17. Are there any positive impacts for all or any of the protected groups as a result of the activity that you are doing? Answer: Yes/No

Yes

18. Please give details of Positive Impacts

To improve the experience of the people supported through the current contract, their carers and families. People that we support include those from protected characteristics groups including: Age; Disability; Religion; Race; and Carers.

To stabilise and ensure there is a sustainable day opportunities market going forward that can support vulnerable people in Kent.

Although the recommission of this service will sustain the service to individuals with learning disabilities and/or individuals living with a physical disability, the savings currently identified for people over 26 may result in a change of opportunities sessions available through the contract. It is proposed to mitigate some of this risk through the procurement, by requesting flexible fees depending on the activity / support delivered and to work with providers and people we support through utilising various methods of payment through a self-directed support approach, such as direct payments and individual service funds.
