Question 2: Do you agree or disagree with the one-off transfer of 1% (approximately £10.0m) from the Schools Block to the High Needs Block for 2022-23, to provide additional support to mainstream schools to operate inclusively?

- A) Agree
- B) Disagree
- C) Don't Know

Question 3: If there is support from schools to continue to transfer 1% of the Schools block to support inclusive practices in mainstream schools, KCC would like to understand which of the following scenarios schools prefer:

- A) Scenario 1 – continue with last year's Local Funding Formula, applying increases in rates in line with the 2022-23 National Funding Formula (NFF) rate changes where appropriate.
- B) Scenario 2 – introduce the mobility factor into the current Local Funding Formula and apply increases in rates in line with 2022-23 National Funding Formula (NFF) where possible.
- C) Scenario 3 - I don't support transferring 1% of school funding to support inclusive practices in mainstream schools, the Local Funding Formula would almost mirror the NFF.
- D) I don't know

Question 4: What percentage should we set the Minimum Funding Guarantee (MFG) for 2022-23?

A) 0.5% - this would ensure those schools who remain on the MFG receive at least a 0.5% increase per pupil, which would be lower than the Government's estimate for inflation and would therefore mean a further erosion of their historic higher funding level.

B) 2% - this would ensure those schools who remain on the MFG receive at least a 2% increase per pupil which is the Government's estimate of inflation in 2022-23. This option would cost more than option a) above.

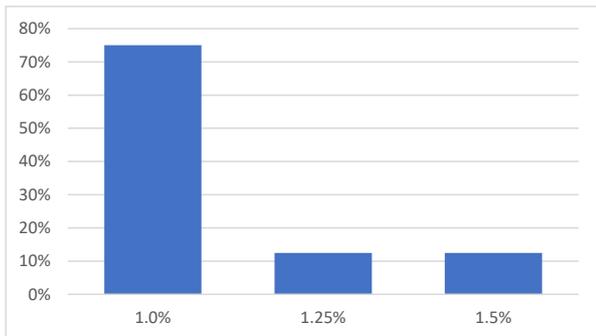

C) Something different but between 0.5% and 2% - please specify the percentage you think.
