\*Each risk is allocated a unique code, which is retained even if a risk is transferred off the Corporate Register. Therefore, there will be some 'gaps' between risk IDs.

NB: Current & Target risk ratings: The 'current' risk rating refers to the current level of risk taking into account any mitigating controls already in place. The 'target residual' rating represents what is deemed to be a realistic level of risk to be achieved once any additional actions have been put in place. On some occasions the aim will be to contain risk at current level.
