Workstream overview (not exhaustive)

Quick wins   **Technology Trials**   **Analytics**

Service streams							
Pavements	Pavement age visualisation	Computer vision asset capture	Telematics asset capture	Drone-based asset capture	Pothole remediation optimisation	Early intervention strategy	End of life degredation modelling
Winter Maintenance	Gritting compliance & monitoring	Road freezing prediction model	Route optimisation				
Lighting	Power usage & carbon calcs	Fault response performance	Crime correlation				
Inspections	Steward vehicle tracking	Performance analysis	Scheduling optimisation				
Operational Maintenance	Gang vehicle tracking	W/O efficiency & KPIs	Gang deployment optimisation				
Schemes	Existing crash/risk data visualisation	Computer vision traffic counting	Computer vision near miss assessment	Scheme prioritisation	Scheme evaluation		
Drainage	Multiple sensor live assessment	Risk-based remediation					

Features		
Air Quality	Dynamic AQ risk model	
Network Risk	Dynamic network risk model	
Traffic	High quality traffic data	

Kent County Council   In partnership with   amey   ADEPT LIVELABS
