

To: Kent Flood Risk Management Committee – 11 March 2014

From: Michael Hill, Cabinet Member, Customer and Communities

Subject: Environment Agency Flood Alerts and Warnings and KCC flood response activity since last meeting.

Classification: Unrestricted

Summary: To update Kent Flood Risk Management Committee on Environment Agency Flood Alerts and Warnings and KCC flood response activity since the last meeting of the Committee on 18th November 2013. Members are requested to note this report.

1. Background

1.1 KCC Emergency Planning and the Call Centre receive Environment Agency Flood Alerts and Warnings by e-mail and fax on a 24 hour 7 days a week basis. Impacts upon communities, infra-structure and the wider environment are assessed and a response mobilised as required.

1.2 Some 70,000 properties in Kent are located within areas at risk of fluvial or tidal flooding. Where practically possible, these properties are offered a Flood Warning Service by the Environment Agency. However, other parts of the county are also potentially vulnerable to surface or ground water flooding. Early warning of flood risk to communities (including areas outside of floodplains) is delivered through Flood Guidance Statements, Severe Weather Warnings and Severe Weather Advisory Group.

1.3 Environment Agency Flood Alerts are issued earlier than a Flood Warning, to provide advance notice of the possibility of flooding. Rivers levels will be high, and flooding of low lying land and roads is possible. Tidal Flood Alerts will correspond with high tides, and/or significant waves, with some spray overtopping and flooding of low lying land and roads possible. Property flooding is not expected, but the Alert does serve as an early warning, and may precede Flood Warnings. The Flood Alert is issued in order that the public, the emergency services, local authorities and other bodies are aware of an increasing chance of flooding and take appropriate preparatory action.

1.4 Flood Warnings are used to warn that flooding of property is expected and that immediate action should be taken to protect life and property. They are issued when flooding of homes and businesses is expected. The Environment Agency aim to issue Flood Warnings at least two hours before the onset of an event where property is at risk of flooding.

1.5 Severe Flood Warnings are issued to warn of significant risk to life or disruption to the community from widespread or prolonged flooding. Property owners, the public at risk, the emergency services, and local authorities should act to protect life and property. This is likely to involve an enhanced response and the commitment of significant resource, in terms of personnel, assets and expenditure.

Wherever possible, the decision to issue a Severe Flood Warning will be taken in consultation with multi-agency partners.

2. Latest situation

2.1 Reference in the last update report to Kent Flood Risk Management Committee to a need to maintain vigilance in response to a growing flood risk has clearly borne-out by events. Since that meeting on 18th November 2013 a total of 63 Flood Alerts, 41 Flood Warnings and 5 Severe Flood Warnings were issued¹.

2.2 In addition 87 Severe Weather Warnings covering Kent were issued by the Met Office (including 58 for heavy rain)².

2.3 The Thames Barrier was closed for flood defence purposes on 49 occasions.

2.4 A total of 66 flooding related incidents were reported to the 24/7 KCC Emergency Planning Duty Officer over the same period, encompassing fluvial, ground and surface water flooding, subsidence and reservoir safety interventions.

3. Next Steps

3.1 KCC is leading the ongoing recovery phase for recent storm and flood events, working with a range public and private sector partners.

3.2 Groundwater flooding continues to impact upon communities in areas of east and north west Kent, where KCC maintains an operational response.

3.3 A multi-agency debrief meeting to address the winter 2013/14 storms and flooding is scheduled for 21st March.

3.4 A review of the KCC response to the recent severe weather is underway, led by the Emergency Planning Manager, with a report to be presented to Cabinet in May, and the Kent Flood Risk Management Committee in July.

4. Recommendations

4.1 That Members:

- Note the level of alerts received since the last meeting of the Kent Flood Risk Management Committee; and
- Contribute any additional matters arising from debate by the Committee.

Tony Harwood, Senior Emergency Planning Officer, Customer & Communities
