Review of stroke services in Kent and Medway

Our consultation plan

Plan for public consultation and resourcing
Draft document for comment and discussion
Work in progress
V19 18.01.18
Transforming health and social care in Kent and Medway is a partnership of all the NHS organisations in Kent and Medway, Kent County Council and Medway Council. We are working together to develop and deliver the Sustainability and Transformation Plan for our area.

1. Introduction

Over the last year, the NHS, social care and public health teams in Kent and Medway have been working together to plan how we could transform health and social care services to meet the changing needs of local people, improve the quality of services, and deliver sustainable services for the long-term within our available resources. This work is being progressed through the Sustainability and Transformation Partnership (STP) for Kent and Medway and its driving force is to set out and deliver changes to services to achieve the right, best quality care for people for decades to come.

A major part of this programme of work is to continue to progress the review of hospital stroke services across Kent and Medway. The eight GP-led clinical commissioning groups (CCGs) in Kent and Medway (responsible for planning and buying healthcare for local people) have been working together on this review since late 2014. Their work has been in response to national evidence, requirements and recommendations specifically for hospital-based urgent stroke care, meaning the care people receive in hospital immediately after having a stroke. Partners across our county border in London (Bexley CCG and Bromley CCG) and Sussex (High Weald Lewes and Havens CCG) have also been involved in our work. Bexley CCG and High Weald Lewes and Havens CCG have opted to be part of the Joint Committee of CCGs consulting on this service change, as they recognise that services in Kent and Medway are used by their residents living close to the Kent and Medway borders and therefore there could be a material impact from this review on their future commissioning of stroke services.

Over 3,000 people are treated in Kent and Medway for a stroke every year. National evidence shows people having a stroke do best when they are treated in a specialist stroke unit, staffed by specialist doctors, nurses and therapists available 24 hours a day, seven days a week. Over recent years, a number of areas across the country have reorganised their stroke services to provide such units and have seen significant improvements in patient outcomes (fewer deaths, and less disability) as a result.

Although hospital staff in Kent and Medway provide the best service they can, the way stroke services are set up currently, along with specialist staff shortages, means our local hospitals do not consistently meet the national standards for clinical quality. Evidence shows that to best maintain their skills, specialist stroke staff should treat between 500 and 1,500 strokes every year. Only one of the seven hospitals in Kent and Medway regularly treats more than 500 stroke patients a year.

Following detailed engagement with stroke survivors, their families, the public, stroke doctors and nurses and other key stakeholders since 2014, we are proposing to create ‘hyper acute stroke units’ in addition to our ‘acute’ stroke units in Kent and Medway. This is expected to lead to an improvement in outcomes for patients, reducing deaths and disability.

We will be consulting on five three-site options for hyper acute and acute stroke units. Stroke services are currently offered at six of our seven acute hospitals, but these are not 24 hours a day, seven days a week, specialist stroke units. A pre-consultation business case (PCBC) outlining our
proposals in detail and including detailed information about our communications and engagement work so far, has been developed and this will be published in due course, when we go to formal consultation. We are aiming to run a formal public consultation, to test and gather feedback on our proposals for the future of stroke services in Kent and Medway, early in 2018.

About this plan
This plan sets out how we will approach a formal consultation on urgent stroke services across Kent and Medway and with our neighbouring areas in Bexley and High Weald Lewes and Havens. More detailed plans and additional information are included as appendices to this document.

This plan has been informed by discussions with colleagues from commissioner and provider organisations across Kent and Medway and CCGs in Bexley, Bromley and East Sussex, the Stroke Association, and our Patient and Public Advisory Group (PPAG). It has also been informed by best practice principles from NHS England and NHS Improvement, Cabinet Office guidelines on consultation and from The Consultation Institute, as well as examples of good practice found across healthcare and other organisations in England. The PPAG will continue to play an active role in the development and refinement of our consultation plan and activities, and members of the group have agreed to act as a reference group to review and comment on consultation materials and activities as they are developed.

Governance
Development and implementation of this consultation plan will be overseen by the communications and engagement workstream of the Kent and Medway STP programme, reporting in to the Stroke Programme Board via the Stroke Communications Lead (LR) and the STP Programme Board via the STP Communications and Engagement Lead (SH), and to the Joint Committee of the CCGs via the STP Communications and Engagement Lead (SH). Representatives from Bexley and High Weald, Lewes and Havens CCGs are part of the governance structure of the stroke review via the Joint Committee of the CCGs. NHS communications and engagement leads from these areas, and Bromley as another border area (although not a member of the Joint Committee), will be engaged during the consultation planning phase to ensure that their knowledge and expertise is played into the final activity plans for their local residents.

The STP Programme Director (MR) is the Senior Responsible Officer for communications and engagement, and the Accountable Officer for Dartford, Gravesham and Swale, and Swanley CCGs (PD) is the Senior Responsible Officer for the Kent and Medway review of stroke services.

This plan will be formally approved and signed-off by the Stroke Review Programme Board, by the STP Programme Board, and by the Joint Committee of the CCGs. It will be reviewed by a number of other groups, who will be given the opportunity to provide feedback, such as the Kent and Medway Clinical and Professional Board and the Kent and Medway STP Patient and Public Advisory Group. The Joint Health Overview and Scrutiny Committee will be asked to discuss, give feedback on, and support the plan.

2. Scope
In geographical terms, the consultation will cover the eight CCG areas in Kent and Medway, plus two adjacent CCG areas – High Weald, Lewes Havens in Sussex and Bexley, in south east London.

Whilst we are consulting on proposals to change acute stroke services within Kent and Medway, there are neighbouring communities whose residents may be impacted by our proposals. We have engaged with the Health Overview and Scrutiny Committees across our county borders in East Sussex and in Bexley, south east London, as our modelling showed a potential impact for residents in these areas in terms of future access to hyper acute stroke unit services. Both these scrutiny committees have confirmed that our proposals constitute significant variation to current service
provision for their residents, and therefore they have decided to form a Joint Health Overview and Scrutiny Committee with colleagues in Kent and in Medway. We will continue our engagement with members and will formally consult with this new Joint HOSC, in accordance with our statutory duties.

We have also engaged with neighbouring clinical commissioning group colleagues in Bexley, Bromley and High Weald Lewes Havens. Bexley and HWLH CCGs have agreed to join the Joint Committee of CCGs (with the eight Kent and Medway CCGs) and become formal consultors, in recognition of the impact the proposals could have on their commissioning decisions about stroke services for people in their areas. Bromley CCG has decided not to be part of the Joint Committee of CCGs in recognition of the potential impact on activity and patient flows at the Princess Royal Hospital within its CCG area, preferring instead to be a consultee and to respond to the consultation with this in mind.

Our consultation activity will therefore stretch across ten CCG geographies, reaching out to residents in Kent, Medway, High Weald Lewes and Haven and Bexley. We will also seek to inform and make sure information is available for statutory health and care organisations and key stakeholders, and residents, in neighbouring Bromley.

To support this work, we will link with communications and engagement colleagues in Bexley and High Weald Lewes Havens CCGs and Bromley CCG and work with and through them to: identify stakeholders and networks – particularly to reach our targeted audiences; cascade and distribute information; signpost and encourage responses to our consultation questionnaire; attend key meetings and fora; and, in Bexley and High Weald Lewes Havens areas, to hold open listening events with the public. We will include these areas in our work to gather views from a representative section of our consultation population, for example through focus groups and telephone polling, and in our outreach activity to consult with seldom heard and protected characteristic groups.

In service terms, the consultation proposals focus on changes to hospital-based urgent stroke services in Kent and Medway. We are aware that people will want to know, and consideration has been given to, how these services will align with care given outside of a hospital setting (areas such as rehabilitation and local care and support at home or in a community setting) but rehabilitation services and local care services per se are outside of the scope of this consultation.

3. Pre-consultation engagement
Since the review of stroke services began in 2014, a significant amount of pre-consultation engagement has been carried out with local people, communities, staff and stakeholders across Kent and Medway. In south east London and East Sussex, engagement work proportionately reflects the impact that these proposals will have on the respective populations. The three border CCG areas affected (Bexley, Bromley and High Weald, Lewes Havens) have all been involved as consulting partners or interested stakeholders in the stroke review to date.

Prior to formal public consultation, pre-engagement activity with partner organisations (hospital trust and clinical commissioning group clinical and leadership teams), frontline staff, stakeholders such as MPs and local government representatives, and patients, public, stroke survivors, carers and their representatives such as the Stroke Association and Healthwatch, has been done to ensure that the proposals have been clinically led, co-designed and developed with significant input from a wide range of people.

This work is detailed in the pre-consultation business case and a full break down of activity can be found here [DN: insert link when available/published].
Statutory duties and legislation
As NHS organisations we are required to show how the proposals we are putting forward meet the four tests for service change laid down by the Secretary of State for Health. These are:

- Strong public and patient engagement
- Consistency with current and prospective need for patient choice
- Clear clinical evidence base to support the proposals
- Support for the proposals from clinical commissioners.

There is also a legal duty on NHS organisations to involve patients and the public in the planning of service provision, the development of proposals for change and decisions about how services operate:

- Section 242, of the NHS Act 2006, places a duty on the NHS to make arrangements to involve patients and the public in planning services, developing and considering proposals for changes in the way services are provided and decisions to be made that affect how those services operate.
- Section 244 requires NHS bodies to consult relevant local authority Overview and Scrutiny Committees on any proposals for substantial variations or substantial developments of health services. This duty is additional to the duty of involvement under section 242 (which applies to patients and the public rather than to Overview and Scrutiny Committees).
- The NHS Act 2012, Section 14Z2 updated for Clinical Commissioning Groups places a duty on CCGs to make arrangements to ensure that individuals to whom the services are being or may be provided are involved (whether by being consulted or provided with information or in other ways):
  - in the planning of the commissioning arrangements by the group
  - in the development and consideration or proposals by the group for changes in the commissioning arrangements where the implementation of the proposals would have an impact on the manner in which the services are delivered to the individuals or the range of health services available to them
  - in decisions of the group affecting the operation of the commissioning arrangements where the implementation of the decisions would (if made) have such an impact.

We need to make sure that our consultation activities meet the requirements of The Equality Act 2010, which requires us to demonstrate how we are meeting our Public Sector Equality Duty and how we take account of the nine protected characteristics of age, disability, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex, sexual orientation.

We also need to consider other relevant legislation and show:

- How we have learnt from the views and requirements of those who may use our services and their carers, families and advocates and responded to their feedback
- How the proposals will bring significant clinical benefits and improve outcomes and accessibility
- How the proposals consider people’s diverse and individual needs and preferences including people with protected characteristics.

The approach and activity outlined in this document demonstrates how we will meet these obligations.
4. Consultation principles
Our consultation plan is underpinned by some fundamental principles. As well as shaping the content and activity of our consultation, these principles will form the basis of our evaluation of the plan.

Consulting with people who may be impacted by our proposals
- We will reach out to people where they are, in their local neighbourhoods and in local networks.
- We will make sure that there are ‘no surprises’ for staff whose jobs may be affected by the review and that they will hear from us first about the proposals and have an opportunity to respond. We will ensure that they are aware of the process, understand how their roles may be impacted and will ensure they understand how they can give their views on the consultation.
- We will cover the geography, demography and diversity of Kent and Medway and our boundary populations, including the working population, silent majority, seldom heard, people who are mostly well, and people who aren’t, and those with protected characteristics, to gather a fair representation of views and feedback.

Consulting in an accessible way
- We will provide detailed information on websites to ensure transparency. We will also produce targeted public-facing documents (some printed as we know not everybody wants to access information digitally), summaries, case studies and social media content.
- We will make sure our public information is consistent and clear; written and spoken in ‘plain English’ avoiding jargon and technical information; accessible to everyone and available on request in a range of languages and formats.
- We will make clinical information and agreements available to the public.
- We will provide a range of opportunities for involvement and engagement with our consultation; reaching out to people where they are, in their local neighbourhoods and in local networks, physically and digitally.

Consulting well through a robust process
- We will make sure that local people and the staff working in organisations affected by the proposals across Kent and Medway and within the boundaries of London and East Sussex CCG areas have confidence in our consultation process, ensuring it is open, transparent and accessible.
- We will be clear and up front about how all views can influence decision-making, explaining it will not be possible to do everything everyone wants and why difficult decisions have to be made.
- We will make sure people are aware of our consultation even if they choose not to participate.
- The consultation will run for a sufficient length of time to allow people to give their views and we will provide regular reminders about progress and the closing date.
- We will strive to ensure we are acknowledged locally and nationally to have undertaken a meaningful and effective consultation process.

Consulting collaboratively
- We will work collaboratively with individuals, stakeholders and partner organisations to deliver the agreed consultation principles and make the most of the opportunities of partnership working to reach out to as many people as we can in a meaningful way across Kent and Medway and our boundary populations in London and East Sussex.
• Our information will be relevant to local groups, being clear about what the proposals mean for each geographical area and for each group of people taking account of their interests, diverse needs and preferences.

Consulting cost-effectively
• We will strive to ensure our consultation budget is spent wisely and used effectively in terms of reach and response, delivering good value for money throughout.

Consulting for feedback
• We will monitor and evaluate our consultation process consistently and in a systematic way, including capturing feedback and comments from events, meetings, discussions and individual responses
• We will commission several ‘mid-term’ reports in terms of consultation response analysis, to assess progress on where, how and from whom we are receiving feedback and responses, so we can target our activity to address gaps in feedback geographically or demographically
• The analysis of feedback will be done independently, and the independent report shared publicly
• We will use the results of consultation to inform decision-making.

We will strive to deliver a best practice consultation within the timeframe and budget allocated and will work with independent providers to deliver key consultation work and to analyse the results to ensure an objective outcome. We will use a mix of qualitative and quantitative methodologies to allow for both volume and richness of response.

To help us achieve this aim, we have the following objectives:
• Make people aware of the public consultation and how they can get involved
• Comply with the duty to inform people about how the proposals have been developed and describe and explain the proposals and what they will mean in practice for the provision of local services so that people can make an informed response
• Seek people’s views on the proposals, including the range and location of services as set out in the proposals
• Ensure that a diverse range of voices are heard and that the engagement activities target specific community groups to ensure the local population is represented
• Consider the responses made as part of the consultation and take them into account in decision-making, with sufficient time allocated to give them thorough consideration
• Ensure that the consultation process uses a range of methods to reach different audiences and maximises opportunities for engagement with the local community and key partners
• Deliver a public consultation in line with best practice that complies with our legal requirements and duties.

5. The consultation document – outlining our proposals for the future of stroke services
At the heart of our consultation is a public-facing consultation document that will outline the proposals for the future of hospital-based urgent stroke services in Kent and Medway, with explanatory, supporting information and a set of questions to allow people to tell us what they think of the proposals. We will make this document available in a range of formats and through a variety of different channels (which we cover later in this document). Our consultation activity is focussed solely on promoting and explaining the proposals, their benefits and their disadvantages, and eliciting feedback on them in as wide a variety of ways as possible. A full list of consultation products and collateral is in development and is described further throughout this document.
6. Target for reach
We want to reach a representative sample of the population to ensure that there is awareness of the proposals, sufficient opportunity to comment and a rich source of feedback and insight for us to make sure that future decisions on the shape of urgent stroke services are ones that reflect the needs of the local population. Therefore, our objective is to reach a minimum of one percent of the Kent and Medway, Bexley and HWLH population, with a stretch target of five percent if resources allow. This is the target to reach people with information about the consultation (e.g. directly through engagement activity, through social media, traditional media, paid-for advertising etc.). The total registered population of Kent and Medway, Bexley and High Weald Lewes and Haven is c2.2million, so one percent is 22,000 and five percent is 110,000.

If we set our targets for reach too high we will need to use a lot more paid-for advertising, which may not then result in a very different outcome on feedback. The important target is that the feedback is representative and that it delivers some rich insights into people’s views. The quality of feedback to our consultation is important alongside the quantity.

Our target for responses is 3000 separate responses. These could be emails, questionnaires, Tweets, phone calls, letters or comments made at events. Where we can show whether the same person or group has replied twice, we will do, but it might not always be possible.

This target takes into account that significant stakeholder engagement has been ongoing since 2014 so some people will feel that they have had their say already, their views have shaped the options presented, and they may not choose to reply again, but they have engaged and shaped the outcomes. More detail on the engagement that has already taken place can be found in detail in the pre-consultation business case [DN: link once PCBC published].

The target for reach will be a key measure of our evaluation for the success of the consultation.

7. Stakeholder mapping
We aim to engage as many people and groups as possible from the local area as the timeframe and budget for our consultation permits. We will be seeking to work with our colleagues and organisational partners in teams across the county to enable this. Our stakeholder map below illustrates the broad range of stakeholders we anticipate will have an interest in responding to the proposals and this plan outlines our strategy for engaging each of these key groups.

The groups and organisations we have identified will be engaged during the consultation period, where they will be encouraged to share their views on the proposals and potential site options. In addition, to help us reach as many people as possible, we will ask all organisations and groups to act as conduits and to actively help us promote the consultation (via their communication and engagement channels and distribution networks) to any relevant stakeholders.

8. How we have developed this plan
In developing this plan, we have built on the pre-consultation engagement activities [DN: link to PCBC engagement appendix] that have been undertaken during the stroke review since 2014 and more recently as part of the development of the Kent and Medway Sustainability and Transformation Partnership work.

The local community
We have conducted a thorough mapping exercise of local community groups and organisations during the stroke review and as part of the ongoing development of our Sustainability and Transformation Partnership work. Local clinical commissioning group engagement teams also regularly review their stakeholder maps and channels and we will be using these to reach out to people. We have also undertaken targeted outreach work with seldom heard groups and those with protected characteristics during the summer of 2017 to ensure that we have contacted the range of groups protected under equalities legislation. We will continue with this work and ensure that as many diverse views as possible are able to feedback on the proposals. All groups we have engaged with will be sent a copy of the consultation document and questionnaire and be invited to respond, with an offer of more copies, further engagement opportunities and attendance at meetings if requested.

Independent delivery partners
We will work with an independent research partner to develop the consultation questions and to analyse and report the responses from groups and individuals. We are also recommending commissioning additional focus group and telephone survey research which will be taken forward by an independent research company.

The Joint Health Overview and Scrutiny Committee (JHOSC)
The Kent and Medway JHOSC has been receiving regular updates on the progress of the stroke review, including the engagement activity that has been undertaken so far, over the past three years. We have also engaged with colleagues in Bexley HOSC and East Sussex HOSC and discussed our ongoing work and emerging proposals. Our consultation approach will be presented to them for their feedback and will include how we will consult with them as a statutory requirement and how we will consult the broader public and stakeholders. It should be noted that we are recommending a ten-week consultation period following discussion and feedback from a range of stakeholders and including the Kent and Medway JHOSC. HOSC colleagues in Kent, Medway, Bexley and East Sussex have emphasised that it is the robustness of the consultation that is important rather than necessarily the length of it. Kent and Medway JHOSC members are keen that we make progress on the review of services with pace, whilst all involved recognise that we have a legal duty to ensure all consultees, including members of the public as well as statutory and other organisations, have sufficient time to find out about and respond to the consultation. We will formally consult with the Joint Health Overview and Scrutiny Committee (which we expect to comprise Kent, Medway, Bexley and East Sussex members) as part of our statutory duties, and will keep them regularly updated throughout the consultation period and beyond with our wider public consultation work, and at the appropriate time, with our decision-making and detailed implementation plans.

The Stroke Programme Board and other staff groups and representatives
Clinicians and other health care professionals and staff have been involved in the development and delivery of pre-consultation engagement activities. The Stroke Programme Board and Clinical Reference Group has advised and commented on plans and activities and will receive regular reports on the consultation once it is underway. We have made a commitment to staff who may be affected by the proposals that they will hear about them through us first. While we know that the
stroke review has widespread support and engagement from staff and is a clinically-led review, making sure that those whose jobs might be affected receive information directly from their own organisation about the consultation, rather than first from their local newspaper or via social media, is vital if we are to show consideration and respect to our staff - those who are treating people for stroke on a daily basis.

**Voluntary and community sector and local elected representatives**

The Stroke Association and other patient groups have been working closely with us in partnership through our pre-consultation engagement phase. At STP level in Kent and Medway, a Partnership Board comprising more than 70 partners, councillors, other public services, and voluntary sector groups and representatives advises the programme on the development of future plans for the Kent and Medway health and social care economy. In addition, we have recently held meetings with representatives from the voluntary, charity, and social enterprise (VCSE) sector, and with district and borough councillors across Kent and Medway. We plan to work closely with these groups and partners during our formal consultation to ensure that as wide a cross-section of the community is informed about and made aware of the consultation as possible, and to increase the range of opportunities available for our patients, their relatives and carers and the public to have their views heard.

**Kent and Medway STP Patient and Public Advisory Group**

As well as advising and contributing to the work of the wider Sustainability and Transformation Partnership programme, the Kent and Medway Public and Patient Advisory Group has a key role in developing and testing our approach to engagement, especially for public consultation periods. Group members have been, and will continue to be, invited to make suggested improvements in how engagement can be strengthened and to offer feedback on how they believe emerging proposals will impact patient choice (linked to achievement of the four reconfiguration tests). They will also be a key mechanism for raising awareness of the consultation amongst their own networks. PPAG members have agreed to form a small sub-group to act as a reading group and advisory group on the draft consultation materials and detailed plans.

**Healthwatch**

Healthwatch Kent and Healthwatch Medway have both been involved in the STP programme and the stroke review for some time. Healthwatch Kent are represented on the Stroke Review Programme Board, and Healthwatch Kent and Healthwatch Medway are members of the STP Partnership Board and our Patient and Public Advisory Group. We will be formally attending Healthwatch public meetings during the period to listen to their views on the proposals and will continue to work in partnership with them to use their networks to deepen engagement and to encourage responses to our consultation. We will also be encouraging Healthwatch across the Kent county boundaries, representing communities in Bexley, Bromley and High Weald, Lewes Havens, to respond to the consultation and encourage their volunteers to do the same, and to promote the consultation through their own newsletters and channels.

**Integrated Impact Assessment (IIA)**

An Integrated Impact Assessment was undertaken during the pre-consultation phase and we have used the results of this work to inform our consultation planning. According to the IIA, the following groups with protected characteristics may have a disproportionate need for stroke services.

- Age (older people aged 65 and over)
- Deprived communities
- Disabled
- Pregnancy and maternity
- Race and ethnicity: Black, Asian and minority ethnic (BAME) communities
• Sex: Male

We will target our activities to specifically focus on these groups as well as wider communities, and use our networks and contacts within the voluntary and community sector to help elicit feedback from these groups. We will also use dedicated research and engagement methods to reach representatives of these groups.

9. Consultation activities – an overview

A good consultation exercise should employ a range of techniques and channels to ensure that members of the public and stakeholders may fully participate. Our approach will make efforts to reach a broad range of people, in addition to and beyond statutory organisations, partner organisations and those with a vested interest or those already highly engaged who usually respond to consultations. We aim to do this through using a variety of methods to engage with the public and stakeholders.

It is recommended that activity takes place at two levels, which is described in more detail in Appendix C:

1. **Activity that takes place at a Kent and Medway/STP level**: briefings and meetings with groups and stakeholders at county level (eg JHOSC, MPs, some patient and voluntary groups, regulators, partners, royal colleges, clinical senate etc), generation and clearance of core content, production and distribution of consultation materials, planning and delivery of a launch event, responses to correspondence, FOI, media requests and proactive media activity, digital engagement etc

2. **Activity that takes place at CCG level**: CCGs have been asked to develop dedicated plans tailored to their areas allowing them to take into account the specific opportunities, networks, channels and mechanisms that will present themselves across CCG areas, supported by the core consultation team and consistent core consultation materials as appropriate.

Our techniques will recognise the different ways in which various stakeholder groups and audiences might choose to participate, allowing for differing levels of engagement or interest as reflected in the stakeholder analysis. By using a range of different methods, we will be able to facilitate a wide range and breadth of feedback.

We will use a range of techniques to enable people from all local communities to take part in the consultation and to give feedback. Consultation methodology generally falls into two main categories - giving information and getting information.

At the core of our consultation will be a consultation document and summary which clearly lay out the basis on which we are consulting, the background to the consultation, a summary of the data upon which options have been developed and what the proposals/options are, and signposting for more detailed technical information if needed. This document will also seek feedback and promote the various other methods by which people can engage in the consultation. This will be developed and produced at Kent and Medway level with individual CCGs responsible for developing local plans for dissemination.

In line with best practice the consultation document will meet the following criteria:

- The consultation document will be concise and widely available
- The language of the consultation document will be accessible, clear, concise and written in plain English. It will be available in other languages and formats on request
- The objectives of the consultation document will be clearly stated
• The consultation document will provide details of all options for change with well-balanced pros and cons for each option, including the implications of no change
• Proposals will be set out clearly and transparently
• The consultation document will contain specific, relevant, clear information
• The consultation document will explain why service improvement is required, setting out what the results of change will look like in terms of benefits to patients (whether in terms of clinical outcomes, experience or safety) as well as any financial benefits, but also setting out any potential disadvantages, presenting a balanced view
• A set of key questions will be included
• The consultation document will inform the public about how they can contribute to the consultation and state clearly how feedback will be used
• An email as well as a freepost address will be given for responses
• The consultation document will include a list of the partners leading the consultation
• The document will include details of how patients and the public have been involved so far
• The consultation document will include contact details for a consultation enquiry line, staffed by someone/people who will respond to questions and who will pursue complaints or comments about the consultation process
• The consultation document and other supporting collateral will be available in paper format, free of charge
• The consultation document will be on the CCGs and Kent and Medway STP website in digital format from the start of the consultation
• The document will give the dates of the consultation period (start and finish).

We have tested, and will continue testing, our draft document and other consultation materials with the STP Patient and Public Advisory Group and selected people within our target group to ensure that they are clear and well-understood. In addition, we will seek advice from an independent evaluation organisation to help us design non-leading questions that meet the highest standards of research design for this sort of exercise, and undertake cognitive testing on the consultation questionnaire to ensure that our target audiences find it easy to understand and respond to.

Distribution channels
As noted in our section on stakeholder mapping, we will distribute a range of consultation materials throughout our consultation area (Kent and Medway, Bexley, Bromley and High Weald, Lewes and Haven) to our partners and stakeholders and encourage them to disseminate information through their own networks. These include:

• All NHS acute hospital sites
• All NHS community hospitals and clinics
• All GP practices
• All community pharmacies
• Clinical commissioning group offices
• Voluntary and community services organisations for onward distribution to community organisations
• Faith groups
• Residents associations
• Leagues of Friends
• Other NHS acute and independent services provided by other providers for use internally and for placing in patient and public areas
• Public libraries and public information points
- Local media, for publication about the proposals and consultation events
- Social media (including Twitter and Facebook)
- Local MPs, councillors and council offices.

**Consultation briefings, updates and frequently asked questions**
In addition to the consultation document, a series of updates, briefings and frequently asked questions will be produced during the consultation period. These will be used to provide answers to common issues and questions, share emerging information and respond to issues that have arisen.

**Displaying and distributing information**
The objective is to convey information in plain English in an easy to understand format and encourage participation, ultimately to drive responses to the consultation. For physical distribution, audiences will be specifically targeted based on their area or level of interest as described in the stakeholder mapping.

**Physical distribution**
Distribution of promotional material will take place across hospitals, community centres, leisure centres, health settings, libraries, and other public places.

**Virtual distribution (see also section 14 on digital communications approach)**
This will be supported via:
- Websites – the main STP website (www.kentandmedway.nhs.uk) and across all NHS websites within the consultation area, signposted from partner websites where they are content to support in this way.
- Email bulletins
- Online video
- Social media (Facebook / Twitter etc)

**Media (see also section 14 on media approach)**
Information will be conveyed either as editorial that is free but not within our control, and via local media adverts that we pay for and control. Free editorial will be our preferred option; however, we will consider paid adverts to promote the consultation if we feel this is required due to limited media coverage or limited responses from particular areas we are wishing to target. We will issue regular media releases throughout the consultation period to local newspapers, local radio and community magazines (including newsletters produced by residents’ associations, parish, borough and district councils, community, faith and voluntary groups etc).

**Display**
Displays in key locations will promote the opportunity to respond to the consultation. This will include displays at the acute hospitals and in other public areas where these can be accommodated.

**Workshops, roadshows and public meetings**
As part of the consultation there will be further workshops, which local people can attend. Due to limited venue capacity, and to avoid disappointment, attendees will be asked to book places in advance. There will also be wider meetings and engagement events. These will focus on explaining the options for consideration, sharing information and answering questions to increase understanding, and inviting feedback and formal responses to the consultation questionnaire.

**Getting information**
Discussion groups are guided conversations with smaller groups of people. We intend to use these groups primarily to seek feedback on proposals with small targeted groups and specific user groups – especially those who may find it difficult to engage in other consultation methods such as people
with learning difficulties or communications impairments. (We may use interpreters or advocates at these sessions).

**Questionnaire**
Our questionnaire will be used to ask people for their feedback on our proposals for change and their opinion on our consultation options, and to gather views and feedback on issues, concerns, and areas of support so that these can be understood, and taken account of, including mitigating where possible, in terms of decision-making and implementation of that decision. The consultation is also an opportunity to seek additional evidence, insight and ideas that may not have been known about or considered thus far. We will send out our consultation document by email to a wide range of stakeholders and will also make hard copies widely available in the community. People will also be able to download the document from the Kent and Medway STP website and respond online or via freepost.

**Drop–in sessions**
Drop-in sessions are informal methods which invite people to take part in discussions on a one-to-one or very small group basis. This will allow for more detailed conversations about specific topics of interest. We plan to hold these sessions at each of the hospitals, in community spaces, and with NHS staff. We will provide a mechanism for capturing the content and themes from these discussions, as well as using them to encourage completion of the consultation questionnaire.

**Patient and carer groups**
We will continue to engage with specific groups that currently use, or have used, stroke services in CCG areas to ensure that their views and feedback are captured on the proposals and consultation options. In line with the results of the Integrated Impact Assessment, we will also look for additional targeted opportunities to engage with groups who have a higher incidence of stroke, and/or who have been identified as potentially more impacted than others by the proposed consultation options.

All events and meetings will be scheduled and diarised as part of a 10-week consultation diary, once agreed. In line with best practice engagement, and our recommended approach of going out as much as possible into the local community to engage, most meetings and briefings will form part of pre-existing meetings rather than being stand-alone events. Clearly this activity is dependent on the capacity and availability of spokespeople to attend these meetings, answer questions and facilitate discussion with our target audiences for consultation. We have agreed with clinical and other leaders across Kent and Medway that they will support this face-to-face activity as part of a dedicated cohort of spokespeople for the consultation.

**Outreach**
As part of the approach to equality and inclusion, we will carry out proactive outreach to target seldom heard groups, with a focus on those representing the nine protected characteristics: age, disability, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion and belief, sex, sexual orientation. We will proactively approach community groups with information about the consultation, as well as attending pre-existing meetings. Like the drop-in sessions above, this outreach will allow for more detailed conversations and the opportunity to encourage people to complete the consultation questionnaire.

**Focus groups**
We plan to hold focus group discussions with the following three groups:
- Groups identified by the Integrated Impact Assessment
- People at increased risk of stroke
- Staff
Focus groups will be held across the consultation geography. They will enable us to gather rich data about the views of these groups who are most likely to be impacted by the proposed changes. Members of the public could be financially incentivised to take part if recruitment is difficult (as per standard industry practice).

**Telephone survey**
We will commission a telephone survey with representative samples of the population from across the consultation geography. This will allow us to gather a broad range of views from those who may not otherwise contribute (e.g. working well).

10. **Our commitment to an accessible and inclusive approach**
It is essential to ensure that we target, and cater for, the needs of seldom heard groups and others with special requirements. These groups include, for Kent and Medway and in our neighbouring CCG areas, for example: the young, the working well, those in deprived communities, those in more rural communities, migrants, those with learning disabilities and those from BAME groups. We are also committed to seeking views on the proposals from those representing the nine protected characteristics: age, disability, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion and belief, sex, sexual orientation. As already noted in this document, the integrated impact assessment highlighted the following groups who may have a disproportionate need for stroke services.

- Age (older people aged 65 and over)
- Deprived communities
- Disabled
- Pregnancy and maternity
- Race and ethnicity: Black, Asian and minority ethnic (BAME) communities
- Sex: Male

Our commitment to engage specific groups is underpinned by legislation to ensure that all public services make every effort to engage specific groups in consultation to improve and redesign services. The 2010 Equalities Act (updated to Equality Duty 2011) makes clear the responsibility of public services to make additional effort to engage specific groups as a means of improving decision-making.

To best meet needs of people with additional requirements we will:

- **Produce an ‘Easy Read’ summary consultation document and questionnaire/response form:**
  - This nationally recognised scheme uses words and pictures in an easy to read format to effectively communicate with people with learning needs or who have only a basic knowledge of English language. The draft version of the document will be piloted with a Learning Disability advocacy group to ensure it is readable and understandable. This document will be cascaded through our voluntary community sector contacts, sent or taken to relevant focus groups and meetings, and will be available online.

- **Produce materials in different print formats on request**
  - To meet the needs of individuals with visual impairments and or with other communication needs, we will produce consultation documents in a range of formats upon request.
• Offer a translation service (e.g. Language Line)

We are aware that not everyone speaks English and will explore the most commonly spoken languages across the consultation catchment area to select the top 10 languages and offer a translation service on request. This means, that throughout the consultation period and during all our events and roadshow activities, if we need translation we can immediately access a telephone service. In addition, we will offer to translate the consultation document upon request. This will be noted on the back of key documents in the 10 top languages spoken across the area.

**Produce documents in plain English**

Essential to a good consultation is a clear consultation document and summary. We will continue to use our Patient and Public Advisory Group and colleagues at The Stroke Association, as part of our drafting and testing process to make sure materials are clear and easy to read. We will also ensure the questions we ask are checked in the same way and are developed and approved by an independent research company.

**Ongoing analysis**

Throughout the consultation period we will receive regular response monitoring reports from the independent consultation analysis agency (who we will use to collect and analyse the responses). We will monitor this information closely to identify any demographic or other trends which may indicate a need to adapt our approach regarding consultation activity, or refocus efforts elsewhere, for example a high response rate from a particular ethnic group/age group/borough or equally a very low response from a potentially affected group.

**11. Direct engagement with NHS staff and stakeholders**

Our approach to direct staff engagement is two-fold:

1. Staff who are affected by the proposals – in our ‘Consultation principles’ we make a commitment to a ‘no surprises’ approach for staff who may be affected by the proposals. Targeted engagement activity with these groups will be at the forefront of our staff engagement effort in advance of the consultation launch as well as during the consultation period.

2. Staff are often local residents, patients and carers too, with the same concerns as other members of the public, carers or patients about health and care services. It is essential that they are aware and engaged about the consultation and have the opportunity and means to tell us what they think.

Workforce considerations are a major part of any service reconfiguration and as part of this plan we recommend that it is the responsibility of each commissioner and provider organisation to ensure that they fulfil their legal duty and consult their staff on the proposals. The consultation materials generated at Kent and Medway level will be used to support health and care organisations in this regard, but they will need to be localised, and ‘what could this mean for me?’ plans should be developed by and aligned with local HR Directors and their workforce teams’ ongoing work. We will work with partner organisations and independent providers as appropriate, to determine and agree the range of activities that will meet the needs of their staff.

In advance of the consultation launch, staff who may be affected by the proposed changes will be briefed on the proposals and options for consultation, and made aware of the opportunities to attend face-to-face briefings and meeting sessions to find out more and give their views.
Following the launch of the consultation, our approach will include the following activities:

**Events**

Events for health and social care staff, including GPs and their practice staff, across acute, community, primary care and social care

The aims of the events will be to:

- provide detailed information and to answer questions which enable people to make a considered response to the consultation
- to gather rich feedback on the benefits, concerns and issues in a structured and constructive way
- to explain the proposals and enable leaders and clinicians to be questioned about them and to understand the balance of opinion by exploring the preferences on the consultation proposals.

**Existing internal communications channels**

Intranets, newsletters, materials available in high-traffic areas and staff briefings and existing meetings and fora will all be used to engage with staff over the stroke consultation proposals.

We will contact and distribute materials to GP practices, via practice forums and promote the consultation via existing bulletins to GPs and their practice staff.

We will also seek to work through existing networks to reach independent contractors such as dentists, pharmacies and opticians.

**Our communications and media approach**

**Digital communications**

Digital communications does not replace engaging with people face-to-face, but is a way of raising awareness, providing information and accessing more people including some people like the working well, mothers of young children or carers, and some older people who find it harder to leave the house and attend meetings.

For a large and growing section of the population digital communication is now their preferred means of communication. Cabinet Office Guidance advises that “digital is the default method for consultation”. ‘Digital First’ is the preferred mass method as it reduces waste, money and time – web and social media activity should be the starting point. The guidance states that paper surveys must be reduced as their evidence suggests people do not like them and few fill them in. It does emphasise that tailored, evidence-led inclusion of target groups must use additional appropriate tools to suit the needs of these groups i.e. face to face road shows and focus groups. However, we are aware, through feedback from our own patient and public groups, representatives and networks that there is still a requirement for paper-based copies of documents and we will make sure that we have adequate supplies of paper-based materials and that these are targeted and distributed appropriately.

Given the above, our approach will be balanced using the full range of different channels of communication: face to face activities, digital and news media. We hope this will ensure that all people are able to get involved in a way that best suits them.

Our approach to digital communications will be via:

**Website**

We will use the Kent and Medway STP website as our ‘online consultation hub’ and visitors to the site will be able to access all consultation information here in one place, with quick links on every
page to clearly highlight key documents and online feedback channels. It will also include an events
diary and document store (for more detailed technical information) and integrate with our social
media channels. Links to cross-boundary CCGs websites will ensure that residents from south
London and East Sussex will be signposted to the consultation section of the website enabling them
to access information and give their feedback.

**Social media and video**

Twitter, Facebook, YouTube and a blog will be used to keep online stakeholders informed, signpost
and facilitate discussion, during and after the consultation period.

We aim to build on existing relationships with our online stakeholders and to engage new audiences
with an emphasis on our identified target audiences. We will provide the option to hold online
discussions using Twitter – ‘tweet chats’ - at times that evidence suggests will attract these
audiences, e.g. weekday evening chats for working adults and parents. Twitter will also be used to
complement offline engagement.

The blog will be an opportunity for individual clinicians to interact with online stakeholders in a less
formal way, emphasising that the stroke review is clinically led, and keeping them updated with
progress of the review at every step of the way. It will also enable us to rapidly respond to
inaccurate media and social media stories.

In addition, we will make use of video and our STP YouTube channel, and try to bring the
consultation to life for people using Voxpops, interviews with key spokespeople, patients and carers
to help engage our target audiences, disseminate key information, share understanding and
encourage responses to the consultation.

**Animation**

As part of the consultation materials, we will develop an animation outlining the proposals in an
engaging and easy to understand way and as a ‘call to action’, encouraging feedback on the options
that are being put to the public.

The animation will follow standard DDA accessibility guidelines with English subtitles and graphics
that are suitable for sight-impaired viewers.

**Media approach**

Our media approach will be proactive during the consultation period (as well as reacting, of course,
to any enquiries or issues that arise). In the consultation catchment area, the local media continues
to be important in influencing public perception and reaction to all aspects of health and care
changes and we will work with them and communicate key messages for the consultation through
the channels they provide.

During the consultation phase we will adhere to the following key principles:

- Work with the media. This activity will include a media programme of promoting case
  studies, inviting journalists to events and facilitating interviews with key clinicians involved in
  the development of the proposals, stroke patients, their families and carers and The Stroke
  Association.
- Ensure we can provide clinical spokespeople wherever possible to explain the reasons for
  change and our proposals, and to support them appropriately in this role
- Work closely with local journalists and ensure they are fully briefed on the reasons for the
  stroke services consultation and why local clinicians believe it will improve services and save
  lives.
- Invite members of the media to all relevant engagement events and meetings, to maintain
  transparency throughout the process.
• Work with media teams at all partner organisations to make sure messages are consistent. Ask NHS communication colleagues to include a link to the stroke consultation review in their proactive press releases.
• Respond to all media enquiries in a timely and helpful manner.
• Regularly monitor the media and ensure that inaccurate information about the consultation and stroke review is rebutted.
• Evaluate all media coverage to assess its effectiveness, and the inclusion of our key messages, adapting our approach as appropriate.
• Focus on professional journals to engage local clinicians, for example Nursing Times, Pulse, Allied Health Professional journals and the Health Service Journal.
• Explore the value for money of paid for advertising to generate a good response to the consultation and explain the programme to local people.

The media audiences we will target with information about the consultation include:
• All local newspapers
• Professional journals such as Health Service Journal, Pulse, Nursing Times, Nursing Standard and GP
• Council newsletters and websites
• Local NHS Trust newsletters and websites
• Local community newsletters and websites
• Online media via social media strategy
• Identified and targeted key NHS and health policy commentators and bloggers, as appropriate.

During the consultation period, we expect to continue to carry out extensive reactive media work across the consultation catchment area. We will also seek to ensure that messaging on all areas of the STP and its impact and alignment with the acute stroke review are covered, including our plans for local care, rehabilitation and prevention – so that we are telling the ‘whole story’ for patients, carers and the public. We will also work with colleagues in out-of-county CCG areas to handle specific responses relating to the stroke review within the context of their own Sustainability and Transformation Partnership work programmes.

12. **Mechanisms for response**
We will provide the following mechanisms for response:
• Freepost address – for returning paper responses to the consultation questions
• Dedicated consultation email address
• Online – including a web form and via social media e.g. Twitter and Facebook
• Free phone line/voicemail
• Face to face.

All feedback, whether verbal or written, will be collected and sent on, as part of the formal response, to an independent research organisation that will receive, collate, monitor and analyse and report on the responses received.

13. **Analysis of consultation responses**
An independent organisation will be commissioned to manage the response process, and will be responsible for collation and analysis and reporting of all responses. This is best practice for a public consultation such as this, and ensures a formal, independent, non-biased and objective
provider is in place to analyse the responses and to produce the final consultation response analysis report.

14. Impact of consultation on outcomes and decision-making

The outcome from the consultation, in terms of the final report from the independent analysts (and any raw data specifically required), will be used alongside the range of other evidence gathered as part of the Stroke Review (including clinical, financial, workforce, estate, travel time analysis etc), to help decide on the best option to take forward for the future design of hyper-acute and acute stroke services in Kent and Medway. This decision-making process will comply with the NHS England guidance ‘Planning and Delivering Service Changes for Patients’.

It is important following the consultation that the consultation team develops timely feedback mechanisms to ensure that those who participated in the consultation exercise are informed about the feedback received, its likely impact and, in due course, the decisions made as a result. It is also important that any ongoing process and further decision-making is understood by stakeholders. This will build on the mechanisms already developed in the engagement phase including the Kent and Medway STP website, the Kent and Medway STP bulletin, CCG and partner organisation websites, newsletters and stakeholder briefings.

After the consultation has closed we will publish a report setting out the major themes emerging from the consultation, a summary of the responses relating to our consultation options, an overview of the process, an explanation of how the final decisions will be taken (including dates of meetings in public) and the high-level timeline for implementing the chosen option.

A framework for the response to the public consultation document is shown below, based on best practice guidance.

The report will include the following information:

- Introduction and background
- Review of case for change
- Review of proposed changes
- Summary of responses to consultation
- Number of responses and how many were deemed suitable/usable
- Respondent background, e.g. voluntary organisations, faith groups, clinical, public
- Responses to specific consultation questions
- Summary of responses for individual questions
- Summary of themes in responses
- Information on themes that came out of consultation not covered by the questions
- How the CCGs will address concerns
- Link to website where responses can be viewed
- Recap of final decision-making process and next steps.

This report will draw on the independent evaluation report. It will be available online, with printed copies available on request. The full evaluation report will also be available to the public on the CCGs’ websites and on the Kent and Medway STP website, with hard copies available on request. Kent, Medway, Bexley, Bromley and East Sussex councils’ Joint Health Overview and Scrutiny Committee will be invited to review the consultation process and comment on the outcome. The final decision on the future shape of acute hospital stroke services will be taken by the CCG governing bodies, through their delegated Joint Committee. Dates for consultation are still being confirmed but it is expected that a final decision on the future shape of hospital-based urgent stroke services in Kent and Medway will be taken in the autumn of 2018. Following the governing bodies’ decision, a
detailed communications and media plan, will set out how this decision will be communicated to all stakeholder groups.

15. **Measure of a successful consultation**
The success of our consultation will be measured against:

- the aim and objectives set out in section 7 of this plan
- whether we have met our statutory and legal duties during the consultation
- feedback from stakeholders
- depth and breadth of analysis from feedback gained by activity and engagement methods during the consultation period
- measurement against the target for reach set out in section 9 of this plan
- analysis of social media and other media coverage for penetration of key messages; and
- depth of analysis resulting from feedback gained during the consultation.

16. **Resourcing plan**
Resources are needed to deliver the consultation approach outlined in this plan.

Our best practice consultation approach aims to ensure that statutory requirements have been met and, in the event of a legal challenge, that the correct process has been followed.

It is important to note that consultations tend to be challenged on process (typically equalities and options development) – and this could lead to long delays, potential re-consultation and increased costs, and of course too the opportunity costs for patients in delays to making improvements to services. In summary, although the investment outlined below is significant, it is recommended that investment is secured so that the process may be run properly, effectively and robustly. As well as enabling an effective consultation which we hope will produce rich feedback and insights, this will also help mitigate the risk of successful challenge around a poor consultation process at a later stage.

**A dedicated consultation team**
To successfully deliver this consultation approach, and the activity plan, we recommend the Kent and Medway CCGs identify a dedicated core team, focused solely/largely on the consultation. This team would mainly consist of existing staff working for CCGs or the Sustainability and Transformation Partnership, and organisations already commissioned to provide support for the STP. We have indicated this resource below and the cost of most of these posts is already covered. This core team will need to be supported by colleagues in CCGs and provider organisations who will lead local delivery of activity and help cascade and disseminate key information and materials as necessary.

These resources are not intended to replace or cut across the existing communications and engagement teams, but add capacity and specialist capability to ensure that the deliverables in this plan can be delivered to a high quality and to time and agreed budget. It would be expected that knowledge transfer from any specialist contractors would be undertaken to build expertise and experience within the Kent and Medway network.

Running a public consultation exercise is challenging and requires a core team that is resilient, professional and ideally consistent to take the programme through from start to finish. It is wise for the CCGs to also consider how they may handle potential reviews by the Independent Reconfiguration Panel or a Judicial Review, in due course.

Details of the proposed core/central Kent and Medway stroke consultation team is shown in Appendix A.
Resource costings
While most of the staffing costs are already met as detailed above, there are some additional costs for additional external capacity/capability to support delivery of the work for a short period of time in the lead up to and/or during the consultation, and for administrative staff. In addition, there will be costs for document design and printing and other materials and events required to run a successful consultation. The costs for these resources are estimated in this plan at this stage.

Non-pay resources
Non-pay resources should be agreed in advance. This will give the consultation team the flexibility to be responsive to change and focus their delivery and activity within the agreed envelope.

A current work in progress, indicative budget is set out in Appendix B.

17. Conclusion
By its nature this plan will be iterative, although based on the comprehensive approach described here and agreed with key colleagues and stakeholders. It will be updated as necessary and appropriate in the lead up to consultation, and adapted as necessary during consultation to make sure it supports the maximum reach to our target audiences, and is flexible enough to address any gaps or duplications or issues that may emerge.

<tr>
<td>Contingency</td>
<td>£15,000</td>
<td>We advise this is allocated in the budget</td>
</tr>
<tr>
<td>Total costs</td>
<td>£149,760.00</td>
<td>Plus, cost of consultation responses analysis - up to £100,000, and fulfilment/distribution costs</td>
</tr>
</tbody>
</table>

* Some of these items may be forecast within existing budgets  
** Some external provider quotes still to be verified
Appendix C: Consultation delivery plan

NB: This delivery plan is a work in progress. CCG communications and engagement leads have been asked to develop plans to support the consultation at local level. Work is underway to map existing meetings, events and other opportunities. Venues for specific public meetings to discuss the consultation proposals (hosted by the Stroke Review Programme) are being sourced. Further detail will be added over the next period.

<table>
<thead>
<tr>
<th>Week no. and key topic for communications</th>
<th>Activity taking place at Kent and Medway level</th>
<th>Activity taking place at local level</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Activity at all levels will be a mix of face-to-face, online, proactive and reactive (including responding to requests for attendance at meetings and events hosted by others etc)</td>
<td></td>
</tr>
<tr>
<td>Week -2</td>
<td>• Briefings and meetings with staff who may be affected by the proposals – led by senior clinicians and Senior Responsible Officer (SRO) for the stroke review.</td>
<td>• Local support to affected staff groups and feedback to consultation team and stroke programme board on reaction and response to briefing sessions.</td>
</tr>
<tr>
<td>Topic/focus: Engagement with affected staff</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Week -1</td>
<td>• Briefings and meetings with staff who may be affected by the proposals – led by senior clinicians and SRO for the stroke review.</td>
<td>• Local support to affected staff groups and feedback to consultation team and stroke programme board on reaction and response to briefing sessions.</td>
</tr>
<tr>
<td>Topic/focus: as above</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

NB: We have committed to a ‘no surprises’ approach to staff engagement where staff may be directly affected by the proposals set out in the stroke consultation document. Any pre-briefings before the proposals are formally published carried a risk of leak and this will be managed by the stroke consultation team who will activate a handling plan should information leak into the public domain in advance of the official launch.

Week 1
Topic: Introducing the consultation - case for change/current challenges and overview of options, how to engage & respond
• Central electronic dissemination of consultation document across consultation area including stakeholder briefing and communication to staff.
• Physical dissemination of printed versions of consultation document to stakeholder organisations, K&M wide organisations (e.g. libraries, Citizen’s Advice, Healthwatch etc) – timing tbc, depends on final sign-off date for print and lead times
• Online consultation presence and collateral goes live.
• Promotion via existing channels – e.g. CCG and provider websites, social media, bulletins, newsletters, staff intranets etc of consultation and opportunities to attend meetings, listening events and other local activities etc
• Physical dissemination of consultation doc to staff and patient areas in provider organisations
• Physical dissemination of consultation doc to staff areas and to GP practices by CCGs
### Activity taking place at Kent and Medway level

1. **Media and stakeholder launch event** (launch plan to be developed including sequencing of announcements, key messages, event shape and logistics etc).
2. **Start of consultation discussions and presentations at existing meetings including:** HOSC, Health and Wellbeing Boards, VCSE sector meetings and networks, LMCs and other professional groups and bodies, MPs, top tier authority groups (district councils will be engaged at CCG level).
3. **Staff events in commissioner and provider organisations.**
4. **Consultation survey hosted on STP website. Links from all partner organisations.**
5. **Push via social media including Twitter and Facebook as well as in all other communications channels.**
6. **Advertisements in local press/media about consultation and details of public meetings/engagement opportunities.**

### Activity taking place at local level

1. **Wider/non-affected staff briefings in CCG and provider organisations** (briefing notes supplied by K&M team to ensure consistency)
2. **Attendance at local pre-existing events and meetings, both proactively identified and in response to requests for speakers, for example local district, borough and parish council meetings, patient/health reference groups, ‘Friends of…’ groups, meetings of local (patient) organisations etc.**
3. **Other activities in this first week may include presence in town centres/shopping/community areas and public areas of provider organisations to raise awareness of consultation among public, patients and staff.**

---

### Week 2

**Topic:** Our vision for the future – benefits, patient stories, staff stories, case studies from elsewhere

1. **Consultation survey hosted on STP website. Links from all partner organisations.**
2. **Push via social media including Twitter and Facebook as well as in all other communications channels.**
3. **Webchat with a senior clinician on future vision**
4. **Focus groups with groups identified by Integrated Impact Assessment and those at risk of stroke**

---

### Week 3

1. **Consultation survey hosted on STP website. Links from all partner organisations.**

---

*Listening events/public meetings held in Thanet, West Kent, Bexley CCG areas*

*Promotion via existing channels as above*

*Attendance at local pre-existing events and meetings, as above*

*Presence in town centres/shopping areas and public areas of provider organisations as above*

*Staff briefings as needed*
