

Amended Fees & Charges for 2008/09 and 2009/10

A report by the Director of Kent Highway Services to the Highways Advisory Board on the 16th September 2008

Introduction

1. This report seeks approval of amended fees and charges for 2008/09 (and 2009/10) in respect of a wide range of services provided by Kent Highway Services. The Local Government Act 2003 (Section 93) provides the power for charging for discretionary services but also stipulates that local authorities may only cover their reasonable costs in providing such services. This year fees were originally set for 2008/9 based on an approximate increase of 3%. This was in line with the anticipated rise in staff and administration costs. It has now become necessary to amend these charges due to additional increases in energy and other extraordinary costs. The current fees and charges will increase by approximately 10% and incorporate a degree of rounding up.
2. In order to prevent undue additional administration costs it is intended that the proposed new charges will be maintained through to March 2010. The increase is in line with the anticipated E&R budget increases for 2009/10.
3. This report is supplementary to the original report by the Director of Highways to the Highways Advisory Board on the 8th January 2008 and the report 'Income for Kent Highway Services' by the Alliance Executive to the Alliance Board on the 28th August 2008.

Conclusion

4. Subject to the views of the Board the proposed amended Fees & Charges for 2008/09 and 2009/10 as set out in Appendices 1 and 2 will be recommended to the Cabinet Member for Environment, Highways & Waste for implementation with effect from 1st December 2008.
