

HEALTH OVERVIEW AND SCRUTINY COMMITTEE

26 November 2011

1. Committee Topic Discussion.

(Item 9)

(1) Members discussed the item on primary angioplasty and felt that the concerns raised during the discussion had been dealt with in a most satisfactory manner.

(2) On returning to the request that the Committee consider CAMHS as a matter of urgency, a range of views were expressed including whether the topic could best be approached by breaking it apart into different aspects and whether it would be more useful to wait six months given the recent publication of the Ofsted report into safeguarding children. Due to its cross-cutting nature, Paul Wickenden, the Overview Scrutiny and Localism Manager, undertook to bring the matter to the attention of the Scrutiny Board to discuss what would be the most appropriate forum for the subject.
