

APPENDIX 1

SUBJECT CONTENT OF REGIONAL STRATEGY

4.13 Each region will need to determine its priorities to achieve sustainable economic growth and development over the period of the plan. In terms of policies and spatial priorities we propose that every regional strategy should cover:

- an overview of the key regional challenges over the plan period;
- how economic growth can best be delivered having regard to employment and the key drivers of productivity as well as regeneration.
- a distribution of housing supply figures and opportunities of unavoidable climate change, achieving development in a way which is consistent with national targets for cutting carbon emissions;
- those areas within the region identified as priorities for regeneration investment and intervention; and
- strategic requirements and provision for transport, waste, water, minerals, energy and environmental infrastructure, insofar as these are not already specified in national policy.
