delivery and coordination best suited to reduce exclusions and improve outcomes for young people
- Ensure there is robust information and data sharing between Schools, FE Colleges and other providers to identify early intervention strategies, track progress and improve learner outcomes.
- Implement a successful quality assurance system across Schools, FE colleges and PRU/ Alternative curriculum provision.

\section*{(8) Proposed 5 Options for Consultation}

Following meetings with Headteachers and PRU/AC managers 5 options for further discussion are being put forward as part of the consultation, these are
\begin{tabular}{|l|l|l|}
\hline Options & Action & Outcome \\
\hline One & \begin{tabular}{l} 
Delegation of PRU/AC \\
resources to all schools by \\
formula, no central retained \\
services. This would include \\
preventive work and funding \\
for all PRU/AC provision
\end{tabular} & \begin{tabular}{l} 
This would require all schools in a \\
given district or locality to work \\
together to ensure quality \\
provision for excluded pupils and \\
those at risk of exclusion. \\
Schools individually would have to \\
commission provision as \\
appropriate.
\end{tabular} \\
\hline \begin{tabular}{l} 
Two \\
Full Delegation to a lead school
\end{tabular} & \begin{tabular}{l} 
Delegation to an agreed \\
lead school, to manage and \\
deliver preventive work and \\
placements for learners in \\
PRU/AC provision within a \\
designated geographical \\
area on behalf of all schools \\
in the locality.
\end{tabular} & \begin{tabular}{l} 
A school in the locality would \\
become the lead accountable \\
body for funding and overseeing \\
the PRU/AC provision on behalf \\
of a group of schools
\end{tabular} \\
\hline \begin{tabular}{l} 
Three
\end{tabular} \\

Delegation to an agreed \\
lead PRU as above in option \\
2
\end{tabular} & \begin{tabular}{l} 
A PRU in the locality would \\
become the lead accountable \\
body for funding and overseeing \\
the PRU/AC provision on behalf \\
of schools in the locality
\end{tabular} \\
\hline \begin{tabular}{l} 
Four \\
Split Delegation \\
1. Funding to schools for
\end{tabular} & \begin{tabular}{l} 
Delegate all funding for \\
preventative work to schools
\end{tabular} & \begin{tabular}{l} 
Page 240 \\
Schools would have to provide \\
appropriate support and identify
\end{tabular} \\
\hline
\end{tabular}
\begin{tabular}{|l|l|l|}
\hline \multicolumn{1}{|c|}{ preventative work } & one formula basic & \begin{tabular}{l} 
early intervention strategies for \\
pupils at risk of disengaging. A \\
lead School or PRU would be the \\
2. Devolve funding for PRU/AC \\
provision to school or PRU
\end{tabular} \\
\hline \begin{tabular}{l} 
Devolve funding for PRU/AC \\
provision to lead School or \\
PRU who would develop \\
programmes to meet local \\
needs.
\end{tabular} & \begin{tabular}{l} 
overseeing KS3/KS4/KS5 for for \\
provision on behalf of the other \\
schools in a locality.
\end{tabular} \\
\hline \begin{tabular}{l} 
Five
\end{tabular} \\
\begin{tabular}{l} 
Status Quo, no change \\
Funding continued to be \\
allocated to current PRU/AC \\
provision
\end{tabular} & \begin{tabular}{l} 
Funding is allocated to \\
PRUs/AC working in \\
partnership with schools \\
(Current system)
\end{tabular} & \begin{tabular}{l} 
PRUs/AC would remain the \\
accountable body for funding and \\
would continue to meet local \\
needs in consultation with schools
\end{tabular} \\
\hline
