

Item 7: Kent and Medway Specialist Vascular Services Review

By: Kay Goldsmith, Scrutiny Research Officer to the Kent Health Overview and Scrutiny Committee

To: Kent and Medway NHS Joint Overview and Scrutiny Committee, 17 March 2021

Subject: Kent and Medway Specialist Vascular Services Review

Summary: This report invites the Kent and Medway NHS Joint Overview and Scrutiny Committee to consider the information provided by NHS England & NHS Improvement Specialised Commissioning South East.

It provides background information which may prove useful to Members.

1. Introduction

- (a) Vascular services manage the treatment and care of patients with vascular disease relating to disorders of the arteries, veins, and lymphatic system. The diseases can be managed by medical therapy, minimally invasive catheter procedures and surgical reconstruction.

2. Background

- (a) In 2014, an NHS review commenced into the Vascular Services serving the East Kent and Medway populations. The services provided in North and West Kent are not included in the review.
- (b) The case for change was agreed in 2016 and a review process identified a clinical “hub and spoke model” (i.e., a single inpatient hub in Kent & Medway supported by a number of spokes across the region).
- (c) The broad clinical agreement was that in the long term, an arterial centre (the inpatient hub) should be located in East Kent (subject to consultation). The exact location in East Kent will be determined by the outcome of the East Kent Transformation Programme which is still ongoing. There is therefore a need for an interim solution.
- (d) The proposed interim solution is for a single arterial centre to be housed on the Kent and Canterbury Hospital site, with a non-arterial centre on the Medway Maritime Hospital site.
- (e) At their meeting in February 2020, JHOSC were informed how pre-engagement events that had taken place during 2019 had seen a low attendance rate. Further engagement/ consultation was planned and NHSE would seek to involve relevant third sector organisations.

Item 7: Kent and Medway Specialist Vascular Services Review

- (f) Also, in February 2020, the Committee were notified that there had been an emergency move of the Abdominal Aortic Aneurism Repair (AAA) service from Medway Maritime Hospital to the Kent and Canterbury Hospital. This was required following staff shortages in December at the Medway site which led to concerns over patient safety. Patients would still receive their assessment at Medway Maritime Hospital, it would only impact AAA intervention and emergency surgery.

3. Joint Scrutiny

- (a) Regulation 23 of the Local Authority (Public Health, Health and Wellbeing Boards and Health Scrutiny) Regulations 2013 requires relevant NHS bodies and health service providers to consult a local authority about any proposal which they have under consideration for a substantial development or variation in the provision of health services in the local authority's area. This obligation requires notification and publication of the date on which it is proposed to make a decision as to whether to proceed with the proposal and the date by which Overview and Scrutiny may comment.
- (b) The Medway Health and Adult Social Care Overview and Scrutiny Committee (HASC) considered the Kent and Medway Specialist Vascular Services Review on 11 August 2015. They determined that the reconfiguration constituted a substantial variation in the provision of health services in Medway.
- (c) The Kent Health Overview and Scrutiny Committee (HOSC) considered the item on 17 July and 9 October 2015. The Committee also deemed the changes to be a substantial variation in the provision of health services in Kent.

As both health scrutiny committees declared the St Martin's proposals to be a substantial variation, formal scrutiny passed to a joint committee. In line with Regulation 30 of the Local Authority (Public Health, Health and Wellbeing Boards and Health Scrutiny) Regulations 2013 the Kent and Medway NHS Joint Overview and Scrutiny Committee (JHOSC) may:

- i. make comments on the proposal;
 - ii. require the provision of information about the proposal;
 - iii. require the relevant NHS bodies and health service providers to attend before it to answer questions in connection with the consultation.
- (d) The legislation makes provision for local authorities to refer a substantial variation of service to the Secretary of State in certain circumstances. The JHOSC cannot itself refer a decision to the Secretary of State but may

Item 7: Kent and Medway Specialist Vascular Services Review

recommend a course of action to the relevant Overview and Scrutiny Committees.

- (e) The JHOSC most recently considered the Vascular Services reconfiguration at its meeting on 6 February 2020. The Committee resolved that the report be noted.
- (f) NHS England & NHSE Improvement Specialised Commissioning South East have provided the attached update paper for the Committee to inform them on progress since February 2020. They have also attached the more detailed report from February 2020 for Member's information.
- (g) This is a written briefing only with no guests present to speak.

4. Recommendation

The JHOSC is invited to note the report.
