| EYPS 12   | Implementing the new Children & Families Act 2014                 | 6                         | 4                        |

<sup>\*</sup>Each risk is allocated a unique code, which is retained even if a risk is transferred off the Corporate Register. Therefore there will be some 'gaps' between risk IDs.

NB: Current & Target risk ratings: The 'current' risk rating refers to the current level of risk taking into account any mitigating controls already in place. The 'target residual' rating represents what is deemed to be a realistic level of risk to be achieved once any additional actions have been put in place. On some occasions the aim will be to contain risk at current level.

| Likelihood & Impact Scales |                   |              |              |            |                 |  |  |

| Risk ID EYPS 05 Risk Title  | School Provision Planning – Ca  | apital Budget Pressures   |   |  |  |
|---|---|---|---|--|--|
| Source / Cause of risk  A significant expansion of schools is required to accommodate major population growth in the short term to medium term (primary age) and long term (secondary age). The "Basic Need" capital grant for DfE will not fund the expansion in full. A funding gap to deliver the programme for schools will be created by cost pressures from higher than expected build costs, low contributions from developers and sudden increases in pupil demand. | Risk Event  The expansion required may not be delivered, meaning that KCC is not abler to provide appropriate school places | Consequence The duty to provide sufficient school places is not met | Risk Owner Kevin Shovelton, Director of Education Planning and Access | Current Likelihood Possible (3)  Target Residual Likelihood Possible (3) | Current Impact Significant (3)  Target Residual Impact Significant (3) |
| Control Title  Alternative strategies could be employed if required to reduce the impact of risk consequences e.g. more temporary solutions, scaling back of maintenance.  Kevin Shovelton, Director Planning and Access  |   |   |   |  |  |

| Risk ID EYPS 06 Risk Title  | More schools will move into a   | potentially deficit budget po  | osition  |   |  |
|---|---|--|--|---|--|
| Source / Cause of risk  The fourth year of a "flat cash" DSG settlement for schools coupled with major national changes to school funding and the formula will put serious pressure on the budgets of a number of schools – especially those with falling rolls – in the short to medium term. Secondary schools are also expressing additional pressures as a result of national changes in the 6 <sup>th</sup> form funding. Also changes in the Ofsted frameworks resulting in more schools moving into category. Experience shows that the additional costs | Risk Event  More schools will move into a potentially deficit budget position | Consequence There will be pressure on school budgets with knock-on consequences as they make budget savings to balance the budget. There will be increased pressure on the central redundancy budget and also increasing demands upon Schools Financial Services. SPS (Schools Personal Service) and School Improvement. There may also be a | Risk Owner Patrick Leeson, Corporate Director Education and Young Peoples Services | Current Likelihood V. | Risk ID EYPS 10 Risk  | Title Non-integrated data infor   | mation systems  |  |   |   |
|---|---|---|--|---|---|
| Over a period of time, the number of data collection systems has increased. There is a great deal of duplication and a lack of consistency in the data, and none of the systems are integrated with each other. This is leading to an un-coordinated approach towards working with children and young people. Although we are taking steps to procure a management system that should be in place by the end of 2014 or early 2015. | Risk Event There is a risk that staff will be working with incomplete information on children or YP due to the amount of data and systems that are collecting the data. | Consequence  If staff work with incomplete data on children or YP it may lead to safeguarding issues for the child and reputational issues for the Authority. In addition, performance is presented in an uncoordinated manner due to inconsistency of the systems. | Risk Owner Katherine Atkinson, Performance and Information Manager | Current Likelihood Likely (4)  Target Residual Likelihood  Unlikely (2) | Current Impact Serious (4)  Target Residual Impact Moderate (2) |
