Adult Social Care Dashboard

December 2014

Key to RAG (Red/Amber/Green) ratings applied to KPIs

GREEN	Target has been achieved or exceeded
AMBER	Performance is behind target but within acceptable limits
RED	Performance is significantly behind target and is below an acceptable pre-defined minimum *
^	Performance has improved relative to targets set
•	Performance has worsened relative to targets set

* In future, when annual business plan targets are set, we will also publish the minimum acceptable level of performance for each indicator which will cause the KPI to be assessed as Red when performance falls below this threshold.

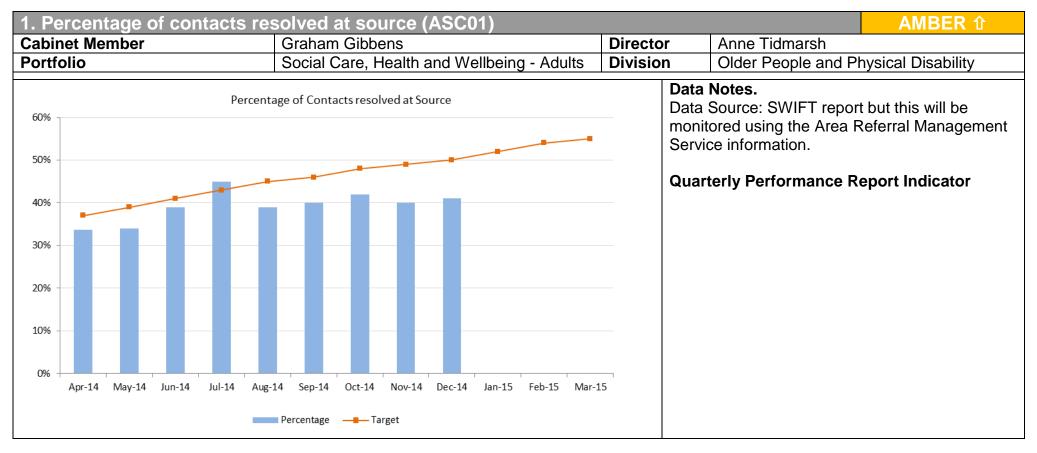

Adult Social Care Indicators

The key Adult Social Care indicators are listed in summary form below, with more detail in the following pages. A subset of these indicators feed into the Quarterly Monitoring Report, for Cabinet. This is clearly labelled on the summary and in the detail.

Some indicators are monthly indicators, some are annual, and this is clearly stated.

All information is as at December 2014 where possible.

A key priority for Adult Social Care is to respond to more people's needs at the point of contact, through better information, advice and guidance, or provision of equipment where appropriate. Although performance in March was on target, and has since improved, as stretching targets for improvement have been set for this year, current performance is behind target.

The current phase of the Transformation programme involves the staffing consultation, mobilisation of home care and staff reduction and these issues are influencing performance in the short term. Discussions continue to take place on a regular basis to ensure that any operational issues are identified and resolved.

The number of people in receipt of a Telecare service continues to exceed target. Telecare is being promoted as a key mechanism for supporting people to live independently at home, including within Personal Budgets. The availability of new monitoring devices (for dementia for instance) is expected to increase the usage and benefits of telecare. Awareness training continues to be delivered to staff to ensure we optimise the opportunities for supporting people with more complex and enabling teletechnology solutions.

Delay transfers can be affected by many factors, mainly client choice and health based reasons. Whilst there are ongoing pressures to find social care placements, these have been eased with support such as intermediate care, and step down beds. Information relating to delayed transfers of care is collected from health on a monthly basis, and reasons for delays are routinely examined. Currently about 25% delays are attributable to Adult Social Care. The top three reasons for delays includes: Waiting NHS non-acute care, patient choice and then Social care assessment.

Reducing admissions to permanent residential or nursing care is a clear objective for the Directorate. Many admissions are linked to hospital discharges, or specific circumstances or health conditions such as breakdown in carer support, falls, incontinence and dementia. As part of the monthly budget and activity monitoring process, admissions are examined, to understand exactly why they have happened. The objectives of the transformation programme will be to ensure that the right services are in place to ensure that people can self manage with these conditions, and ensure that a falls prevention strategy and support is in place to reduce the need for admission. In the meantime, there are clear targets set for the teams which are monitored on a monthly basis, and an expectation that permanent admissions are not made without all other alternatives being exhausted.

It is a clear objective of the Directorate to ensure that as many people with a learning disability live as independently as possible. All residential placements have now been examined to ensure that where possible, there will be a choice available for people to be supported through supported accommodation, adult placements and other innovative support packages which enable people to maintain their independence. In addition, the teams continue to work closely with the Children's team as young people coming into Adult Social Care through transition from the majority of the new residential placements.
